DX MAGAZINE No. 10 ■ **Vol. XLIV** ■ **October 2009**

Hello again,

Here we are back again after our usual summer break. I hope that you have enjoyed your summer holidays, if you had any, and that you have had also some time for DX'ing. If so, please do not forget to send your news and loggings to our editors.

On page 2 please find the prices and conditions for ordering the new **WORLD RADIO TV HANDBOOK 2010**, which will be available in Germany in mid-December, according to the German general distributor. In this 64th edition for the year 2010 WRTH Publications Limited have again devoted their resources to the all-important task of obtaining and providing the most up-to-date information on mediumwave, shortwave and FM broadcasts and broadcasters available in any publication. The book will have 672 pages, including 64 pages in full colour (more information: <<http://www.wwdxc.de/archive/wrth2010.pdf>>).

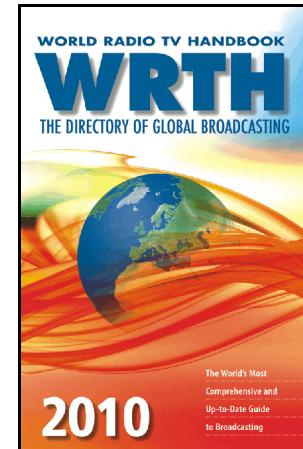

Auch in diesem Jahr können Sie das neue **WORLD RADIO TV HANDBOOK 2010** wieder bei uns bestellen. Der Subskriptionspreis bis zum 30. November beträgt für unsere Mitglieder € 30,00 (bei einem Ladenverkaufspreis von € 36,00) - ab 1. Dezember dann € 32,00. Die Preise in anderen Währungen finden Sie auf Seite 2. Das Buch soll laut Ankündigung des deutschen Generalimporteurs wieder Mitte Dezember erscheinen und wird dann von uns gleich an die Besteller ausgeliefert werden. Der obige Preis enthält Porto und Verpackung. Lieferung gegen Vorauszahlung durch Überweisung, Scheck in € (gezogen auf eine deutsche Bank, sonst € 5,00 zusätzlich für Bankgebühren), Postanweisung oder Bargeld. Konten: Raiffeisenbank Grävenwiesbach Nr. 100019984 [Bankleitzahl 500 693 45] und Postbank Leeuwarden/Niederlande Nr. 3822840.

Falls Sie bei dieser Gelegenheit gleich Ihren Mitgliedsbeitrag überweisen möchten: Die Mitgliedsbeiträge von 2009 gelten für das kommende Jahr unverändert weiter: RKwh + DXM = € 51,00, nur DXM = € 15,60, nur RKwh = € 40,00, RKwh + DXM als PDF-Datei = € 26,00, nur DXM als PDF-Datei = € 9,00, nur RKwh als PDF-Datei = € 20,00. Wann Ihr Mitgliedsbeitrag genau ausläuft, können Sie übrigens jeweils auf dem Adressenaufkleber Ihres DX MAGAZINEs (oben rechts = letzter bezahlter Monat + Jahr) sehen. Unseren deutschen Mitgliedern legen wir ein Überweisungsformular bei.

We have still a few copies of **WORLD RADIO TV HANDBOOK 1991** left, which we are offering to collectors for € 5.00, including postage and packing. Delivery against advance payment by International Money Order, cash or transfer to our bank accounts: Raiffeisenbank Graevenwiesbach No. 100019984 (IBAN: DE75 5006 9345 0100 0199 84 - BIC/SWIFT-Code: GENODE51GWB) or Postbank Leeuwarden/Netherlands No. 3822840.

Here is some information received from **Klingenfuss Publications**: We're now working on our new products to be published on 10 December 2008:

- 2010 Super Frequency List on CD
- 2010 Shortwave Frequency Guide
- 2010 Frequency Database for the Perseus LF-HF Software-Defined Receiver
- Supplement January 2010 to the 2009/2010 Guide to Utility Radio Stations

Full-resolution title page graphics can be found at: <http://www.klingenfuss.org/r_2010.jpg> and

<http://www.klingenfuss.org/s_2010.gif>. The printed Supplement will be attached free to all copies of the 2009/2010 Guide to Utility Radio Stations sold after 1 January 2010. Those customers that did acquire the 2009/2010 Guide to Utility Radio Stations before that date may download the pertinent .PDF file free from our website, after 1 January 2010.

(**Joerg Klingenfuss, Hagenloher Str. 14, D-72070 Tuebingen, Germany, Internet:**

Forging top-level strategies aimed at harnessing the power of technology to enhance our global wellbeing was the focus of this year's **ITU TELECOM WORLD 2009**, which took place in Geneva from October 5th to 9th. Over 2,250 VIPs, including UN Secretary-General Ban Ki-moon, Heads of State, Heads of Government, Ministers, Ambassadors, heads of regulatory agencies, and CEOs from around the world, came together for the week-long event, which featured a series of top-level roundtables, meetings and lively debate on the role of information and communication technologies (ICTs) in addressing many of the most pressing issues of our time, such as climate change, global economic recovery and cybersecurity.

A quick walk through the exhibition halls was enough to confirm that the ICT industry continues to be driven by rapid innovation, despite the economic downturn. But while visitors were often dazzled by the many exciting technologies on display, Touré stressed the importance of working together to make global networks accessible to all, and to achieve the Millennium Development Goals.

Participants and delegates attended from 186 countries - almost the entire gamut of ITU's 191 Member States. The show floor played host to 456 exhibitors from 49 countries, spanning just about every ICT domain, from the very latest wireless innovations to low-cost broadband solutions to satellite systems.

VVIP summits brought Heads of State and Government, ICT ministers and heads of regulatory agencies from around the world, together with top C-level decision makers for discussion on critical areas such as cybersecurity, climate change and the role of ICTs in economic development. Heads of State and Heads of Government were unanimous in recognizing the role of technology as a key tool in helping combat climate change, acknowledging the need to have ICTs recognized in the upcoming Copenhagen agreement. They also joined forces to offer condolences for victims of the recent natural disasters in Indonesia, the Philippines and the Pacific Islands.

The criticality of information-sharing in disaster response was reinforced by a key announcement at the event that will see 18 countries around the Indian Ocean rim participate in a United Nations-backed tsunami exercise. The exercise will stress the fact that, through good climate science and information sharing, ICTs can help reduce the risk and impact of natural disasters.

Forum sessions brought together players from across the ICT sector, from Ministers to CEOs, CTOs and technical and policy experts to discuss areas such as the new technologies shaping the future of ICT, the challenges of regulation in a fast-changing environment, and cybersecurity. Sessions featured roundtables and interactive panel discussions, with participants encouraged to put forward their questions via a range of different formats. For the first time, Forum sessions were webcast live to a global audience, allowing many more to share in the debate.

Companies, countries and regions from across the globe demonstrated the latest technologies on the show floor. Alongside major names and household brands were 35 pavilions from around the world, including a range of thematic pavilions which focused on key areas such as Green@ICT, e-Health, and empowering people with disabilities through ICTs.

"UNESCO, together with its partners, came to TELECOM WORLD 2009 to display assistive technologies and raise awareness of our mission - which is to mobilize new, action orientated partnerships and further cooperation among stakeholders", said Abdul Waheed Khan, Assistant Director-General for Communication and Information, UNESCO. "As the role of ICTs in enhancing our global wellbeing was in the spotlight this week, we feel real progress has been made in achieving that goal. This event brought together the whole world of ICTs and underlined a vital message - that ICTs must be accessible to all."

Over 250 young people from 135 countries took part in this year's Youth Forum, following an action-packed programme of discussion and debate focusing on areas including Innovative technologies and services; New Visions, Policy & Regulation; and Connecting Schools to Connect Communities. During the course of their week in Geneva, Youth Fellows had opportunities to interact and develop mentor relationships with senior members of the ICT sector, such as government officials, industry executives, technology leaders and more.

