CHINA - 5050, Beibu Bay Radio (BBR), Nanning, at 1317-1321 UT on Dec 22, Chinese and English: ID: "Hi everyone. This is Beibu Bay Radio", about the "Kunqu Opera" film that won awards at the Monaco International Film Festival: "In the popular casino resort city of Monte Carlo, the 12th Monaco International Film Festival saw the Kunqu Opera film version of the literary classic "A Dream of Red Mansions" leave as its biggest winner, taking home three awards. The film which opened the Monaco International Film Festival, claimed three major awards, including Best Film, Best Costume Design and Best Movie Soundtrack. The movie is based on the novel "A Dream of Red Mansions", hailed as one of China's "Four Great Classical Novels". The best-known storyline from the piece involves the tragic love tale of Jia Baoyu and Lin Daiyu, a couple forced apart by Jia's family in a similar manner to Shakespeare's Romeo and Juliet," which was a direct audio feed from CCTV.

Kunqu Opera developed in the 14th Century during the Ming Dynasty and is one of the oldest forms of Chinese Opera.

INDIA - 13710 AIR Bangalore 500 kW powerhouse playing modern film pop music, noted around 1347 UT on S=9+20dB level in Nara Japan, but had a 9.8 kHz wideband signal, 13705 to 13715 kHz.

(wb, wwdxc BC-DX TopNews Dec 28)

INDIA / CHINA / KYRGYZ REP. - Heard only the Chinese stn on 4800 kHz, no AIR stn program at all, UTC-wise time last deep Jan 2nd European night. 4840 also not heard - AIR Mumbai, Maharashtra, - only US WWCR noted here.

Correction: on 4760, 4920, 4970, 5040 kHz, no ID's heard, latters are only probably guessed, too weak tiny signals noted in Germany.

4820v AIR Kolkata B, Pachim Banga program came late on air, noted around 0054 UT on 4819.994 kHz but lesser signal level, compared to odd frequency bcst of Kyrgyz Radio Bishkek on 4819.938 kHz footprint, and latter \\
stronger at 4010.033 kHz also from Bishkek, childrens singer chorus at 0043 UT, and open live concert with applause in between breaks at 0128 UT, announced classical lady singer from Russia, on Jan 2nd.

3rd station on this channel accompanied: but strongest signal on exact 4820 is Xizang Mongolian sce of Lhasa Tibet, China at 0047 UT.

4819.938 Kyrgyz Radio Bishkek

4819.994 AIR Kolkata

4820 Xizang Lhasa Tibet

4760.001 only peak lower threshold visible, AIR Port Blair, Brookshabad, Andaman Isl. at 0045 UT. Is my guess probably !

4800.002 CNR1 Mandarin from Geermu Golmud tx#916, nx at 0132 UT on Jan 2 at S=8, - but at 0217 UT on S=9+15dB much stronger peak.

4809.998 AIR Bhopal, Madhya Pradesh, Indian SoAsian singer of Bollywood like mx at 0046 UT on Jan 2nd, S=9+5dB in Germany at 0145 UT.

4850 even frequency of PBS Xinjiang from Urumqi in Kazakh language, nx at 0105 UT on Jan 2, and at 0203 UT on S=9+30dB powerhouse solid level.

4880.007 AIR Lucknow, Uttar Pradesh, at 0107 UT under threshold, but increased to fair S=7-8 at 0214 UT on Jan 2. Adjacent channel suffered by powerful UTE signal on 4874 to 4878 kHz.

Most difficult channel to devide each other, nearby adjacent – both only 3 Hertz distance apart.

4895.0 weaker tiny Mongolian Radio-2 from Murun-MNG, ... and

4894.997 kHz S=6 at 0215 UT on Jan 2, heard SoAsian music and Hindi reader, is most probably AIR Kurseong, Paschim Banga, India.

4905 even channel PBS Xizang from Lhasa, in Tibetan language at 0112 UT on Jan 2, proper solid S=9 Chinese modern pop singer.

4910.003 AIR Jaipur Rajasthan, weak tiny level at 0116 UT, but later at 0158 UT on Jan 2 much stronger then, at solid S=9+20dB level.

