## WORLD RADIO TV HANDBOOK 2005

Prices for orders from WORLDWIDE DX CLUB · Preise bei Bestellung beim WORLDWIDE DX CLUB:

€ 28.00 or US\$33.60. Extra for air mail: € 10.20 or US\$12.20.

These prices include postage and packing. Delivery against advance payment by International Money Order, cheque in € drawn on a German bank (otherwise please add € 5.00 for bank charges), cheque in US\$ drawn on a US bank, cash in any convertible currency, Postal Money Order or transfer to our postal giro accounts Postbank Frankfurt/Germany No. 289010605 (IBAN: DE49 5001 0060 0289 0106 05 - BIC/SWIFT-Code: PBNKDEFF) or Postbank Leeuwarden/Netherlands No. 3822840.

Der obige Preis enthält Porto und Verpackung. Lieferung gegen Vorauszahlung durch Überweisung, Scheck in € (gezogen auf eine deutsche Bank, sonst € 5,00 zusätzlich für Bankgebühren), Postanweisung oder Bargeld. Postbankkonten: Frankfurt am Main/BRD Nr. 289010605 [Bankleitzahl 500 100 60] und Leeuwarden/Niederlande Nr. 3822840.

## INTERNATIONALE ANTWORTSCHEINE (alte, kleine Version)

Bei uns erhältlich für € 1,00 pro Stück (inkl. Porto). Mindestbestellung: 10 Stück. Laut UPU (s. DX MAGAZINE 6/02, S. 31) sind diese weiterhin unbeschränkt gültig.

DX MAGAZINE is the monthly publication of WORLDWIDE DX CLUB, Postfach 12 14, D-61282 Bad Homburg, Germany. Price for a single copy: € 1.30 or 2 International Reply Coupons (IRC's); annual subscription rate: € 15.60 or 16 IRC's. Other currencies and air mail rates on request. Cover: Peter Pohle + Jürgen Kauer (KAVOP)

DX MAGAZINE No. 11

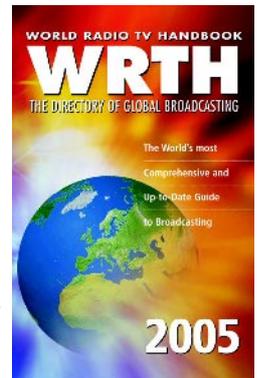

· Vol. XXXIX

· November 2004

Hello again,

Welcome to another issue of our DX MAGAZINE. Please remember to order the new **WORLD RADIO TV HANDBOOK 2005** early this year, since it is scheduled to be available here in Europe in the beginning or mid of December, as reported in our last DX MAGAZINE. By the way: More information on this year's edition can be found on our web page <<http://www.wwdx.de/archive/wrth2005.pdf>>.

Bitte denken Sie daran, daß das neue **WORLD RADIO TV HANDBOOK 2005** in diesem Jahr wieder Anfang/Mitte Dezember erscheinen wird (s. DX MAGAZINE 10). Ihre Bestellung sollte daher schon Ende November bei uns vorliegen, wenn Sie bei der ersten Auslieferung dabei sein wollen. Leider haben wir im letzten Monat versäumt, unseren Mitgliedern in Deutschland das angekündigte Überweisungsformular beizulegen. Dies holen wir diesen Monat nach.

(Cf. DXM 8/9, page 50) The **QSL Campaign of ADXB-OE** in cooperation with Radio Budapest has been extended until December 31st, 2004. This means that you are still able to take part in this campaign and get your special QSL card(s). The current B04 schedule of Radio Budapest has been published in DX MAGAZINE 10 on pages 10/11.

**EURO-TX 5.2**, the Database of International Broadcasts to Europe is now available free-of-charge, including the monthly updates. Please check: <<http://www.425dxn.org/swls/bdxc/eurotx/index.htm>>. This database of Dutch, English, French & German broadcasts is compiled by Jan Nieuwenhuis, Netherlands, who is also webmaster and editor of Benelux DX-Club (BDXC).

The **31.SWLCS DX-Camp** will be from July,15 until July 17, 2005 in Merchweiler in the Saarland area. A lot of Free Radio Operators visited this Camp in the past years. More information can be found on the following website: <<http://www.swlcs.com>>. **(BDXC via Mike Terry via Peter Kruse)**

The **A.I.R. Contest Attilio Leoni**, the annual Italian DX contest by Associazione Italiana Radioascolto, will take place from January 2nd to 9th, 2005. For full information, please write to: Bruno Pecolatto, AIR Contest Manager, Casella Postale 1, I-10080 Valprato Soana (TO), Italy, E-mail: <[bpecolatto@libero.it](mailto:bpecolatto@libero.it)>.

All new products of Klingenfuss Publications, **2005 Super Frequency List on CD-ROM**, **2005 Guide to Utility Radio Stations** and **2005 Shortwave Frequency Guide** will be published on December 10th. Detailed product descriptions, sample pages, database screenshots and the very latest references can be found on their website <<http://www.klingenfuss.org>>. Alternatively, you may ask for the free 2005 catalogue to your postal address. (Klingenfuss Publications, Hagenloher Str. 14, D-72070 Tuebingen, Germany, E-Mail: <[info@klingenfuss.org](mailto:info@klingenfuss.org)>)