And with this best wishes and good DX until next month from

ABKHAZIA [non] - RFE/RL TO BROADCAST TO ABKHAZIA, SOUTH OSSETIA

October 07, 2009, PRAGUE -- Radio Free Europe/Radio Liberty (RFE/RL) has announced plans to launch daily broadcasts to the breakaway Georgian regions of South Ossetia and Abkhazia beginning in November. The 60-minute daily program will be produced by journalists in RFE/RL's Prague headquarters and correspondents in Georgia (including South Ossetia and Abkhazia) and Russia. The new broadcasts will be in Russian and will be available on shortwave radio frequencies every day in the evening. Broadcasts may also be available on FM frequencies. The broadcasts will include news and features and will be interactive with listeners. A website known as "Caucasus Echo" will debut simultaneously with the first broadcasts in November. The web presence will be optimized for dial-up connections, which predominate in the region. The new program's major objective is reconciliation among people in the regions and the bridging of different viewpoints expressed by the parties to the processes in the region (Source : RFE/RL via Aloke Gupta, New Delhi, India, Oct 7, dxldy via DXLD, and via Yimber Gaviria, DXLD)

ASCENSION ISLAND - A shipment of cargo bound for a renewable energy project has left Poole Harbour. Two thousand tonnes of aggregate and machinery were loaded onto the cargo ship MV Thor Falcon hired by construction group Galliford Try. The company has been contracted by the BBC to construct the foundations for a wind farm on Ascension. Because the BBCWS operates shortwave transmitters on the island, it has put it in the unusual position of also being the electricity provider for the island's inhabitants. Currently diesel engines are in use, but the new five-turbine wind farm will generate green energy, offsetting the emission of more than 4,000 tonnes of CO2 every year and saving around 500 kilopounds a year (Bournemouth Daily Echo 14 Sept via David Morris, Oct BDXC-UK Communication via WOR 1481, DXLD)

ANTARCTICA - 15476, LRA36, Oct 8, 2009, 2038-2103 UT; Noting signal weak but trying to gain strength, switched to USB, and checking 1 kHz above and below, tone clearly pointed to this frequency. Just barely heard at times: talk by OM 2057, song at 2059, and signal off at 2103. Encouraging that first time heard here in S CT on a DX-440 without external antenna; will have to monitor over next few days (Konnie Rychalsky, CT, HCDX via DXLD)

AUSTRALIA - HCJB Australia B09 Broadcast Schedule 25 October 2009 to 27 March 2010

Days: 1 Sunday 2 Monday 3 Tuesday 4 Wednesday 5 Thursday
6 Friday 7 Saturday

(AWR, via ADDX Andreas Volk-D, wwdx BC-DX TopNews Oct 8)

BHUTAN - Bhutan noted back on 6035 after several days around 0100 today Oct. 3, 2009 (Jose Jacob, VU2JOS, India, dxldyg via DXLD)

BIAFRA [non] - After barely a month on 17520 via WHRI, V. of Biafra International found back on 15665 which it had used during most of the summer, Oct 9 at 1915 check and heard immediate ID by The Orator. This lower frequency is somewhat more reliable here, but what about Biafraland, where the audience is not even given the correct current frequency on website or in announcements? VOBI is Fridays only at 19-20 (gh, WOR 1482, DXLD)

BOLIVIA - 4699.945, Radio San Miguel, Riberalta still in at 1040 to 1050 with strong signal. 1 October. 4716.633, Radio Yura, Yura with flauta and YL, 0956 fair signal 3 October (Bob Wilkner, Pompano Beach, Florida, US, Drake R 8 ~ Icom, 746Pro DL, Noise reducing antenna, 60 meter band dipole, DXLD)

4699.93, R. San Miguel (presumed), 0133-0202*, Oct. 2. In Spanish; playing LA ballads; poor with QRN; fairly sure signed off at 0202; open carrier still heard at 0312 (Ron Howard, Asilomar Beach, CA, Etón E1, dxldyg via DXLD)
 4409.81, Radio Eco, Reyes, 0235-0329*, Oct 3, Bolivian music. Spanish ballads. Spanish talk. Weak but readable.
 4699.99, Radio San Miguel, Riberalta, 0155-0230, Oct 4, Spanish ballads. Spanish talk. Poor in noisy conditions (Brian Alexander, PA, DXLD)
 4699.95, Radio San Miguel, 0946-1000+, Noted a male in Spanish language comments with TC's, but mainly music heard. On the hour, canned ID "...Radio San Miguel" followed by promos. Signal was good this morning, so far that is. (Chuck Bolland, October 5, 2009, Watkins Johnson HF1000, 26.27N 081.05W, DXLD)
 4700, Radio San Miguel, Riberalta 0940 with their frequency now almost 4700 on the dot. 7 October (Bob Wilkner, Pompano Beach, Florida, US, Drake R 8 ~ Icom 746Pro DL, Noise reducing antenna, 60 meter band dipole, DXLD)

BRAZIL - Observatorio Nacional --- Hi Glenn, I have an update on my previous logging of Observatório Nacional, in a letter received from Ricardo José de Carvalho, Head, Time Service Division, Observatório Nacional, Brasil. He writes (accent marks are missing [but gh replaces them as always]):

"We are glad of receiving your message about the radio reception of our 10 MHz broadcast time signal. The signal is generated by the Time Service Division DSHO (Divisão Serviço da Hora) of the National Observatory (ON) located in Rio de Janeiro - RJ - BRASIL that was founded in 1827. The DSHO are part of the Brazilian Ministry of Science and Technology and is the Brazilian Primary Laboratory of Time and Frequency by delegation of the Brazilian National Meteorology Institute INMETRO (National Institute of Meteorology, Standardization and Industrial Quality).

We've started the transmission of that broadcast radio time signal in November, 2008. The specifications of our transmitter are:

a) maker: Redifon Telecommunications Limited, London SW.18, England

b) model: HF TRANSMITTER REDIFON G453

c) power: 1 kW

d) QRG: 10 MHz

e) kind of modulation: A3H

f) kind of antenna: horizontal dipole - 1/2 wavelength

g) QRA: PPE

h) QRD: Longitude = 43 13 27,5 W Latitude = 22 53 44,6 S Height = 37 m

i) Contents of the transmission: the transmission consists of the Brazilian legal time (=UTC - 3 hours) announced by a lady voice starting with "Observatório Nacional" followed by the current time (hh:mm:ss) each ten seconds and with a beep for each second with a 1 kHz modulation during 5 ms and a long beep with 1 kHz modulation during 200 ms at the 58th, 59th and 60th seconds.`` [good, matching what I had logged --- gh]

I sent my reception report in Portuguese and Spanish + one US dollar. Official address on letter: Observatório Nacional, Rua General José Cristino, 77 - CEP 20921-400, Rua General Bruce, 586 - CEP 20921-030 - São Cristóvão, Rio de Janeiro - RJ - Brasil. (Ed Insinger, Summit, NJ, Oct 7, DXLD)

6135.06, 2300 22 Sept, R. Aparecida, Brazil. Full ID including ``onda media`` and ``onda tropical`` wavelengths then jingle. Strangely had time pips at 2302! Portuguese, SIO 242 (Alan Pennington, Oct BDXC-UK Communication via DXLD)

4885.000 Rdif. Acreana, 2031, Portuguese, male reverb announcer, mention of "Rio Branco" and many ments "Brasil." Finally into nice ballad at 2036 UT. Peaking nicely with my local sunrise. Several other possible Brazilian long-paths today but this was the strongest. 3 Oct.

(David Sharp-NSW-AUS, dxld Oct 4)

The reactivated station on 9675 kHz, R. Cancao Nova, Cachoeira Paulista SP, no doubt the source of Brazilian dialect religious talk, Oct 4 at 0601 UT, peaking S=9+12 but with deep fades. Modulation rather distorted, but carrier stable. Stronger than other Brazilians on 31mb air, 9645v and even weaker 9565 kHz. Hardly any sign of WYFR 9680 kHz to bother, unlike super-signal it sometimes has. (gh, dxld Oct 4)

9505, Rádio Record, São Paulo, 0920-0932, 04-10, portugués, locutor, canciones brasileñas. Interferencia de emisora con programa en chino, en la misma frecuencia. 23322. (Méndez)

9565, Rádio Tupi (Súper Rádio Deus é Amor), Curitiba, 0916-0925, 04-10, locutor, portugués, religioso, predicaciones, curación de enfermos. 24322. (Méndez)

9630, Rádio Aparecida, Aparecida, 0914-0918, 04-10, locutor, religioso. En paralelo con 11855. 24322. (Méndez)

9819, Rádio Nove de Julho, São Paulo, 0912-0927, 04-10, locutor, portugués, comentario religioso: "Celebración de Deus", "Esta profecía", canciones religiosas. 24322. (Méndez)

9675, Rádio Canção Nova, Cachoeira Paulista, 0912-0926, 04-10, portugués, religioso, transmisión del santo rosario. 34433. (Méndez)

9695, Rádio Rio Mar, Manaus, *1000-1010, 04-10, identificación: "Rádio Rio Mar, ..., ondas cortas, 31 metros, 9695 kHz, 49 metros, 6160 kHz, Rádio Rio Mar, Manaos, Amazônia, Brasil". Canciones brasileñas. 24322. (Méndez)

11725, Rádio Novas de Paz, Curitiba, 0940-0955, 04-10, locutor, portugués, comentarios y canciones religiosas. 24322. (Méndez)

11780, Rádio Nacional da Amazônia, Brasília, 0932-0945, 04-10, canciones brasileñas. 33333. (Méndez)

11815, Rádio Brasil Central, Goiânia, 0910-0935, 04-10, canciones brasileñas, locutor, comentarios, identificación: "Radio Brasil Central". 34433. (Méndez)

11855, Rádio Aparecida, Aparecida, 0907-0910, 04-10, locutor, portugués, religioso, transmisión de la misa dominical. 24322. (Méndez)

11915, Rádio Gaucha, Porto Alegre, 0905-0917, 04-10, canciones brasileñas, locutor, comentarios, portugués. 24322.

