WORLD RADIO TV HANDBOOK 2010

Prices for orders from WORLDWIDE DX CLUB ■ Preise bei Bestellung beim WORLDWIDE DX CLUB:

€ 30.00 or US\$36.00 until November 30th, 2009 - afterwards € 32.00 or US\$38.40.
Extra for air mail: € 10.20 or US\$12.20.

These prices include postage and packing. Delivery against advance payment by International Money Order, cheque in € drawn on a German bank (otherwise please add € 5.00 for bank charges), cheque in US\$ drawn on a US bank, cash in any convertible currency, Postal Money Order or transfer to our bank accounts: Raiffeisenbank Graevenwiesbach No. 100019984 (IBAN: DE75 5006 9345 0100 0199 84 - BIC/SWIFT-Code: GENODE51GWB) or ING/Netherlands No. 3822840 (IBAN: NL08 INGB 0003 8228 40 - BIC/SWIFT-Code: INGBNL2A).

Der obige Preis enthält Porto und Verpackung. Lieferung gegen Vorauszahlung durch Überweisung, Scheck in € (gezogen auf eine deutsche Bank, sonst € 5,00 zusätzlich für Bankgebühren), Postanweisung oder Bargeld. Konten: Raiffeisenbank Grävenwiesbach Nr. 100019984 [Bankleitzahl 500 693 45] und ING/Niederlande Nr. 3822840.

DX MAGAZINE is the monthly publication of WORLDWIDE DX CLUB, Postfach 12 14, D-61282 Bad Homburg, Germany.
Price for a single copy: € 1.30 or 2 International Reply Coupons (IRC's); annual subscription rate: € 15.60 or 16 IRC's.
Other currencies and air mail rates on request. Cover: Peter Pohle + Jürgen Kauer (KAVOP)

DX MAGAZINE No. 11

Vol. XLIV

November 2009

Hello again,

Welcome to another issue of our DX MAGAZINE. Unfortunately, we have not received any logs from our members this month. Therefore we have no LOGBOOK in this issue. Please do not forget to send your logs regularly either to our club headquarter or directly to OM Ashok Kumar Bose.

Please remember to order the new **WORLD RADIO TV HANDBOOK 2010** as soon as possible, since it is scheduled to be available here in Europe in mid of December, as reported in our last DX MAGAZINE. By the way: More information on this year's edition can be found on our web page: <<http://www.wdxc.de/archive/wrth2010.pdf>>.

Bitte denken Sie daran, daß das neue **WORLD RADIO TV HANDBOOK 2010** auch in diesem Jahr wieder Mitte Dezember erscheinen wird (s. DX MAGAZINE 10). Ihre Bestellung sollte daher spätestens Anfang Dezember bei uns vorliegen, wenn Sie bei der ersten Auslieferung dabeisein wollen.

The **A.I.R. Contest 2010 "Attilio Leoni"**, the annual Italian DX contest by Associazione Italiana Radioascolto, will take place from January 2nd to 10th, 2010. For full information, please write to: Bruno Pecolatto, AIR Contest Manager, Fermo Posta, I-10080 Ingria (TO), Italy, E-mail: <bpecolatto@libero.it>.

ITU has given its stamp of approval to an energy-efficient one-charger-fits-all new mobile phone solution. The announcement comes as ITU lobbies hard to have the essential role of information and communication technologies (ICTs) recognized in the draft Copenhagen Agreement as a key part of the solution towards mitigating climate change.

Every mobile phone user will benefit from the new Universal Charging Solution (UCS), which enables the same charger to be used for all future handsets, regardless of make and model. In addition to dramatically cutting the number of chargers produced, shipped and subsequently discarded as new models become available, the new standard will mean users worldwide will be able to charge their mobiles anywhere from any available charger, while also reducing the energy consumed while charging.

The new UCS standard was based on input from the GSMA, which predicts a 50 per cent reduction in standby energy consumption, elimination of 51,000 tonnes of redundant chargers, and a subsequent reduction of 13.6 million tonnes in greenhouse gas emissions each year.

Director of ITU's Telecommunication Standardization Bureau (TSB), Malcolm Johnson said: "This is a significant step in reducing the environmental impact of mobile charging, which also has the benefit of making mobile phone use more straightforward. Universal chargers are a commonsense solution that I look forward to seeing in other areas."

Standardization of the solution within ITU was completed by Study Group 5 - Environment and Climate Change, and will hasten broad adoption by industry. Based on the Micro-USB interface, UCS chargers will also include a 4-star or higher efficiency rating - up to three times more energy-efficient than an unrated charger.