And with this best wishes and good DX until next month from

## NEWS ABOUT BROADCASTING (+other) STATIONS

**Dr. Juergen Kubiak · Goltzstr. 19 · D-10781 Berlin · GERMANY**

**AFGHANISTAN:** A new radio station for Afghanistan, Radio Peace (Solh), has been heard on shortwave, the Dxing.info web site reported on 22 October. The station is said to be a new phase in USA psychological warfare for Afghanistan. Previous psyops operations, under the name Information Radio, used weaker airborne and naval transmitters. The report says that the station has adopted a new name and is now using high-power transmitters in the United Kingdom. Radio Solh broadcasts music which is popular in the target region and has messages urging listeners to report the whereabouts of the remaining Al-Qa'idah and Taleban leaders in Dari, Pashto and reportedly Urdu. The station has reportedly been heard offering rewards specifically for information leading to the arrest of Usamah Bin-Ladin. The current schedule is as follows, according to a report on the Dxing.info web site from Wolfgang Bueschel on 21 October:

0200-0500 gmt on 11810 kHz; 0700-1200 gmt on 21620 kHz; 1200-1300 gmt on 17555 kHz; 1300-1500 gmt on 17720 kHz; 1500-1630 gmt on 17710 kHz.

The reports adds that the transmissions are from UK-based transmitters at Woofferton and Rampisham operated by VT Merlin. BBC Monitoring observed the following announcement on 22 October on 21620 kHz at 0906 gmt in Dari and Pashto: "Radio Solh is the best, reliable source. It broadcasts news, informative reports and lively music." The name Radio Solh has been used previously in Afghanistan. A low-power station called Radio Solh in Jabal os Saraj (Jabalosraj) began broadcasting on 9 October 2001 on FM in Prawn province, north-west of Kabul. It had help from the French organization Droit de Parole (right to speak). (Source: ©BBCM via ©RNMN by AS October 27, 2004; via JKB)

**ANGOLA:** The government of the province of Huíla in Angola today recommended the deactivation of the transmission tower of the Catholic broadcaster *Rádio Ecclésia*, which it says was installed illegally about eight days ago in the Maior Seminary on the outskirts of the city of the Lubango. Speaking at a press conference, João de Castro, the local director of social communication, said that Rádio Ecclésia did not inform the government of the assembly of the tower nor the equipping of two studios in the Lubango seminary, which he said transgresses established legal formalities. The coordinator of the Installation Commission of Rádio Ecclésia, Father Simão Pacheco, promised to make a declaration on the matter in the next few days. The department of social communication has received several requests for the establishment of radio stations in the last three years from, amongst others, Trans World Radio, Community Radio of ADRA and Radio Ecclésia. (©RNMN by AS October 05, 2004; via JKB)

**AUSTRALIA:** After seven years of praying and sorting through red tape, *HCJB World Radio - Australia* has received official permission to expand its international broadcasting facility in Kununurra, Western Australia, onto adjacent property. This will make it possible to better serve the millions across the Asia/Pacific region. The idea to use the land dates back to July 1997 when David and Glenis Maingold were on a deputational trip to Kununurra. Some donors offered to give a 200-acre farm to HCJB World Radio-Australia as a base for local ministry and the development of an international shortwave broadcast facility. The shortwave station went on the air in January 2003 and now broadcasts Christian programs from this site across the Asia/Pacific region in more than 11 languages. (Excerpt from HCJB World Radio Press release via DXLD #4-156, October 12, 2004)

**BANGLADESH:** High Frequency Broadcasting Schedule B04, *Bangladesh Betar* External Service. Address: Radio Bangladesh, External Services, Bangladesh Betar, Shahbagh Post Box 2204, Dhaka 1000, Bangladesh. Reports to: Senior Engineer (Research Wing), National Broadcasting Authority, Bangladesh Betar, 121 Kazi Nazrul Islam Avenue, Shahbag, Dhaka-1000, Bangladesh. Fax: +880-2-8612021, E-Mail: <rrc@aitlbd.net>, Web: <<http://www.banglaradio.com>>.

**BELGIUM:** From 26 March 2005, *Radio Vlaanderen Internationaal* says it will stop its radio programmes in English, French and German. The broadcasts in Dutch will be mostly relays of the domestic networks, and the only remaining shortwave transmissions will be to southern Europe. The RVI Web site will be relaunched with a new look. The name of the station will also be changed, to VRT-Internationaal. "The old and traditional mediumwave, and especially shortwave, output will be reduced," says VRT Radio Director Frans Ieven. These are outmoded delivery methods and "there are other cheaper and more efficient means of reaching people than with gigantic shortwave transmitters." But although the output will be reduced, it isn't disappearing altogether. "On mediumwave, a bit of shortwave, via satellite and the Internet, people can still hear an offering which you could describe as the best of the VRT channels. A network in which we combine the bits of our domestic services which are most relevant to the Flemish abroad." RVI will also carry "interesting sporting events" as well as some specific programming produced for Dutch-speaking listeners abroad. But many of the existing programmes in Dutch will also disappear. Radio programmes like Brussels Calling in English, French and German are being scrapped. In their place there will be translations, on the VRT-Internationaal Web site, of the main points from the Flemish and Belgian news stories. There's a relatively large expatriate Belgian community we need to serve, says Ieven, but what we have to offer is limited. Therefore, we have to do it as efficiently as possible. "Some people will find that they receive more interesting things, others will find they no longer receive what they had before. These are the inevitable compromises we have to make," he said. From the end of March, the Website will have a new look. The Flemish abroad will then be the focus, and for news the Web user will be re-directed to nieuws.net. (©RNMN by AS October 19, 2004; via JKB)