(Méndez)

11925, Rádio Bandeirantes, São Paulo, 0901-0905, 04-10, locutor, portugués, comentario: "Primeiro aniversário do programa". 34333 (Manuel Méndez, Lugo, España, Escuchas realizadas en Friol, Sony ICF SW7600G, Antena de Cable, 10 metros, orientada WSW, DXLD)

(R BULGARIA DX MIX News, via wwdx BC-DX TopNews Oct 16)

CHAD - 4905 R. Nationale Tchadienne, Gredia, found active today, 04 Oct, at 1815-... UT, with a prgr in Arabic, talks, some music at 1836 UT and then reading something like messages (or announcements, obituary?), tribal tunes at 1849 UT, 45333.

[later] Further to my earlier report today, the N'Djamena tx went off at 1859 UT, and then I switched to 6165 kHz to see whether something African was detectable - and it was indeed, but the stn audible underneath Croatia may be Zambia's R. 2 instead. As to 7120 kHz, no signal there. (Carlos Goncalves-POR, dxid Oct 4)

CYPRUS - A hefty broadband signal with few buzz peaks noted at 0924 UT Oct 7th in range 15202.40 - 15226.81 kHz. \\\ to CRI Kunming, 500 kW in English on 15210 kHz 9-11 UT, S=7. Buzz left when checked at 1010 UT.

Eton E1 showed the peaks independent of the CRI Kunming signal, I guess BUZZ was a pause signal from British Cyprus radar tentatively. (wb, wwdx BC-DX TopNews Oct 7)

CHILE - Frequency change of CVC International in Spanish to SAm from Sept 1

1200-2400	9635	SG0	100	kW	030	deg,	x1200-2300	same

(R BULGARIA DX MIX News, Oct 1)

CUBA - Another day, another anomaly to report at RHC. Oct 8 at 0547, 6140 was off the air, so impossible to tell whether it would have been in English or Spanish. 6120 was on in Spanish as well as 6000, whilst 6060 and 6010 were in English.

11760 now with light squeal degrading it, Oct 9 at 1343, Entre Cubanos program, fascinating interview with 82-year-old former Cubana de Aviación pilot, José Antonio de C. Domínguez, who flew hundreds of times each to México, Miami, New York and Madrid, starting with DC3s, both pre- and post-revolution (Glenn Hauser, OK, DXLD)

Will someone answer the phone at RHC? Checking some of RHC's frequencies tonight between 0405 and 0415 GMT tonight there's the sound of a telephone ringing on all of them. 6000 is the strongest where it's as loud as the English broadcast; the two Spanish frequencies (6060 and 6140) the telephone ring is much softer but noticeable. Come on guys, you have a listener, at least pick up the phone! Very strange, can't think of any reason why a ringing phone should be in the audio chain (especially this long). Open mic? Last telephone ring update before I call it a night, now faintly on 5900 kHz transmitting Morse code spy numbers at 0505 GMT. Not technically RHC since it's for a slightly undercover audience but same transmit site I'm sure (Travers DeVine, UT Oct 10, dxldyg via WOR 1482, DXLD)

CZECH REP - RADIO PRAGUE: SUPPORT NEEDED TO PREVENT SHORTWAVE CLOSING

I have just heard from Jonathan Murphy who writes in part:

I have been in Prague this past week and met David Vaughan, the former head of the English Section. It has just been announced that the Czech Ministry of Foreign Affairs is looking for Radio Prague to end all shortwave transmissions from the Czech Republic at the end of 2009. This would be an irreversible step. Radio Prague is the only customer at Litomysl and this would result in the closing and dismantling of that transmitter site. David has written a letter which he would like to be as widely circulated as possible:

12th October 2009, Dear Friends of Radio Prague,

You are probably not yet aware that the future of Radio Prague "the international service of Czech Radio" is under serious threat. The station began shortwave broadcasts in 1936 and, with the exception of the period of the wartime German occupation, has been broadcasting to the world ever since. Like most international public service broadcasters, Radio Prague is state financed. It is paid for through the state budget, via the Czech Ministry of Foreign Affairs.

Radio Prague is facing a 20% cut in its budget for 2010. At first glance, this figure does not seem like a mortal blow, but its impact will be devastating. The Foreign Ministry has stated explicitly that it considers shortwave to be an anachronistic means of broadcasting and has called on Radio Prague to terminate its shortwave broadcasts entirely from January 2010. As a result the transmitter in Litomysl (east of Prague), will almost certainly be dismantled. Radio Prague will continue primarily as a website.

The saving to the state budget will be tiny. In order to save around half a million euro, Radio Prague will end as a shortwave broadcaster after more than 70 years. In the course of my time as a BBC correspondent and then as editor-in-chief at Radio Prague (until 2006), when I was also active in the European Broadcasting Union, I followed developments in international broadcasting closely. During that period a number of international broadcasters abandoned their roots in radio nearly always at the bidding of bureaucrats rather than those involved in the stations themselves. Almost without exception the outcome, sooner or later, was the demise of the station altogether.

There are several reasons for this. One helpful parallel is to compare the position with that of a newspaper with a long and rich tradition, which stops appearing in paper form, and maintains only a web presence. Although the worldwide trend towards digitalization is clear, this does not mean that it is wise to throw out overnight all the advantages of producing a "traditional" newspaper. In the case of radio, the risks are still more evident, because public service broadcasting is a very specific medium with a distinct tradition and audience, and at its core is the spoken word.

In the seven decades of its existence, Radio Prague has built up a huge base of know-how and an impressive reputation internationally: Its role in the events of 1968, when Radio Prague journalists defied the Soviet-led invasion of Czechoslovakia is legendary. Radio Prague has built on this tradition in the two decades since the fall of communism, transforming itself into a thriving modern broadcaster. There can be little doubt that it has a far larger audience than any other Czech radio station, but unfortunately these listeners are scattered around the world and do not form a strong domestic lobby.

Shortwave broadcasts are in decline, but they have to be seen as part of a broader mosaic. Today's international broadcasters have long been aware of the need to broadcast on a number of different platforms: shortwave, medium wave, FM, satellite, internet and others. The more forward-looking among them have learned to be flexible and innovative. In this respect, the modern transformation at Radio Prague began over fifteen years ago when it was one of the first international broadcasters to set up its own website. That was back in 1994. This was quickly followed by its daily email news service and other innovations, including its enthusiastic commitment to satellite broadcasting. At the same time it has modernized the way that radio is produced; its journalists today take it for granted that they are working in a multi-media environment, where the spoken word is reinforced by text and image.

And Radio Prague has learnt to be extremely cost effective, broadcasting around the world in six languages for the equivalent of less than three million euro a year. In order for this to continue, it is absolutely crucial for Radio Prague not to forget its core activity. The station's current success is built on its status and tradition as a radio broadcaster. If it forgets its identity as radio, it will inevitably lose its way, desperately trying to compete in a field that is not its own.

The news of the latest cuts puts the staff and management of Radio Prague in a difficult position. It will not be easy for them to launch a campaign to save the shortwave broadcasts, as they could find themselves facing the alternative of having to cut jobs instead. Given that the amount of money needed to save the shortwave broadcasts is so small, I am convinced that the cause is worth fighting for and that it does not have to be a case of pitching jobs against shortwave. If the decision-makers in the government and at the ministry can be made to understand what is at stake, I am sure that the money can be found.

That is why I am writing this letter to encourage listeners around the world to rally behind Radio Prague at this difficult time.