(ITU Press office, October 2009)

And with this best wishes and good DX until next month from

A Life Dedicated to Shortwave Radio

by M. LeClair, Aug 20, 2009

The role of shortwave radio has been much debated by members of the U.S. international broadcasting community. Among those with a strong interest in the topic is George Woodard. I spoke with him about his life and experiences working with shortwave radio as both a manufacturer and an engineer for U.S.-sponsored broadcasts. Woodard started out with Continental Electronics in the early 1960s in the midst of the Cold War, when shortwave radio was on the rise as a means to provide an alternate news source for people in the closed Soviet Union. He'd been drawn to radio as a boy, attended Texas Tech and received a degree in electrical engineering in 1962. During his years with Continental, he helped develop many of the high-power shortwave transmitters that were an important part of radio and politics in that uneasy era of simmering conflict.

Years later, in 1985, Woodard left the manufacturer to become associate director for engineering for Radio Free Europe/ Radio Liberty and was promoted to VP of RFE/RL Engineering in 1987, just before the conclusion of the Cold War. After jamming of shortwave broadcasting by the Soviet government ceased in 1988, Radio Free Liberty reached a peak of nearly 35 million weekly listeners, bringing news about the West and democracy to the countries of the former Eastern Bloc.

[...] Why is shortwave still important and what should we be doing today to preserve it? That is a very good question that our leaders in Washington should instead be asking. The immediate preliminary answer is that it's not as important as it once was, though still very important. Our leaders in Washington have been unable to get beyond the first half of the above answer since 1989 and the collapse of Soviet-style communism. It is still very important.

Washington, driven by incompetent technocrats and bureaucrats at the IBB and the U.S. Department of State, who are experts at saying what they perceive people want to hear rather than the truth, has taken a wrong turn on shortwave broadcasting since about 1989. The result has been a kind of self-fulfilling prophecy. As we close down most shortwave broadcasting to parts of the world, it is no surprise that 20 years later we find fewer people are listening!

My advice is to pursue vigorously all new technological means to communicate accurate world news to the parts of the world that do not have that blessing of their own. Expand Internet, TV, local AM and FM, Wi-Fi and cell phone broadcasting, but do not significantly reduce shortwave. In many instances, as has been recently seen in Iran, Belarus, Georgia, Pakistan and other places, and chronically seen in parts of Russia, China and North Korea, increased shortwave capability is critical.

The cost of shortwave broadcasting is often brought up as a con/ALBn. Let me close with some perspective on that argument. The cost of operating a nominally large shortwave station is approximately \$15 million per year. Ten stations cost about \$150 million to operate annually. With modernization and a degree of automation, it could be reduced to approximately half that. If shortwave broadcasting could contribute to reducing our global military effort by just 1 percent, we, as a country, would still save approximately \$4.85 billion annually, assuming a \$500 billion annual military budget, not to mention the lives of American soldiers.

I think it would perhaps be wiser for the American government to spend the little money on shortwave to help keep us out of shooting wars. (rw_online, August 2009)

(HCA KNX, Oct 25)

AUSTRALIA [to Myanmar-Burma] - R Australia, the ABC's international radio broadcaster, has begun broadcasting to Burma. The Burmese language service began Monday morning with two news broadcasts. R Australia's Chief Executive, Hanh Tran, said Burma's elections next year and increased international attention on the military-led country prompted the decision to start the new radio service. "This is the first new language service for Radio Australia in more than 15 years," he said.

The broadcasts will be transmitted to Burma seven days a week on shortwave frequencies 12010 and 17665 kHz. More broadcasts will be added in the evening as the service grows.

<<http://australianetworknews.com/stories/200911/2737637.htm?desktop>>

(via Mike Terry-UK, BrDXC-UK ng Nov 9)

Tentative schedule, mixed English/Burmese:

2200-2400 daily As 12010/Dw 0000-0200 daily As 17665/Dw 1600-1700 AS 11980/Dw

2310 VL8A, Alice Springs NT, 1921-1938, 08 Nov, English, talks, ABC news at 1930; 15331; the worst signal of the lot.

2325 VL8T, Tennant Creek NT, 1919-1941, 08 Nov, cf. // 2310 VL8A; 15331.

2485 VL8K, Katherine NT, 1918-1940, 08 Nov, cf. // 2310 VL8A; 15331, but still a tiny better than 2325 VL8T or 2310 VL8A.