The latest edition of Radio World from *Radio Vlaanderen Internationaal* (RVI) suggests that listeners should write to the Flemish Media Minister to suggest why RVI should not stop broadcasting in English, French and German next March, as is currently planned. Radio World says:

The Flemish media minister Geert Bourgeois wants listeners and viewers to help to decide the future of the Flemish public broadcaster VRT. Mr Bourgeois is preparing an evaluation of the Flemish public broadcaster. He says that the six million Flemish people are the VRT's shareholders and wants them to have their say. Mr Bourgeois does not simply intend to collect complaints, but organise a debate in society at large. The results will guide the Flemish government in its talks with the VRT on its future. Next year the Flemish media minister starts to negotiate a new management contract with the VRT. The contract sets out which services the VRT should provide in return for public cash. The Flemish international broadcaster RVI is a division of VRT. So, if you feel inspired to help us, you could tell him what you think of stopping shortwave, or any kind of radio in English, French and German. This is his address:

Media minister Geert Bourgeois  
 Alhambra building  
 Emile Jacqmainlaan 20  
 B-1000 Brussels  
 Belgium

**BHUTAN:** Radio Broadcasting was started by a group of young volunteers, known as the National Youth Association of Bhutan (NYAB) in November 1973. The station was operational only on Sundays with 30 minutes of news and music. The NYAB club office was transformed to announcing studio on weekends. The 400-watt transmitter was rented from a local telegraph office. The station was called Radio NYAB. In 1979, the Royal Government recognizing the importance of the radio for development communication, embraced the station under the wings of the Ministry of Communications. In 1986 with the commissioning of a 5kw short-wave transmitter and a small broadcast studio, Radio NYAB was renamed as *Bhutan Broadcasting Service - BBS*. Daily broadcasting was introduced with three hours of programming that reflected the national character. But it was only in March 1991 that BBS acquired a permanent seat and a professional look with the commissioning of a 5kw short-wave transmitter station and a studio complex-cum-office block. 2nd June 1999 was another historic date for BBS and for Bhutan as the national television service was

launched to commemorate the Silver Jubilee reign of His Majesty the King of Bhutan. Presently, the television service is available for the residents of Thimphu, but there are plans to extend it to the whole country. The two-hours of broadcast from 7pm to 8 pm contains 30 minutes of news and announcements in Dzongkha and English, followed by various programs and documentaries in both languages. In June 2000, BBS introduced FM radio service for Western Bhutan with the inauguration of the main FM station at Dobchula and one relay station at Takti in the south. The FM service was extended to central Bhutan in January 2001 and plans are underway to cover the whole country by the end of the ninth five year plan. BBS at internet: <<http://www.bbs.com.bt>>.

Short wave Radio:

Transmitter Power: 50 KW SW Broadcast Transmitter SK 45 F3

Broadcast Frequency: 49 meter band 6035 KHZ.

(OBSERVER #2004 Oct 25 via DXLD #4-164, October 28, 2004)

**CHINA (Peoples Rep.):** *China Radio International* (CRI) has signed a contract extension with WRN following a visit by a high-level delegation to the London headquarters of the international broadcaster and transmission service provider. WRN will continue to provide an increasing range of transmission and distribution services to CRI, ensuring that listeners around the world can tune into programmes produced in many languages by China's international radio station. The delegation was led by Mr Xia Jixuan, CRI's Vice-President. Other delegation members included Mr Dong Weimin from the Chinese Ministry of Finance and Mr Zhao Gang from the Chinese State Administration for Radio Film and TV. WRN has worked closely with CRI for more than five years since signing an initial Collaboration Agreement in Beijing in 1999. WRN works on CRI's behalf distributing its daily programmes to reach both new and existing listeners around the world using AM and FM transmissions that augment CRI's traditional shortwave broadcasting from China. CRI's daily programmes can be heard on FM in Berlin and Moscow and on AM in London, St Petersburg, across Western Europe, South West Russia, Ukraine and Romania. WRN identifies the most appropriate transmitters, undertakes local negotiations and monitors the output on behalf of CRI. Furthermore CRI's daily programmes in English, French, German and Russian can be heard on WRN's international news radio networks distributed around the world via satellite, cable, local FM relays, wireless applications and the Internet. After the signing ceremony, Mr Karl Miosga, WRN's Managing Director, said: "I am delighted that CRI continues to place its trust in WRN to distribute its content worldwide giving more listeners the opportunity to easily tune into the important Chinese perspective." **CHINA (TAIWAN):** *Radio Taiwan International (RTI)* has launched a new logo that it says "provides a strong visual endorsement that enhances its stature as one of the world's leaders in the industry. The design's clean lines depict a corporation that is technologically advanced, international and excellence-oriented." According to RTI, red and gray were chosen to create a new palette to distinguish from RTI's previous colour scheme. Using the colours red and gray reinforces closeness, warmth and dynamism. RTI says the brilliant red colour is unique in the industry, and it evokes the emotional appeal of human communication enabled by technology. The identity is a simple and symbolic configuration comprising three gradient curve lines, representing a continuous cycle of discovery, creativity and knowledge, which stems from latitude, longitude and altitude coordinates to pinpoint a location. The curves indicate RTI's global scope, and the gray color suggests stability and trust. Additional graphic devices will be used on all applications to express movement and innovative thinking. **EGYPT:** Sources at *Radio Cairo* say major budget cuts looming. Tarek Zeidan reports from Cairo: "According to a source working in Radio Cairo, there'll be a huge budget cut starting 1/11/04 and several overseas sections of Radio Cairo will be closed for good...including the Portuguese section beamed to Brazil and several other sections ..the remaining sections will be English, French, Spanish.... I don't know about the German and the Russian sections. "It was really obvious that something is going on specially when all the media followers here in Egypt noticed that the close down of ESC2 (Egyptian Satellite Channels 2) on 15/10/04 as everyone was wondering why ESC2 is not working on the Nile Sat...it turned out to be as a part of the changes that will take place in the media scene soon. "That means a lot of shortwave frequencies used to carry the Voice of Egypt will be in the clear and no more Radio Cairo in Afar, Fulani..etc. Further details will be given soon... hopefully I'll be able to get the exact affected sections soonest." (©RNMN by AS October 21, 2004; via JKB)