With warmest regards, David Vaughan

Radio Prague needs to get listeners support at this time. Their address is:
 Radio Prague, Vinohradská 12, 120 99 Prague 2, Czech Republic
 Tel: (+420) 221 552 933, Fax: (+420) 221 552 903, E-mail: <cr@radio.cz>

Listeners should also contact The Ministry of Foreign Affairs of the Czech Republic:
 Ministerstvo zahraničních věcí
 Loretánské náměstí 5
 118 00 Praha 1, Czech Republic
 Tel: +420 224 181 111
 E-mail: <podatelna@mzv.cz>

Listeners should contact the Czech Embassies and representatives in their own country. A List of Czech Embassies can be found at <http://www.mzv.cz/jnp/en/diplomatic_missions/czech_missions_abroad/index.html>
 (via Mike Barraclough, Oct 12, dxldy via WOR 1482, DXLD)

Radio Prague has been the most proactive adopter of Internet technologies to extend its platform reach; the latest edition of each of Radio Prague's daily, weekly, and monthly programs is generally available for on-demand listening or download, and you can listen to each day's English language broadcast as a single program as well. A week's worth of programs is available in that form as well.

If you'd like to try your luck at some of Radio Prague's other languages (Russian, German, Czech, French, or Spanish) those programs are also archived for one week.

One of the interesting tools that Radio Prague uses to organize its content is RSS 'Really Simple Syndication' you might know its less formal synonym of news feed. Radio Prague offers 12 different thematic topics for which news feeds are provided: Business, Culture, Current affairs, Czechs abroad, European Union, Foreign policy, History, Nature, Science, Society, Sport, and Travel. Most of these feeds are updated several times per week; some (specifically Current Affairs) are updated more than once per day most days. Each update consists of a short summary, with a transcript and audio file available as well.

RSS feeds are maintained for current and former Radio Prague programs (such as "Insight Central Europe"); some of the audio in those feeds dates back several years.

One of the interesting areas is 'From The Archives', part of each Thursday's (Friday UT for most evening listening in the USA) program. Radio Prague has an English language audio archive that dates back to the early 1930s even before regular English language broadcasts were scheduled. These weekly segments are themselves archived; you can listen back to segments of 'From The Archives' that have been produced since November 2007. The segment that aired on September 24th, "Radio Prague Goes Back On Air", dates from 1990, when Radio Prague went back on the air following the Velvet Revolution after a few weeks of silence as the Communist regime and its Radio Prague staff were cut.

Another popular Radio Prague segment is 'Letter From Prague'; audio from this weekly program is available dating back to 2002, which is pretty impressive considering the work that was required to develop the web site code and catalogue the audio for online listening. 'Letter From Prague' continues to air in the Sunday (UT Monday for most releases targeting the USA) programming block. (Richard Cuff, Easy Listening, Oct NASWA Journal via DXLD)

CZECH REP / NON - October 07, 2009. PRAGUE -- Radio Free Europe/Radio Liberty (RFE/RL) has announced plans to launch daily broadcasts to the breakaway Georgian regions of South Ossetia and Abkhazia beginning in November.

The 60-minute daily program will be produced by journalists in RFE/RL's Prague headquarters and correspondents in Georgia (including South Ossetia and Abkhazia) and Russia.

The new broadcasts will be in Russian and will be available on shortwave radio frequencies every day in the evening. Broadcasts may also be available on FM frequencies.

The broadcasts will include news and features and will be interactive with listeners. A website known as "Caucasus Echo" will debut simultaneously with the first broadcasts in November. The web presence will be optimized for dial-up connections, which predominate in the region.

The new program's major objective is reconciliation among people in the regions and the bridging of different viewpoints expressed by the parties to the processes in the region.

DENMARK - New SW station? Message received from Roy Sandgren addressed to SW Broadcasters: ``Within the next months we are offering broadcasters 'airtime' via our SW station in Denmark. The station has 4-5 transmitters of

10 kW AM and 15 antennas in all directions. Planned a 100 kW AM with rotatable log periodic antenna. We intend to do tests in October with one of the transmitters which has to be converted to 'broadcast' AM-mode. Your programs can be on 4-5 frequencies and 4-5 antennas at the same time. All over Europe. Are you positive to do tests via CD or the net, even via satellite, let us know. . . 24/7/365 contracts available. Best regards, Roy Sandren, fax +46(0)40-644 44 60 +46(0)40-49 50 00, mobile +46(0)76-6632030, 070-2432000, Box 14006, SE-200 24 Malmö, Sweden`` (Roy Sandgren direct to BDXC 15 Sept, Oct BDXC Communication via DXLD)

Sounds dubious, or does Roy mean the Bergen SW site in Norway? (Dave Kenny, editor)

DOMINICAN REP - 6025.07, Radio Amanecer, 0250-0303*, Oct 9, Spanish religious talk. Religious music. ID. Poor with adjacent channel splatter.

6025.07, Radio Amanecer, 1035-1050, Oct 9, Spanish talk. IDs. Fair but with slight distortion.

6025.08, Radio Amanecer, *1027-1105, Oct 10, sign on with religious music. Spanish talk at 1029. IDs. Poor to fair with some adjacent channel splatter. Audio not very clear with distortion in audio. Distortion just got worse; worse during this time period (Brian Alexander, PA, DX Listening Digest)

ECUADOR - Initial plans from HCJB global and the LAR (Latin America Region) had been that the regional programming on 6050 kHz should be continued from Mt. Pichincha where also HCJB FM and AM (690 kHz) are operating. Due to new strategy and lower Donations due worldwide recession the plan to move one of the HC-100 to the "Quito-Antenna-Mountain" had to be cancelled.

But there have been many fixed frequency radios that have been handed out to people far away from the big cities in the region that are still in use and the programming in the indigenous languages are still heavy needed on the shortwave band. So a lot of talks have been made by all people involved and finally a solution has been found to continue the broadcasts at 6050 kHz:

The frequency 6050 kHz will be moved to the Mt. Pichincha and operated by a transmitter with about 10 kW power. It shall be on Air for about 16-17 hours a day, 365 days a year. A new schedule has just been prepared with some major changes to provide more programming in the indigenous languages. The new location is planned to be [start] on air in November 09. VozAndes Media will be responsible for operating this transmitter.

In order to build the new antenna, antenna lines, fences etc. some so called "Mingas" have been planned to transpose the plans to reality. "Minga" or "Minka" is a term for "community work" in the Quechua Language.

The first minga has been made on Saturday two weeks ago. The goal was to dig some holes for foundations for the antenna masts, the guy wires and the fences. 38 men and women came to work voluntarily on that project.

I've uploaded some pictures from the minga on the 19th of Sept 2009:

<<http://www.pappradio.de/bilder/minga1/1.JPG>>

<<http://www.pappradio.de/bilder/minga1/13.JPG>>

Yesterday (3rd of October) the second minga has been made to build up the antenna towers for a lazy-H antenna that shall broadcast on the 6050 kHz frequency. Here are some pictures from that event:

<<http://www.pappradio.de/bilder/minga2/1.JPG>>

<<http://www.pappradio.de/bilder/minga2/25.JPG>>

A (German) report on the minga and some other news from the HCJB World Office Germany and VozAndes Media in Ecuador can be found on <<http://www.hcjb.de/index.php?id=206>>

I'll keep you informed about the latest developments at the project.

(Stephan Schaa-D, dxld Oct 4)

What's still on the air from Pifo is as following:

6050 kHz 50 kW (until the TX on Mt Pichincha is ready)

11920 kHz in Port. 100 kW (until 15.11.2009)

11705 kHz in Port. digital, 4 kW (until 15.11.2009)

15280 kHz in German, digital, 4 kW (until 15.11.2009)

I think the reason for those programmes that are still on the air to mid of November is that these (except 6050 kHz) are all transmitted by two relative simple rhombic antennas which can be brought down very quick until the end of the year. The German - as well as the Spanish – programs have been transmitted via the last curtain antenna that was up in Pifo (north-south direction). This may now be brought down next.