4835 VL8A, Alice Springs NT, 2131-2149, 07 Nov, ABC news, Saturday Night Show prgr;: 34332, rapidly deteriorating.

4910 VL9T, Tennant Creek NT, 2132-2148, 07 Nov, cf. // 4835 VL8A; 35332, rapidly deteriorating.

5025 VL8K, Katherine NT, 2133-2156, 07 Nov, cf. // 4835 or 4910; 34433, QRM de CUBA

These were all best via the 20 m T2FD or the K9AY, particularly VL8K as either antenna reduces the Cuban QRM.

6020 R. Australia, Shepp. VIC, 1012-1055, 08 Nov, Pidgin to PNG, reports, newscast, songs; 34433, but increasing co-ch. QRM.

BURKINA FASO - 3 Nov at 1745 noted Burkina back on 5030 after /Beng silent for a long time (Jari Savolainen, Kuusankoski, Finland, dxldyg via WOR 1485, DXLD)

Not only Mauritania, but Ouagadougou 5030 was also reactivated Nov 3, says Jari Savolainen, Finland, heard at 1745. This one is not so easy with powerful Rebelde next door. Nov 4 at 0628 there was /ALBtainly a carrier on 5030.0 and lo modulation amid Cuban splash. WRTH 2009 shows sked as 0530-0800 and 1700-2400, with daytime frequency 7230 0800-1700; is that reactivated too? (gh, DXLD)

(Dragan Lekic, Serbia, Nov 1, dxldyg via DXLD)

CZECH REP. - Radio Prague, the Czech international broadcasting service, may relinquish shortwave for the internet. The Czech Ministry of Foreign Affairs, which funds Radio Prague, wants the budget cut by 20%, says IDNES.cz (October 16). A Radio Prague spokesperson confirmed receiving a letter from the Ministry, with a suggested cut off date of January 7, 2010.

Several international broadcasters of modest means - nonetheless well respected - have abandoned short-wave broadcasting for other means. A few years ago Sw/F Radio International (SRI) dropped its short-wave services and morphed into Sw/Finfo on the Web. High transm/Fion cost and questions about listener impact were cited. (JMH)

DOMINICAN REPUBLIC - 6025.04, Radio Amanecer, 2340-2358, Oct 31, religious music. Spanish talk. Poor in noisy conditions. Covered by adjacent channel splatter at 2358. (Brian Alexander, PA, DX Listening Digest)
I checked the HFCC and Aoki frequency lists for the new season and 6025 should be clear in Europe 0000-0300 (Mike Barraclough, Nov World DX Club Contact via DXLD)

ECUADOR [and non] - German (including Lower German), at present 1800-1900 via Issoudun on 6140 and destroyed by DRM from Bolshakovo on 6145, will be replaced by 1700-1800 via Wertachtal on 3975 as of Nov 2. At the end of November the current transm/Fion contract with Media Broadcast ends; then German will as of Dec 1 be transmitted via Sitkunai 1630-1730 on 3955. The Russian programme on Sundays will move to 1530-1630 where it actually was supposed to be starting. This Russian broadcast is now again run by HCJB Global / New Life Radio after the HCJB office in Germany arranged this less expensive solution (as opposed to the former Rampisham transm/Fions). As of Nov 2 German 2300-2400 via Calera de Tango (Chile, for SAM) will move from 9865 to 9835. The new Sitkunai transm/Fions are remarkable in as far as this slot used to be reserved for Radio Racja, which still was supposed to return to shortwave and perhaps even mediumwave once new funds have been found. But apparently ... IRIB and HCJB will now occupy the Sitkunai transmitter throughout the day from 1430 to 2130 (Kai Ludwig, Germany, Oct 29, dxldyg via DXLD)

80 YEARS RADIO MOSCOW / VOICE OF RUSSIA

International airwaves first heard the call signal of Radio Moscow in October 1929. Those initial programmes from Moscow were in German. Soon after, there began broadcasts in French, and as of December 1929 – regular broadcasts in English.

Before the 1990s, within the Head Department for Broadcasts to the USA and Great Britain, there existed several independent sub-departments, which conducted broadcasts, respectively, to the USA and Canada, to Great Britain and Ireland, to Australia and New Zealand. In October 1978 the World Service in English was set up. Its first Editor-in-Chief was Gely Shakhov. The broadcasts were round-the-clock, thus, Radio Moscow received an opportunity to acquaint its listening audience in a majority of countries of the world with the latest events in the life of this country and abroad - something that immediately found a positive response with our listeners. In its very first year the World Service in English received letters from some Gely Shakhov, first World Service in English Editor-in-Chief⁸⁷ countries of the world.

Presently the World Service of the Voice of Russia broadcasts 24/7 to North America, Europe, South-East Asia, the Middle East, Africa, Australia and New Zealand, Central and South America.