**FINLAND:** Bulletins in classical Latin air domestically on YLE Radio 1 and worldwide on YLE Radio Finland. Nuntii Latini is also available on the Internet at <<http://www.yleradio1.fi/nuntii>>. Nuntii Latini- Radiophonia Finnica Generalis 31.10.04-27.3.05:

Sundays at 1655 UT: North America 13665, South America 17730

Sundays at 1355 UT: Eastern Europe 9595

Sundays at 1955 UT: Europe 6120, 9630, 963 / Satellit network YLESAT1

Sundays at 2045 UT: Northern Europe 558

Mondays at 0345 UT: Northern Europe 558 / Satellit network YLESAT2

Mondays at 0955 UT: Asia and Australia 17810, Northern Europe 558

Inquiries about Nuntii Latini should be sent to: Nuntii Latini YLE Radio 1, BOX 60, 00024 Yleisradio, Finland// Email: <nuntii.latini@yle.fi> (via Paul Gager, BDXC-UK via DXLD #4-155, October 10, 2004)

**FRANCE:** The President-Director General of *Radio France International* (RFI), Antoine Schwarz, has made clear RFI's intention to consolidate its presence in the traditionally French-speaking areas of Africa by putting more emphasis on local languages and also by relaunching RMC Middle East, which has seen increasing competition from various new stations broadcasting in Arabic. Furthermore, Antoine Schwarz also specified that there had been no updates on the international news channel project. (Source: European Broadcasting Union via ©RNMN by AS October 16, 2004; via JKB)

**GABON:** The *national radio station of Gabon* is due to resume broadcasting this weekend after being off the air for nine months. An official ceremony will be held tomorrow, at which Minister of the Communication Mehdi Teale will preside. Created in the colonial era, Radio Gabon suspended broadcasts on 6 January for restructuring. The first channel of the National Television service (RTG 1), which operates inside the same building, will be able to resume its programmes in a month's time, having also been suspended in January. (HLR = Hamburger Lokal Radio - RTR = Radio Traumland, Belgium)

We would also like to inform you about the new program of "Le Héraut de la Chrétienne Science" on SW from Juelich:

Tuesdays, 18:00 to 18:30 UTC, 7220 kHz, 200g, target Westafrica and France

Thursdays, 18:00 to 18:30 UTC, 7220 kHz, 155g, target Central Africa

Any reception report is highly appreciated. Best regards from Juelich."

(Ralf Weyl, T-Systems, Regional MediaBroadcast Cologne, MediaBroadcast, Address: Merscher Hoehe, D-52428 Juelich, Germany; E-Mail: <ralf.weyl@t-systems.com>).

Das Hamburger Lokalradio 96,0 MHz sendet seit 6. November über einen leistungsstarken Kurzwellensender der T-Systems in Jülich ein wortgeprägtes Kulturprogramm. Jeweils Samstag von 10.00 bis 11.00 Uhr UTC wird ein bunter Mix aus Kultur und Unterhaltung ausgestrahlt. Die Frequenz 6045 KHz garantiert einen europaweiten Empfang. Der Sender mit 100 Kilowatt Trägerleistung wird im sogenannten DAM-Modus (Dynamische Amplitudenmodulation) betrieben. Dies führt zu deutlich geringeren Stromkosten. Empfangsberichte sind erwünscht und werden mit QSL-Karte bestätigt. Rückporto sollte den Berichten beigelegt werden. Mehr zum Lokalprogramm gibt es auf <<http://www.hhllr.de>>. Anschrift: Hamburger Lokalradio, Kulturzentrum LOLA, D-21031 Hamburg, Deutschland.

(Michael Kittner, Stationsleiter HLR, Oct. 17, 2004)

**INDIA:** In each language service *All India Radio - AIR* is presented a composite program consisting of a news bulletin, commentary, press review, talks on matters of general and cultural interest, occasional feature programs and documentaries, Indian classical and light classical music (Vocal and Instrumental music) as well as music of the area concerned. Broadcasting started in India in 1927 with the proliferation of private radio clubs. The operations of All India Radio began formally in 1936, as a government organization. With clear objectives to inform, educate and entertain the masses. When India attained Independence in 1947, AIR had a network of six stations and a complement of 18 transmitters. The coverage was 2.5% area and just 11% of the population. Rapid expansion of the network took place post Independence. AIR today has a network of 208 broadcasting centres with 150 medium frequency(MW), 48 Short Wave(SW) and 128 FM transmitters. The coverage is 89.51% of the area, serving 98.82% of the population. AIR covers 24 languages and 146 dialects in Home Service. In External Services, it covers 26 languages: 16 national and 10 foreign languages. Listeners are requested to send Reception Report and Comments on the programmes to the Director of External Services, All India Radio, Post Box No. 500, New Delhi-110001 (India). Reception reports on technical quality of the programmes are welcome and may be sent to the Director (Frequency Assignments), All India Radio, Room No.204, Akashvani Bhavan, New Delhi-110001 (India). Fax: 91-11-3714062, 3710145. E-mail: [faair@nda.vsnl.net.in](mailto:faair@nda.vsnl.net.in). (JKB)

**IRAN: Islamic Republic of Iran Broadcasting (IRIB)** is reintroducing shortwave transmissions beamed to Europe and North America for the new winter broadcasting season. According to the IRIB Web site, English will be available to Europe at 1930-2030 UTC on 6110 and 7320 kHz, and to North America at 0130-0230 UTC on 9580 and 6120 kHz. Other languages are also being reintroduced on shortwave for Europe, including:

#### German

0730-0830 UTC on 15085 and 21770 kHz  
1730-1830 UTC on 6110 and 9500 kHz.