The German service for South America now transmits over CVC Chile from 2300-0000 UTC on 9865 kHz. (Stephan Schaa-D, dxld Oct 5)

(Jaisakthivel-IND, dxld, Oct 6)

GUINEA REP - 7125 Conakry heard with good strength signal and nice audio on 7125 kHz this evening (5 Oct) so must have repaired their transmitter. Yesterday was just a carrier with no detectable audio which is what it's mostly been like for the past few months. Talk in vernacular to 1800 UT followed by programme of nice local music. But then went off abruptly in mid-tune at 1848 UT - maybe just a power cut though as back when rechecked at 1957 UT and still sounding good at 2120 UT. (Alan Pennington-UK, BrDXC-UK ng Oct 6)

HUNGARY - Winter B-09 schedule of Hungarian Radio in Hungarian:

0200-0300 on	6100 JBR	250 kW	306 deg to NAm
0500-0600 on	3975 JBR	250 kW	non-dir to WEu
1100-1200 on	6025 JBR	100 kW	non-dir to WEu
1700-1800 on	6025 JBR	100 kW	non-dir to WEu
2200-2300 on	3975 JBR	250 kW	non-dir to WEu

(R BULGARIA DX MIX News, Oct 7)

ISRAEL - 6973, 0235-, Galei Zahal, Oct 11. Excellent reception with Hebrew and music program. Not so well heard on other nights (Walter Salmani, Masset, QCI, BC, dxldyg via DXLD)
15785.74, Galei Zahal Hebrew service, weak signal at 0900 UT Oct 10, S=3 (wb, DXLD)

ITALY [NON] SLOVAK REP - B09/Winter 2009 schedule for IRRS-Shortwave via Rimavska Sobota

Effective Oct. 25,2009 - 28 Mar,2010

Freq.	Time	Days	Power	Antenna	Language (kHz)	UTC
5990	0530-0630	Mon-Thu	150 kW	Europe	English (1)	
7290	1800-2100	Fri,Sat,Sun	150 kW	Europe,ME,Africa	English (1)	
9510	1030-1300	Sun	150 kW	Europe,ME,N.Africa	English (2)	
9510	0900-1000	Sat	150 kW	Europe,ME,N.Africa	English (2)	
9835	0300-0600	Daily	150 kW	Africa	Engl,Arab(3)	
15650	1500-1800	Daily	150 kW	Africa	Engl,Arab(3)	

(1) To Europe, Middle East and Africa (2) To Europe, Middle East and North Africa (3) to Africa

See program schedule for language and program details Information on any additional test transmission will be available on our web site <<http://www.nexus.org/NEXUS-IBA/Schedules>>

IRRS-Shortwave, PO BOX 10980, I-20110 Milano, Italy. Email: <info@nexus.org>

LAOS - 7145, LNR Vientiane, 2329, Oct 07, carrier came on, into presumed Vietnamese, male reading news? to 2348 then songs to 2357 tune-out. Threshold signal, just about audible in Sam mode, fortunately usual hams kept fairly quiet. Regular s/off is at 0029 after listed Khmer as monitored Oct 04 /05 /06. Was wondering whether this language block would still be on the air as I cannot remember seeing this reported anywhere lately, but it definitely is! (Martien Groot, Schoorl, Netherlands, dxldyg via WOR 1482, DXLD)

7145, 1334-, Lao National Radio External Service, Oct 11. Fair level with English news by a YL. Best of the 3 mornings I tuned. Gone by 1400. My antennae at my QCI are more geared toward MW trans-Pacific DX and not SW (2 Beverages and a large diameter ALA 100), but reception is still possible on decent propagation mornings on SW (Walter Salmani, Masset, QCI, BC, dxldyg via WOR 1482, DXLD)

LITHUANIA - Frequency change of HCJB Global via Sikunai from Sept 20

1530-1628 NF	5940 SIT	100 kW	079 deg, x9805 in Russian/Chechen Sun only	3960 in B-09.
Cancelled txions for Mighty KBC in English				
2130-2228	6055 SIT	100 kW	259 deg to WEu Daily, from Sept 30	
0200-0258	6110 SIT	100 kW	310 deg to NAm Sunday from Sept 27	

(R BULGARIA DX MIX News, Oct 1)

Cancelled transmissions for Mighty KBC in English

2130-2228 on	6055 SIT	100 kW / 259 deg to WEu Daily, from Sep. 30
0200-0258 on	6110 SIT	100 kW / 310 deg to NAm Sunday from Sep. 27

(DX Mix News, Bulgaria, Oct 1)

"We are trying to bring 1395 back on the air as soon as possible It is no secret that we have been ready for the nighttime service since September '08. If a return does not happen before 1st December '09 We will return to short-wave. We can't wait for ever!" [also via Steve Lare]

MADAGASCAR - 5009.943 Radio Malagasy, 2048 UT, nice ballads and covers, including reggae version of Leo Sayer's "When I Need You." Don't get to listen every day at this time but seem to think they stay on late local weekends, as nominal sign-off is listed as 1900 UT. Pulled plug mid-song at 2053 UT. Excellent signal. 3 Oct.

(David Sharp-NSW-AUS, dxld Oct 4)

NETHERLANDS [non] - Notes on RNW shortwave transmissions [from B09], as left at the referenced place:

All Dutch transmissions to target areas outside Europe will be cut back to 27 minutes, as is the case in the western hemisphere since spring. Transmissions to Europe appear to be further reduced a little bit as well; in particular the late night slot 2100-2300 UT will use a single Tbilisskaya transmitter on 6040 kHz only. Of course altogether it is still remarkably extensive.

No Skelton, Rampisham, Moosbrunn anymore, but instead Arabic will use Trincomalee and Kigali, perhaps RNW's first shortwave services from these sites altogether, while Santa Maria di Galeria will be used for Dutch to Europe. And I think this has not been noted down so far: The airtime exchange with RCI is gone, already since last spring it seems (Kai Ludwig, Germany, Oct 4, dxldyg via DXLD)

NEW ZEALAND - RNZI B09 25 Oct 2009 - 28 Mar 2010

(Via Shakti Verma, TWR INDIA, Alokesh Gupta-IND, Oct 7)

SAUDI ARABIA - Surprise English program from Saudi Arabia (presumed): 17560 kHz: I tuned in at 1625 expecting an Arabic broadcast; but instead there was an English program about Islam, Allah, and Moses. Good readable reception, but noisy at times. Still going at 1650. I didn't catch an ID during this time. Hopefully this will be a regular English broadcast? (Bruce Fisher, MA; Palstar R30CC; 100 ft. longwire, Oct 9, dxldyg via WOR 1482, DXLD)

There is English on the domestic service at 1600-2100, so I fear this was a misfeed, but hope it keep up. I believe it can be heard on webstream anyway. No 17560 heard at 1605 Oct 14 (gh)

SAINT HELENA - Radio St. Helena Day 2009 will be on Saturday 14th of November 2009.

The 'Party On-The-Air' will have the following schedule:

Time in UTC Target Area(s)

2000-2100 India / Southeast Asia

2100-2200 Japan / Asia

2200-2330 Europe

2330-0100 North America/Central America/Caribbean

The transmission will be on 11092.5 KHz in Upper Side Band, as usual.

Radio St. Helena is very pleased to announce that the newly designed RSD 2009 QSL cards will be sponsored by the highly respected Japan Short Wave Club. This good news has been reported by Mr. T. Ohtake of the JSWC. It can truly be said, that without the very generous help of the JSWC, there would not have been a Radio St. Helena Day Revival in 2006.

To get a QSL from Radio St. Helena, you must send a written and verifiable reception report by AIRMAIL and include sufficient return postage. Email-reports will be not verified. Recordings will not be returned.

In EURO-countries, please send a 5-Euro banknote. Otherwise, please send 3 or more US dollar banknotes to cover the required return postage.

Radio St. Helena
 P.O.Box 93
 Jamestown, St. Helena
 STHL 1ZZ
 South Atlantic Ocean
 via AIRMAIL
 via United Kingdom & Ascension

The last two lines of the above address are very important and should be written as shown. Be sure to use sufficient postage on your letter to RSH. Ask at your local post office for the correct AIRMAIL postage for your letter to go all the way to St. Helena.

Emails and telephone calls from DXers everywhere are very welcome during the broadcasts. A special email address for RSD 2009 will, probably, be announced in October.

Gary Walters and his Team at RSH wish everyone excellent listening conditions, hope that you enjoy the programming, and hope that the sunspots will be kinder to us this year.

Source: Media Network, Robert Kipp/Radio St. Helena via Southgate
http://www.southgatearc.org/news/october2009/radio_st_helena_day.htm#
 (BrDXC-UK ng, Oct 3)

SAO TOME - 4960 VOA on Oct 4 w/ best signal hr this season thus far w/ VOA feature "Our World" w/ man talking on a new telescope at the Smithsonian Air & Space Museum at 0415 ... nice signal all the way to the Hausa svc at 0500 UT and beyond. No QRM but moderate noise and fading. SINPO 35333.
 (Bruce W. Churchill-CA-USA, DXplorer Oct 5)

SERBIA [non] - New addit. txion of International Radio Serbia in Serbian: 2130-2158 7230 BIJ 250 kW 100 deg to Australia. Good reception in BUL. (R BULGARIA DX MIX News, Oct 1)

SLOVAKIA - POSSIBLE CLOSURE OF RADIO SLOVAKIA INTERNATIONAL

<<http://www.rsi.sk>> 06. Okt 2009 - Says that SRo got no new funds for running the foreign service so far, thus the contracts of staff members have been terminated, effective yearend. They still hope to get the money; in this case the service would continue without changes. Otherwise only broadcasts in Slovak and English will continue, but presumably

no longer on shortwave. No sources specified, perhaps reflects statements from German service staff (Kai Ludwig, Oct 7, dxldyg via WOR 1481, DXLD)