#### French

0630-0730 UTC on 17590 and 21645 kHz  
1830-1930 UTC on 6180 and 9755 kHz

#### Italian

0630-0730 UTC on 15085 and 17560 kHz  
1930-2000 UTC on 9615 and 7295 kHz

Frequencies for other languages are available on the Web site. A rather unusual feature of the IRIB Web site is that every language section has its own design and layout, rather than a corporate style. (©RNMN by AS October 25, 2004; via JKB)

#### **IRIB** English service broadcasting schedule B04 from November 1st:

1030-1130 UTC, 15480 and 15460 kHz / Indian Subcontinent  
1530-1630 UTC, 9610 and 9940 kHz / Indian Subcontinent  
1930-2030 UTC, 6110 and 7320 kHz / Europe,  
11695 and 9855 kHz / South and East of Africa  
0130-0230 UTC ("Voice of Justice"), 9580 and 6120 kHz / North America

#### German schedule:

0730-0830 UTC, 15085 and 21770 kHz, German  
1730-1830 UTC, 6110 and 9500 kHz, German  
(Guenter Jacob, 25./27. Oct. 2004, German sked also direct from <germanradio@irib.ir> via Volker Willschrey, October 26, 2004)

#### Another English **IRIB** B04 schedule:

1030-1130  
15480 Indian Sub Continent  
15460 Indian Sub Continent  
702 Republic of Azerbaijan

765 Pakistan  
1130-1230  
Voice of Justice - via Internet/Hotbird  
Satellite only  
1530-1630

**ITALY:** The Italian Minister of Communications, Maurizio Gasparri, says that the privatization of public broadcaster *RAI* will start next spring. The Italian government is currently looking for a bank to handle the privatization. Initially, 20% of RAI will be available for sale on the stock market. The move requires a change in the media law, which is expected to go through in April 2005. There are fears that Prime Minister Silvio Berlusconi will use the privatization of RAI to get an even firmer grip on control of the major Italian media. (©RNMN by AS October 21, 2004; via JKB)

On Sundays at 1350-1730, the following frequencies may be used for news or sports broadcasts in Italian: 9670 21520 21550 21710  
(Andrea Borgnino via Roberto Scaglione BCLNEWS.IT, via DXLD #4-151, October 2, 2004)

**IRELAND:** Irish public broadcaster *RTE* has announced that maintenance on its 500 kW mediumwave transmitter at Tullamore has been completed, and the station will resume broadcasting on Friday 5 November. The transmitter has been off the air since July. (©RNMN by AS November 02, 2004; via JKB)

**LITHUANIA:** B04 schedule of *Radio Vilnius* (Lithuanian Radio's Foreign Service) as mentioned by Vladas Dobilas on today's edition of Radio Vilnius:

To North America:

2330 UTC on 7325 kHz

0030 UTC on 9875 kHz

To Europe:

1900 UTC on 666 kHz (MW)

0930 UTC on 9710 kHz

The 1900 broadcast is also streamed over the Internet.

(Ted Schuerzinger - Swprograms mailing list via DXLD #4-162, October 22, 2004 )

**MISCELLANEOUS:** UK media regulator Ofcom and the Radio Society of Great Britain (RSGB) have announced that all necessary procedures required for early access to the 7.1 to 7.2MHz spectrum for all *UK radio amateurs* have been finalized and that access is allowed as of 0100 UTC on Sunday 31 October 2004. Early access is granted on a Secondary (non-interference) basis using a maximum of 26dBW (400 watts) PEP for Full licensees, 50 watts for Intermediate and 10 watts for Foundation licensees. Notices of Variation for the Foundation, Intermediate and Full licenses have been published on the Ofcom website. The RSGB recommends that for the time being only voice and Morse code modes are used between 7.1 and 7.2MHz. Band planning issues on 7MHz will be kept under regular review and will be dependent on the number of administrations granting early access to this band prior to full Primary access on 29 March 2009. Ehard Goddijn of Radio Netherlands reports that there's already activity, even as high as 7200 kHz where he monitored UK amateurs co-channel with Radio Bulgaria. (©RNMN by AS November 01, 2004; via JKB)

FCC adopts rules for *Broadband over Power Lines*. The US Federal Communications Commission (FCC) has adopted changes to Part 15 of its rules to encourage the development of Access Broadband over Power Line (Access BPL) systems while safeguarding existing licensed services against harmful interference. Access BPL is a new technology that provides access to high speed broadband services using the largely untapped communications capabilities of the nation's power grid. By facilitating access to BPL, the FCC says it's taking an important step toward increasing the availability of broadband to wider areas of the country because power lines reach virtually every home and community. In areas where consumers already have broadband access, BPL can enhance competition by providing another broadband alternative. Access BPL will also facilitate the ability of electric utilities to dynamically manage the power grid itself, increasing network reliability by remote diagnosis of electrical system failures. In the Report and Order adopting these changes, the Commission recognized the significant concerns of some licensed radio service users regarding the potential of Access BPL systems to cause interference to their operations. The Commission stated that its intention in adopting the Part 15 rule changes was to ensure that Access BPL operations do not become a source of harmful interference to licensed radio services [these include amateur radio and shortwave broadcasts]. Based on extensive research and analyses, as well as experience, it concluded that the interference concerns of licensed radio users can be adequately addressed and that Access BPL systems will be able to operate successfully on an unlicensed, non interference basis under the Part 15 model. The rule changes in the Order establish specific technical and administrative requirements for Access BPL equipment and operators to ensure that interference does not occur and, should it occur, to provide for a timely resolution of that harmful interference without disruption of service to Access BPL subscribers. The Order also sets forth procedures to measure the radio frequency (RF) energy emitted by Access BPL equipment.

Specifically, the Order by the Commission:

- \* Sets forth rules imposing new technical requirements on BPL devices, such as the capability to avoid using any specific frequency and to remotely adjust or shut down any unit;
- \* Establishes "excluded frequency bands" within which BPL must avoid operating entirely to protect aeronautical and aircraft receivers communications; and establishes "exclusion zones" in locations close to sensitive operations, such as coast guard or radio astronomy stations, within which BPL must avoid operating on certain frequencies;
- \* Establishes consultation requirements with public safety agencies, federal government sensitive stations, and aeronautical stations.
- \* Establishes a publicly available Access BPL notification database to facilitate an organized approach to identification and resolution of harmful interference.
- \* Changes the equipment authorization for Access BPL systems from verification to certification; and
- \* Improves measurement procedures for all equipment that use RF energy to communicate over power lines.

**SOLOMON ISLANDS:** Text of report by *Solomon Islands Broadcasting Corporation* text web site on 27 September: Solomon Islands Broadcasting Corporation, SIBC, welcomes the announcement by *Radio New Zealand International* that it would start broadcasting to the Pacific region using a new digital capable shortwave transmitter in early 2006. SIBC general manager Johnson Honimae says the corporation welcomes this announcement because it will mean a better quality relay of Radio New Zealand International programmes such as news and current affairs and sports every day for our listeners. He says the corporation sees one of the roles of SIBC as providing many sources of information for its listeners to enable them make decisions to improve their daily lives, adding that Radio New Zealand International is one of those sources through their many high quality programmes such as news and current affairs, and sports. Mr Honimae says with the inception of the new digital shortwave transmitter in 2006, the relay of the programmes through SIBC would be of a high quality and clarity for our listeners. He says Radio New Zealand International also plays an important role in the cyclone season in Solomon Islands because it carries the cyclone warnings 24 hours a day, something that SIBC is not able to do because of the lack of resources. Mr Honimae commends the New Zealand government for agreeing to boost funding to Radio New Zealand International to enable it to move to digital shortwave technology, saying this shows the New Zealand government's

commitment to the people of the Pacific region. (Source: Solomon Islands Broadcasting Corporation text web site, Honiara, in English 27 Sep 04 via ©BBCM via ©RNMN by AS September 28, 2004; via JKB)

**SRI LANKA:** Victor Goonetilleke reports: On the 22nd of September the order went from the Director General Engineering at *SLBC Sri Lanka Broadcasting Corp.* to Ekala SW transmitting station to stop all Domestic SW transmissions due to the high cost of electricity. With it a long journey of Domestic SW has come to an end. MW ceased last year. However, the SLBC still runs its SW Service for its external services. The SLBC has a very effective FM coverage. The terrain of the country is tailor made for VHF and TV coverage with the highest mountain in Sri Lanka, Mt. Pidurutalagala 8281ft (2524m) and highlands situated in the center of the country. The Central Highlands consists of a series of mountain peaks which almost without exception have one or more VHF/UHF and Microvave links. However, we are making representations to the SLBC to restore at least a domestic service relay for Sri Lankans working in the Maldiv Islands and in neighboring countries where Internet radio will still be prohibitive. (©RNMN by AS September 26, 2004; via JKB)

Broadcasting on an experimental basis was started in Ceylon by the Telegraph Department in 1923, just three years after the inauguration of broadcasting in Europe. Gramophone music was broadcast from a tiny room in the Central Telegraph Office with the aid of a small transmitter built by the Telegraph Department engineers from the radio equipment of a captured German submarine. The results proved successful and barely three years later, on December 16, 1925, a regular broadcasting service came to be instituted. Edward Harper who came to Ceylon as Chief Engineer of the Telegraph Office in 1921, was the first person to actively promote broadcasting in Ceylon. He launched the first experimental broadcast as well as founding the Ceylon Wireless Club together with British and Ceylonese radio enthusiasts. Edward Harper has been dubbed 'the Father of Broadcasting in Ceylon.' Here are some important chapters in the story of broadcasting in Sri Lanka.