SOLOMON ISLANDS - 5020, SIBC, 1038-1100 Oct 8, Noted SIBC right on their assigned frequency this morning with a male in Pidgin comments. Being rather late already, the signal was very poor at my location (Chuck Bolland, FL, DXLD)

5019.8, SIBC presumed this morning 8 Oct. from 1240 tune/in and still audible at 1310 but on its way out. Weak to fair at times, with English programming, man and woman talking and seems BBC relay (Don Jensen, Kenosha WI, Oct 8, NASWA yg via DXLD))

5019.95, SIBC, 1215, 10/9/09. Presumed the very weak station with extended talk by YL. Just too weak for details (Jerry Strawman, Des Moines, IA, Drake R8B, Wellbrook 1.1 M Loop, Par SWL Random Wire, DX LISTENING DIGEST) See if you can // it within a couple seconds to BBC, 5875, 6195, 9740 etc. (gh)

5020, SIBC at 1240 with BBC programming, a discussion of political regimes, 1256 "World sports from the BBC", 1300 BBC news. Heard past 1330. Poor through noise and a period of CW QRM, improved slightly to poor-fair at 1300+. Oct 10 (Harold Sellers, Vernon, BC, Oct 10, dxldyg via DXLD)

5020, SIBC, on reactivated frequency, Oct 10 at 1302 with BBCWS news in English, running about 2 words behind Singapore 9740; poor with Cuba-5025 splash. That's all one needs for a definite ID of this, but rather unsatisfying; one must listen before 1205 to hear genuine Solomonic programming (gh, DXLD)

SURINAM - 4990 R. Apintie (tent.) hrd Oct 4 for first time in many months w/ typical non-stop pop mx (or so it appeared) from 0623 UT tune, in and out of audibility _ this is typically when Apintie is hrd here when on the air. Threshold signal w/ no QRM from the Brazilian on 4885 kHz. Signal spike on the Perseus was better looking than the audio sounded (well above the noise lvl) and was centered on 4990 kHz. SINPO 15331. (Bruce W. Churchill-CA-USA, DXplorer Oct 5)

4990 R. Apintie, Surinam:

Dem Hinweis von Christoph folgend, habe ich heute morgen gegen 0515 UT auf 4990 kHz gedreht. Der eigentliche Traeger war recht deutlich vernehmbar. Nach kurzem Hinhoeren dachte ich erst, der Traeger waere voellig unmoduliert, weil gar nichts in die Kopfhoerer drang. Nach ca. 10...15 Minuten schwappten gelegentlich leise Musikfetzen herueber. Fuer eine verwertbare Aufnahme war das Signal viel zu schwach. Eben nur was fuer die Kopfhoerer. (Thomas Lindenthal-D, A-DX Oct 6)

SWEDEN - From the Radio Sweden website: "With the start of the new transmission period for short and medium wave, as well as satellite, on October 25, Radio Sweden will only be publishing our broadcast schedule on the Web. This is a logical consequence of the increasing importance of the Internet as a broadcast platform and because we have stopped broadcasting our own programs in Swedish. At the same time we are simplifying our marketing and audience services.

Listeners to our programs will find the schedules for all our languages under the heading "Frequencies/Tider och frekvenser" on the SR International homepage. When necessary and by request we will also continue to mail printed versions of our schedules in Swedish and other languages. Listeners can also contact Swedish Radio's Listener Service department with requests.

At the same time we are discontinuing mailing QSL cards to listeners in response to reception reports.

Ingemar Loefgren Head of SR International"
<http://www.sr.se/rs/english/index.htm>

Pity but very common these days; they sent me a schedule for years and issued some nice QSLs but I guess its just as easy to find the information online and receive an emailed confirmation of reception - Mike.
(R Sweden website, via BrDXC-UK ng Mike Terry-UK, Oct 5)

Radio Sweden special produced SWEDISH PROGRAM DISCONTINUED. Programs in Swedish short- and medium wave.

This means that our weekend programs the week that went (with a summary of the week's main Swedish news), Sweden Granary, Maritime magazine and Sweden in the world disappears, and the daily half-hour packages of actuality and news on weekdays. Broadcasts on shortwave, medium wave and satellite will continue until further notice, especially with repeat consignments from Eko program (Lunch echo in the afternoons, Daily Echo 17:45 LT in the evening and night).

R. Sweden B09 FULL sked can be found here
<http://www.sr.se/cgi-bin/international/artikel.asp?Artikel=3144955>
(all the services)
(Alexey Zinevich-BLR, dxld Oct 8)

2200-2230 5850 (140-240 degr)

Sunday

1500-1530 9360 (125 degr)

1645-1700 5865 (140-240 degr)

1800-1830 7465 (125 degr)

1900-1930 5865 (140-240 degr). 7465 (235 degr)

2000-2030 5850 (140-240 degr). 9490 (320 degr) via Madagascar

2100-2130 7425 (275 degr) via Madagascar

2200-2230 5850 (140-240 degr)

Listeners in Europe and the Middle East can hear many Asian Broadcasting in 40-120 degr. Listeners in the Canary Islands can try the 140-240 degr and Madagascar Transmission of 320 degr.

Medium wave 1179 kHz (254mb). Daily broadcasts in Swedish: 0455-0700, 1645-1715, 1800-1830 (Sundays SR P4 sports), 1900-1930, 2100-2200, 2200-2230 LT.

Best listening during the dark part of the day in Northern and Central Europe and the UK and Ireland.

Asia

1200-1230 9380 (40 degr)

1300-1330 11600 (55 degr). 11550 (95 degr)

1400-1430 9400 (85 degr)

1500-1530 9400 (100 degr)

0200-0230 11550 (50 degr) through Madagascar, South Asia

Broadcasts in 80-100 degr to Asia in many cases can be heard in the Middle East.

North America

0200-0230 6010 (240 degr) via Sackville

0300-0330 6010 (268 degr) via Sackville

UKRAINE - R Ukraine Int. Winter B09 Tent. Broadcasting Schedule (25 Oct. 2009 - 28 March 2010)

Time UTC; Frequency; Transmitter Site; Power; Azimuth; Target Area

0000-0500;	7440;	Lviv;	600;	303;	Northeastern America
0100-0600;	5830;	Kharkiv;	100;	055;	Russia
0600-0900;	7440;	Kharkiv;	100;	290;	Western Europe
0900-1400;	9950;	Kharkiv;	100;	277;	Western Europe
1400-1800;	5830;	Kharkiv;	100;	055;	Russia
1800-2100;	7510;	Kharkiv;	100;	290;	Western Europe
2100-0100;	5830;	Kharkiv;	100;	290;	Western Europe

Transmission schedules in various languages are as follows:

ENGLISH (one hour long):

2000 on 7510 kHz
2200 on 5830 kHz
0100 + 0400 on 7440 kHz
0600 on 7440 kHz
1000 + 1200 on 9950 kHz

GERMAN (one hour long):

1800 on 7510 kHz
2100 + 0000 on 5830 kHz

UKRAINIAN programmes are transmitted on all frequencies and at all times except for the time reserved for English and German programmes, as shown above.

Romanian (half an hour long): 1800, 2030 & 2200 on 657 kHz (via Chernivtsi 25 kW). NOTE: This schedule is subject to changes. (Alexander Egorov, Kiev, Ukraine / "MEDIA_DX" via RusDX 11 Oct via WOR 1482, DXLD)

USA - WBOH to close shortwave station. I just spoke to Tabitha Hunter of WBOH shortwave station in Newport, North Carolina. She confirms that WBOH, currently broadcasting on 5920 kHz, will close their shortwave service at the end of the A09 schedule period. No reasons were indicated, only that they will leave the air. Their sister station WTJC, will continue on 9370 kHz on a 24 hour schedule for the B09 session. (Gayle Van Horn W4GVH, Monitoring Times Frequency Manager Shortwave Central blog: <<http://mt-shortwave.blogspot.com/>> (wwdxc BC-DX TopNews Oct 6)

11520, WEWN in English at 0624 Oct 11, axually propagating and strong enough to bring along with it the dirty spurs 10 kHz above and below, bothering WYFR on 11530 and same sound on 11510 with BFO on. 11520 is currently scheduled 0000-0900 to Africa.