- 1926 - The opening of a Concert Studio at the Ceylon University College.
- 1927 - The installation of acoustically treated studios and an Engineering Control Room at Torrington Square, Colombo.
- 1934 - The constitution of a Wireless Broadcasting Advisory Board.  
Also, first experiments with a short wave transmission to achieve better reception in areas outside a 40-mile radius of Colombo. Construction of a Receiving Station for the reception of Empire Programmes.
- 1937 - The installation of a 3.5-5 Kw medium wave transmitter by a Ceylonese engineer.
- 1939 - The issue of a fortnightly Programme Supplement to subscriber licence holders.
- 1940 - The appointment of a Special Commission with Sir Kandiah Vaithianathan, as chairman, to report on all aspects of broadcasting.
- 1942 - Owing to war conditions, the premises at Torrington Square were vacated for occupation by the R.A.F ., and the broadcasting organisation was accommodated in a residential bungalow in Cotta Road, Borella.
- 1947 - Work commenced on a building in Torrington Square, designed to suit the needs of a modern broadcasting station. This work was completed in September, 1949.
- 1949 - Radio SEAC (South East Asia Command) was taken over for Radio Ceylon.
- 1950 - Inauguration of the Commercial Service of Radio Ceylon in September.
- 1953 - Appointment of a Commission on Broadcasting under the Chairmanship of Mr.N.E.Weerasuriya QC.
- 1954 - Completion of work on a separate two storeyed building for the Commercial Service work commenced in 1953.
- 1958 - Installation of a Medium Wave Station at Diyagama commenced.
- 1960 - Experimental Project in establishing a Regional Station in Kandy commenced.
- 1967 - Radio Ceylon became a public corporation on January 5th 1967. The Prime Minister of Ceylon Dudley Senanayake ceremonially opened the newly established Sri Lanka Broadcasting Corporation. The name 'Radio Ceylon' was changed forever when the the radio station was re-launched as the Sri Lanka Broadcasting Corporation.
- 1972 - The country became a republic under Prime Minister Sirimavo Bandaranaike. (<http://www.vernoncorea.info> via JKB, Nov 2004)

**SWITZERLAND:** *Swissinfo/Swiss Radio International (SRI)* has broadcast its last shortwave and satellite radio programmes on October 30, 2004. As SRI left the air after nearly 70 years, a chapter in Swiss radio history comes to an end. swissinfo/SRI will in future focus exclusively on its multimedia news and information platform, [www.swissinfo.org](http://www.swissinfo.org), which is available in nine languages. Swiss Radio International first broadcast to the world on shortwave in 1935. The station made a name for itself as a neutral voice of authority during the Second World War and throughout the Cold War. Programmes were broadcast in nine languages (German, French, Italian, Romansh, English, Spanish, Portuguese, Arabic and Esperanto). During this time, SRI established itself as one of the most high-profile and popular international radio broadcasters. The end of the Cold War, coupled with the advent of satellite technology and the Internet revolution, spelled the end of the shortwave era. At the end of the 1990s, and following a strategic change of direction which was approved by the Swiss government in 1999, swissinfo/SRI started to transform itself into a multimedia enterprise. The decision was taken to phase out radio output and develop an online presence, although audio reports and interviews are still available on the website. The multimedia news and information platform [www.swissinfo.org](http://www.swissinfo.org) was launched in March 1999. Today it is available in nine languages (German, French, Italian, English, Spanish, Portuguese, Arabic, Japanese and Chinese). The change of strategy has paid off: today, [www.swissinfo.org](http://www.swissinfo.org) registers around 8.5 million page views each month. Nicolas Lombard, the director of swissinfo/Swiss Radio International, admits that radio cannot be replaced. "But with our internet platform, [www.swissinfo.org](http://www.swissinfo.org), we can offer a range of information that was simply not possible on the air. What we provide today is a wide range of news and stories from and about Switzerland, presented in a way which was unthinkable in the past," said Lombard. As radio broadcasts come to an end, SRI will be broadcasting a variety of special programmes. The German Department is airing a selection of archive interviews with well-known Swiss, such as Max Frisch and Friedrich Durrenmatt. Swiss living abroad are also being given the chance to have their say on air. For the last Arabic programme, most of the department's journalists will gather around a microphone. And you can listen again to highlights from the extensive archive of programmes in English by visiting [www.swissinfo.org](http://www.swissinfo.org) and clicking on the Multimedia button. (Source: swissinfo/SRI via ©RNMN by AS October 27, 2004; via JKB)

**SYRIA:** *Radio Damascus* plans to discontinue German, at least on shortwave. Probably English is endangered as well, just not mentioned here since the source was the German programme: Radio Damaskus, German Language Department, P. O. Box 4702, Damaskus, Syrien. E-Mail: <mmhrez@shuf.com>. The German Language Department will thank you for your sending mail to stop transmission cuts. (via KLE, 2004 Oct 28, DXLID #4-164, October 28, 2004)

**TIBET:** Newest Frequencies of Voice of Tibet:

1215 to 1300 UT around 17525 kHz

1432 to 1517 UT around 15690 kHz

1532 to 1605 UT around 9395 kHz

First half hour is Tibetan language, immediately followed by 15 mins in Mandarin. via Mr. Oystein Alme, VOT director (via Eriz Zhou, 2004 Oct 26, dxldyg via DXLD #4-164)

Note Days: 1=Sunday .. 7=Saturday (FCC webpage via JKB, Nov 2004)