WEWN, 12160 in English, Oct 12 at 1447 with heavy CODAR QRM, worst I have heard it on a major SWBC station. Must have been at least two CODARS mixed in, and hard to believe 40 watts could do that to 250 kW, which is the power FCC says WEWN is now running. Catholix vs CODAR! At this time at least weak CODAR swishes could be heard all the way between 12100 and 12330 (gh, DXLD)

U S A [non] - Frequency changes of Radio Liberty:

0000-0130	NF	7490	CLN	250	kW	/	299	deg,	additional Farsi Radio Farda

URUGUAY - 6125.000 SODRE, 0921, thanks Bryan Clark tip. Very weak, with Spanish talk by man, one mention of "Montevideo" but I don't know if it was in tandem with an ID. Into nice ballads. Readable on brief peaks but mainly in the mush. Had a carrier here day prior but no audio. One to watch as the freq is clear here. Haven't logged anything from Uruguay in probably over 25-years (at which point they were also QSL'ed).
(David Sharp-NSW-AUS, dxld Oct 8)

VIETNAM - Additional two new frequencies of Voice of Vietnam HS-1:

2250-1200 NF 7435 Hanoi 050 kW non-dir in Vietnamese

2150-1500 NF 9635 Hanoi 050 kW non-dir in Vietnamese

(R BULGARIA DX MIX News, Oct 1)

ZANZIBAR - **TANZANIA** - **ZANZIBAR**, 11735, 1715-, Radio Tanzania-Zanzibar, Oct 11. Someone has to give up this frequency between 1700 and 1800. A real pile up between the excellent and powerful modulation from R Romania International and Zanzibar, both cochannel during this hour, and both at very good levels. RRI is in English, while Zanzibar is in ?Swahili? Mailbag from RRI at 1737. On recheck at 1810, Zanzibar was in the clear, but not in English (perhaps this is Mo-Fr only?) (Walter Salmani, Masset, QCI, BC, dxldy via DXLD)

In B-09, hardly anyone plans to use 11735 during Zanzibar hours; I think RRI doesn't run 11735 in B-seasons anyway, but there will still be the Brasilian (gh, DXLD) [past 20h , we]

Editor's info desk was closed on October 17th, 2009, at 1200 UTC.

ADXB SPECIAL QSL in cooperation with Radio Slovakia International

Dear Listeners,

Together with Radio Slovakia International, the Austrian DX Board (ADXB) is sponsoring an initiative for a special QSL card for correct reception reports between 1 November-2009 and 31 January 2010.

This is part of the celebrations on the occasion of the 40th anniversary of ADXB, the only Austrian DX club.

The special QSL card may be earned under the following conditions:

- Irrespective of club affiliation, any correct reception report about a transmission of Radio Slovakia International between 1 November-2009 and 31 January 2010 will be honoured with a special QSL card.
- Only ONE special QSL card will be issued per operating frequency.
- Any reports that do not comply with these conditions shall be verified with a standard card from Radio Slovakia International (RSI), and shall not count towards the statistics of the ADXB sponsored initiative.
- The reception report must be submitted via the following address: ADXB, P.O.B. 1000, A-1081 VIENNA, Austria.
- All six language services of Radio Slovakia International shall take part in the initiative. These are: Slovak, German, Russian, English, French, and Spanish.
- The handling fee is 1 IRC, 1 USD or 1 EUR.

The QSL cards will be sent directly from Bratislava. Please check the websites of ADXB-OE <<http://www.adxb.at>> and Radio Slovakia International <<http://www.rozhlas.sk/inetportal/rsi>> for the current transmission schedule. Information is also available by snail mail.

All transmissions originate from the Slovaj short wave centre at Rimavska Sobota.

If you have any further questions, please contact ADXB, P.O.B. 1000, A-1081 VIENNA, Austria, or use the following e-mail address <adxb.suess@aon.at> in German, English, French, Italian or Spanish.

Have fun and lots of success!

Harald Süss

Thanks a lot to our club members for your contributions:

AB : Ashok K. Bose, Mississauga, Ontario, Canada. Grundig Satellit 800 with 10 metres inverted Vee long wire antenna

MF : Michael Frese, Osnabrueck, Germany. Grundig Yachtboy 400 with telescopic aerial.

RAD : Richard A. D'Angelo, Wyomissing, PA, USA. Ten-Tec RX-340, Drake R-8B, Eton E1, Lowe HF-150 with Alpha Delta DX Sloper, Datong FL3.

Here are the loggings from Richard A. D'Angelo of Wyomissing, Pennsylvania, USA:

- 3200 SWAZILAND, Trans World Radio – Manzini, 0402-0420 Sep 3, German language program with religious instrumental music, choir vocals and religious talks by a man announcer. Fair with //4775 fair to good.
- 3255 SOUTH AFRICA, BBC World Service – Meyerton, 0349-0406 Sep 3, features about Africa, program previews at 0359 followed by 4+1 time pips, ID and news at 0400. Fair.
- 3345 SOUTH AFRICA, Channel Africa, 0356-0410 Sep 16, group tribal vocals to 5+1 time pips at 0400 followed by ID and news in English. Poor to fair.
- 3925 JAPAN, Radio Nikkei – 1, 1051-1116 Sep 12, Japanese vocals with talk by a woman in Japanese. News after time pips at 1100. Fair with //6055 poor and 9595 fair until 9600 opened up swamping channel.
- 4770 NIGERIA, Radio Nigeria – Kaduna, 0446-0504 Sep 23, vocals with a man announcer barely audible. 0500 ID into news in English at thankful peak. Generally quite poor alternating between under and over the noise floor.
- 4775 SWAZILAND , Trans World Radio – Manzini, 0452-0511 Sep 10, man announcer preaching in English language followed by choir vocals at 0455 as program ended. Easy listening music until station ID by a man at 0459. Choir vocals at 0500. Fair.
- 4790 PERU, Radio Vision, 0444-0510 Aug 29, man in Spanish preaching to crowd. Another man with rustic song. Return to man preacher alternating talk with a girl. Fair to good signal but somewhat noisy and fading.
- 4800 MEXICO, XERTA - Radio Transcontinental America (presumed), 0450-0514 Sep 12, man with talk in Spanish, possible ID at 0500 followed by music and more talk. Very poor with heavy QRM from CODAR.
- 4828 ZIMBABWE, Radio Zimbabwe, 0418-0438 Sep 17, lively vocal group but as song ended and perhaps voice began, the modulation fell apart. Fair signal with some CODAR QRM prior to the entire transmission falling apart.
- 4845.2 BRAZIL, Radio Cultura Ondas Tropicais, 2356-0036 Aug 27, futbol coverage in Portuguese by man with jingle ID noted over game at 0000. Poor to fair.
- 4865 BRAZIL, Radio Alvorada – Londrina, 0224-0309 Oct 4, religious program with man talking in Portuguese, soft vocals, more talks. End of program at 0300 followed by a man with ID into new program. Fair.