**WYFR** may be off the air for some weeks. Jeff White reports on behalf of the National Association of Shortwave Broadcasters (NASB): "I just got a call from Evelyn Marcy, Dan Elyea's secretary at WYFR in Okeechobee. She said that Dan wanted me to let the Board know that there has been extensive damage at the transmitter site from Hurricane Jeanne. All power is out. Power poles are broken in half across Route 98, reducing it to one lane. When Hurricane Frances hit three weeks ago, part of the roof of the transmitter building was torn off, and this time even more was torn off. They have not been able to do an assessment of damage to the transmitters and antenna field yet, but the towers are still standing. (They have 14 transmitters at this site.) There are rumours that it will take at least three weeks to restore power in the area, so WYFR is probably going to be off the air for some time. I will let you know if I get any updates." (Source: Jeff White, NASB, Sept 27, via DX LISTENING DIGEST, via ©RNMN by AS September 28, 2004; via JKB) Jeff White has received the following update from Dan Elyea at WYFR in Okeechobee, Florida, which was seriously affected by Hurricane Jeanne: "Electrical power returned to the site late Sunday afternoon. We're gradually bringing the house back up as we complete repairs in the field. We should have most services back in operation by the end of the week, but a couple of the difficult antenna repairs will probably take somewhat longer." (©RNMN by AS October 06, 2004; via JKB)

The US House of Representatives yesterday gave the government the green light to spend \$20 million a year for humanitarian aid to North Koreans inside and outside the country, and moved to make North Korean refugees eligible for asylum in the United States. The North Korean Human Rights Act, approved by voice vote, also contains \$4 million for expanding US radio broadcasts and other measures designed to promote democracy and human rights in North Korea. (©RNMN by AS October 05, 2004; via JKB)

Officials of the US Broadcasting Board of Governors (BBG) have written to employees to defend the Arabic-language **Radio Sawa** against the severe criticisms contained in the draft report by the State Department inspector general. Chairman Kenneth Tomlinson and board member Norman Pattiz told employees that Radio Sawa has achieved "some of the most important accomplishments in the history of international broadcasting." They said the two-year-old station has established "unprecedented credibility with Middle East audiences." State Department spokesman Richard Boucher said he could not comment on what he described as a preliminary document that he said is being revised to reflect fears by some officials that the wrong criteria may have been used to judge the station. (Source: VOA News via ©RNMN by AS October 14, 2004; via JKB)

Today's Washington Post carries details from a leaked draft report report prepared by the State Department's inspector general which is highly critical of Radio Sawa. The newspaper says the report, based on extensive interviews in Washington and the Middle East with US officials and public diplomacy experts, was scheduled to be published in August, but publication has been repeatedly delayed. It says a copy of the draft report was supplied by a source who said he feared that the Inspector General's office was buckling under pressure and would water down the conclusions. The Broadcasting Board of Governors is reported to have vehemently protested the report, questioning its methodology and assumptions in a 49-page pre-publication rebuttal. To read the Washington Post story go to Google News and search on "Radio Sawa". (©RNMN by AS October 13, 2004; via JKB)

The US Broadcasting Board of Governors is soliciting bids to supply a mediumwave transmitter for installation in the Turk and Caicos Islands. The solicitation is for a "50 kW all solid-state MW transmitter with adjustable RF power output capable of being installed and operated in an existing facility on the Turks and Caicos Island; the

transmitter shall be a stand-alone device requiring only primary mains power, a conditioned operating environment, and a RF output load; the carrier frequency shall be 1570 kiloHertz." Turks and Caicos, a British territory, is situated roughly 90 miles (145 km) northeast of Cuba. (©RNMN by AS October 11, 2004; via JKB)

**VATICAN: Vatican Radio** has inaugurated its news program in Arabic on the Internet.

"A commitment of high technical and editorial quality has been necessary to put into operation a system that integrates, image, sound and written texts in completely different alphabets," the station announced in a statement. With the new system, each one of the 39 language sections of the station will be able to offer its own production of news and services without having to wait for a specified transmission hour. **ZIMBABWE:** Zimbabwean *Foreign Minister Stan Mudenge* has warned the UK, US and Netherlands to desist from supporting radio stations that are airing "daily poisonous anti-Zimbabwe propaganda" from their bases in neighbouring countries and Europe, reported the Zimbabwean state-owned The Herald paper on its web site on 30 September. He dismissed as "wicked" the broadcasts saying they are meant to destabilize Zimbabwe. Mudenge's ire was directed at programmes produced by three stations, Netherlands-backed Voice of the People, VOA-affiliated Studio 7 and London-based ShortWave Radio Africa. He said: "These three countries are destabilizing my country through these radio programmes targeted at my country. I say to the Netherlands, stop your wicked broadcasts against my country through your so-called 'Voice of the People' station". Mudenge dismissed both Studio 7 and ShortWave Radio Africa as "weapons of mass deception" that "have been unleashed against my country" by the US and UK governments respectively. He also warned the three countries against supporting the "puppet" opposition and some local NGOs saying this amounted to a "blatant interference" in Zimbabwe's internal affairs. **Thanks a lot to our club members for your contributions:**

MF : Michael Frese, Osnabrueck, Germany. SONY ICF SW 7600G with SONY LP1 antenna.

RAD : Richard A. D'Angelo, Wyomissing, USA. Ten-Tac RX-340, Drake R-8B, Lowe HF-150 with Alpha Delta DX Sloper, Datong FL3, JPS ANC-4

RL : Richard Lemke, St Albert, Alberta, Canada. JRC NRD-535 HF with random long wires

\*\*\*\*\*

Dear Friends,

Welcome to the November edition.

The end of October saw the demise of another popular broadcaster on short waves i.e. Swiss Radio International. Fond memories of the TWO BOBS hosting the Short Wave show are now items of posterity.

Winter has set in the northern hemisphere and with the time change the nights have become more longer. May it is a good time now to catch the remaining stations on shortwave before they also bow down to the internet and back out.

Till next issue it's 73's from your Editor,

*Ashok Kumar Bose*

\*\*\*\*\*