- 4960 SAO TOME, Voice of America – Pinheira, *0258-0335 Sep 2, open carrier followed by ID and Yankee Doodle. Opened at 0300 with ID and news in English read by a woman announcer. Poor.
- 4965 ZAMBIA, CVC Christian Vision, 0256-0405 Sep 12, Christian pop music to 0300 ID followed by English religious program. Another ID at 0400 followed by news. Poor with noisy conditions.
- 4985 BRAZIL, Radio Brazil Central, 0313-0344 Oct 8, religious group vocals followed by a man preacher in Portugese. More music around 0327 until another man spoke at length. Fair.
- 5010 MADAGASCAR, Radio Madagasikara, 0246-0314 Sep 25, noted on early with soft vocals until 0259 when man and woman announcers in Malagasy gave ID and announcements. More music followed at 0302. Fair.
- 5975 ENGLAND, Radio Japan via Rampisham, 0503-0530* Sep 26, English service with a woman announcer providing the news followed by several IDs and two men and a woman hosting a musical features program. Fair.
- 6025 DOMINICAN REPUBLIC, Radio Amanecer, 0251-0307* Sep 28, soft inspirational music to 0302 when a man spoke in Spanish, ID, prayer and possible closedown announcement before plug pulled. Poor.
- 6030 ETHIOPIA, Radio Oromia (presumed), 0353-0420 fade out Sep 28, woman with Horn of Africa vocals, flutes and group singing. At 0400 woman announcer in presumed Oromo language talked (news?) with brief music segment at 0411. Poor with buzzing noise. Signal was stronger than last week but much noisier tonight.
- 6030 ETHIOPIA, Radio Oromia (tentative), 0358-0422 Sep 21, apparent opening with woman announcer in UNID language (presumably local Oromo language if them) followed by news at 0400. A couple of selections of male local vocals at 0411. Very poor but no Marti/jammer made this possible. Another station beginning to build around tune out (Canadian?) as this seemed to fade out.
- 6065 GERMANY, Adventist World Radio via Wertachtal, 0314-0330* Aug 21, Horn of Africa music followed by a man preaching in presumed Tigrinya language. Man and woman with ID and closedown announcements over HoA vocals. Instrumental music from 0329 until carrier was terminated. Fair.
- 6090 AUSTRIA, Adventist World Radio via Moosbrunn, 0405-0426* Sep 12, religious program in listed Farsi language with choir vocals. Id by woman announcer at closedown. Fair to good.
- 6090 BRAZIL, Radio Bandeirantes, 0250-0310 Sep 8, audible with Anguilla off the air with man and woman with Portuguese talks, ID at 0300 followed by music fanfare and another man hosting a pop music program. Fair.
- 6090 ETHIOPIA, Voice of Amhara State Radio, 0316-0342 Aug 26, Horn of Africa vocals under University Network, Anguilla. Man and woman talking in presumed Amharic language. Music fanfare at 0330 followed by news. More features with some HoA musical selections. Generally quite poor.
- 6110 ETHIOPIA, Radio Fana, 0321-0410 Sep 18, non-stop Horn of Africa music to 0328 Amharic talk and ID by a man announcer. More vocals until feature talk item commenced at 0342. ID and news at 0400. Fair.
- 6110 ETHIOPIA, Radio Fana, *0257-0320 Aug 20, IS followed by a woman announcer with ID/opening announcement and a man with news in Amharic language. Poor to fair.
- 6155.2 BOLIVIA, Radio Fides, 0158-0218* Aug 28, two fast-talking men in Spanish with coverage of futbol match with a very excitable man yelling "Goal" at 0212. End of game at 0215 followed by music bridge, man with ID and frequency announcements prior to carrier being cut. Poor with deep fades.
- 6160.9 CANADA, CKZN – Newfoundland, 0138-0209 Sep 2, talk show program with a man announcer interviewing Carol Burnett. CNC news at 0200. Poor in noisy conditions with Radio Netherlands splatter from 0158.
- 6297.1 CLANDESTINE (Western Sahara), Radio Nacional de la R.A.S.D., 2346-0002* Sep 13, non-stop pop music with man announcer giving ID and closedown at 2000 followed by orchestra national anthem. Poor to fair.
- 6973 ISRAEL, Galei Zahal, 0112-0135 Sep 2, program of oldies including Beach Boys, Beatles, Rolling Stones and Peter, Paul and Mary. ID by a woman announcer at 0132 followed by brief Hebrew talk. Fair.
- 7165 ETHIOPIA, Voice of Peace and Democracy, *0355-0432* Aug 21, open carrier with instrumental music kicking in at 0356. Periodic IDs by a man as music continued. Opened at 0400 with ID and frequency announcement followed by drums and another man with news. After news a mixture of Horn of Africa music and talks. Fair.
- 7165 ERITREA, Voice of the Broad Masses of Eritrea, *0356-0422 Oct 6, IS followed by opening at 0400 by a man announcer in local language, news before music program at 0411. Jammer seemed to find them around the time the music program began. Poor to fair until jammer covered channel.
- 7540 EGYPT, Radio Cairo, 0226-0315 Aug 27, English Service with features, Egyptian music and several IDs. Time pips and news headlines at 0300. Good signal and fairly good modulation.
- 7620 CHINA, China National Radio – 5, 1057-1109 Oct 4, instrumental music until 1100 when man and woman gave ID and announcements in Mandarin. News. Fair.
- 9740 SINGAPORE, BBC – Kranji, 1117-1140 Sep 30, World Service with news features to 1128 when a string of promotional announcements was heard, IDs and news at 1130. Fair.
- 9780 SRI LANKA, Voice of America via Iranawila, 0104-0123 Aug 28, woman with news in English followed by "VOA News" ID. Into World News Now program at 0105. Fair.
- 9955 USA, World Radio Network via WRMI, 2322-2345 Aug 20, featured Voice of Russia World Service, IDs for World Radio network followed by news from Kol Israel. Fair to good.
- 10320 USA HAWAII, Armed Forces Network – Pearl Harbor, 0136-0202 Sep 2, pop music program including Michael Jackson's "Beat It" hosted by a man with brief English talk. AP Radio News at 0156 followed by sports. ID at 0200 and more news followed by return of music programming. Poor to fair.
- 11500 MADAGASCAR, Radio Dabanga, 1657-1727* Sep 28, Arabic language talks, news and news features with several remote feeds, jingle IDs at 1714 and 1726. Man with ID and closedown prior to carrier being terminated. Fair. //13730 (Wertachtal, Germany) was poor to

fair.

- 11710.7 ARGENTINA, RAE, 0308-0331 Aug 19, French program with vocals until news at 0311 followed by several IDs. Classical piano music followed. Fair.
- 11715 USA, KJES, 1553-1600* Sep 12, repetitious chanting in Spanish followed by a woman with ID at 1600 in Spanish just before carrier was terminated. Good signal.
- 11730 GERMANY, Cheetah Radio via Wertachtal (tentative), 1602-1633 Sep 12, man and woman with long talk in English about wind power, nuclear power and the need to balance all interests. Apparent program ID and maybe even station ID but uneven reception made it impossible to confirm. Fair signal at peaks but very deep – 2 Ofades.
- 11795 ENGLAND, Radio Deutsche Welle via Rampisham, 1913-1932 Sep 13, English program featuring Newslink with features about Zimbabwe, African leaders protest about climate change with ID and change to German program at 1930. Fair to good.
- 11810 ASCENSION ISLANDS, BBC World Service, 1931-2004 Sep 13, ID followed by The Story of Africa featuring origin of Christianity in Africa. IDs and program previews at 1958 followed by 5+1 time pips at 2000, BBC World Service ID and Newshour. Fair.
- 11915 BRAZIL, Radio Gaucha, 2311-2334 Sep 27, man announcer with Portuguese talk, promos, IDs, sports highlights to time pips at 2330. Poor to fair.
- 12050 CLANDESTINE (Nigeria), Radio Biafra via Rampisham, 1904-1959* Sep 19, program of talks by two men featuring numerous IDs ("This is Radio Biafra, London"), phone calls and text messages from listeners. Fair with deep fades.
- 15275 THAILAND, Radio Thailand, *0000-0029* Sep 30, opening of English program, ID, news headlines followed by national news in detail. TC for local Bangkok time prior to newscast. Poor to fair but in the clear. ID at 0012 "You are listening to Radio Thailand news." Commercial announcements after news and again just before carrier terminated.
- 15275 THAILAND, Radio Thailand World Service, *0000-0029* Aug 22, sudden opening with ID ("This is Radio Thailand World Service broadcasting from Bangkok") over time pips and instrumental music. The news in English followed presented by a man. Tourist features, promotional announcements and ads were noted. Off suddenly at 0029; antenna beam change? Poor to fair.
- 15476 ANTARCTICA, LRA36 Radio Nacional, 1914-1941 Sep 24, woman with talk in Spanish followed by a couple of tangos. Poor with deep fades.
- 15560 PORTUGAL, RDP Internacional, 1356-1425 Aug 23, pop music to 1400 time pips, ID followed by the news in Portuguese presented by a man and woman. Talk features after the news. Good signal for this weekend broadcast.
- 15650 SLOVAKIA, Miraya FM, *1500-1530 Sep 13, man with news in English with multiple ID at 1510 followed by news headlines. After another ID into Arabic program with opening ID followed by news. Fair with some deep fades.
- 17745 PORTUGAL, Sudan Radio Service via Sines, 1544-1610 Sep 19, various discussions in Arabic to theme music at 1600, ID and more talks. Poor to fair signal but very deep fades making overall reception poor.

Dear Friends,

Welcome to the October edition of Logbook.

The autumn weather here has been colder than normal.

With many of the stations terminating their short wave broadcasts to North America and retaining the internet option only I decided to purchase an Internet Radio or a Web radio recently.

I bought a SANYO R 277 radio. This radio besides having a local FM tuner has the ability to access internet radio directly. The primary requirement for this radio is a broadband connection which can support streaming audio/video. A wireless router provides an additional facility which makes it a real wireless equipment very much like its predecessor although a RJ45 connector socket is also available for internet cable connection. For internet radio it connects to <<http://www.receivea.com>> and provides the ability to connect to as much as 17165 various stations in 198 different countries which are enlisted at that site. It has the facility to store eight favourite stations. Some of the stations on this list are located in very small islands which are a DXers dream to be able to listen to.

The hobby of listening to internet based radio would be growing in the days to come as broadband connections are made available to more parts of the world.

While DX-ing would continue to be the hobby of listening to distant stations on the air or ether, I think the time has come to recognise the hobby of listening to distant stations on the ethernet (world wide web) as something like EX-ing so as to differentiate it as regular DX-ing.

With this new media the broadcasting stations may adopt the Email only QSL/verification policy.

With best wishes until next month,

Ashok Kumar Bose