4920 surprise, both broadcaster are precise even frequency, PBS Xizang from Lhasa, in Tibetan language, and at 0117 UT on Jan 2 also AIR from Chennai, Tamil Nadu, in Hindi or Tamil language.

4970.016 odd frequency, peak visible under threshold at 0120 UT.

Most probably - but not sure - AIR Shillong, Mawgrong, from Meghalaya.

4979.989 Xinjiang PBS Urumqi in Uighur language, solid station signal at S=9+20dB strength, at 0125 UT on Jan 2.

5010.007 Solid S=9+15dB station, singer in fast Tamil language, AIR Thiruvananthapuram, Muttathura, Kerala, at 0130 UT on Jan 2.-

5040.002 Heard drums and singer mx, could be RHC French, or more likely probably AIR Jeypore, Odisha, weak S=8 and fluttery. 0135 UT on Jan 2.

5059.985 Xinjiang PBS Urumqi in Mandarin language, also "shrap, shrap" noisy UTE signal close-by at broadband 5049 to 5062 kHz, at 0144 UT on Jan 2nd.

Another peak visible on lower side of 4820 kHz, 100% \ also Kyrgyz Radio 4819.936 kHz footprint at 1828 UT, flute mx at 1836 UT. On S=8-9 level. (wb, wwdxc BC-DX TopNews Dec 24)

LIBERIA - 6050.005 ELWA, Monrovia, on 3 Jan at 0540 UT - back to back long Highlife vocals from 0540 UT tune in continuing until 0608 UT, followed by Christian programming. Moderate signal with Castro slop from 6060 kHz on the USB and low level annoying white noise on the LSB, presumably from Castro Marti jammer 20 kHz away making for tough listening.

Possible ID at 0630 kHz with definite mention of Liberia, long gospel song followed by a followed by poorly recorded live Church service. As hoped, rapid 0655 kHz sunrise at transmitter enhancement raising the S5-6 signal to a solid S8. Nice clear canned "This is Radio Station E-L-W-A" ID at 0702 UT then back to back Gospel songs by Israel Houghton, Micah Stampley, VaShawn Mitchell and more as signal started its slow fade after 0715 UT.

7120 Hargeisa Somalia never heard anymore in past weeks. Sent an e-mail request to Baldur Drobnica DJ6SI the other day, questioned whether it is necessary that the Chinese transmitter engineer has to fly-in from BBEF Beijing tx company to repair the defunct transmitter of Radio Hargeisa. SUDAN - 7200 Radio Umm Durman, Al-Aitahab. Dec 22, 2014 at 2102 UT. Caught after end of programming, transmitter off at 2103:51 UT. But carrier briefly on/off several times after, engineer apparently doing some work instead of going home to the hyenas.

Recheck Dec 23: carrier up just after 1930 UT, after departing 9505 kHz, on/off a few times for Arabic domestic channel I guess programming scheduled 1930-2100 UT. Audio not really worthy until 2030 UT and steadily growing quickly with Sudanese folk quasi Horn of Africa-ish vocals, definite Arabic female announcer 2033 UT, more nice vocals. Audio cut at 2100 UT, carrier still on when tuning out right after.

9505 Voice of Africa, Al-Aitahab, at 1825 UT on Dec 23, 2014. Carrier detected, presume prior to 1830-1930 UT Hausa. Audio finally showing from 1910 UT and rather quickly improvjust afterng, presumed Hausa, with nice almost Horn-ish of Africa traditional vocals from 1824 UT. Transmitter off about 1930:10 UT mid-song, up on 7200 kHz about 1930:35 UT with carrier on/off often initially for Radio Umm Durman Arabic, but no decent audio yet.

TANZANIA [ZANZIBAR] - 11735.000 ZBC Dole, on 2 Jan at 1942 UT – Quranic recitation at tune in, followed at 1945 UT by a long 10 minute traditional vocal, followed by a call and response that sounded very Quranic in intonation but had accompanying drums toward the end. 5+1 time pips at 1959 UT, followed by news in presumed Swahili. Good S6 signal but choppy modulation that doesn't appear to be propagation related.

U.S.A. - No more English to Asia from the VoA was noticed from January 01. That is in contrary to the told political efforts to counteract Chinese economical and strategic expansion plans. (we)

On 1 January 2015 KVOH introduced a new schedule. According to their website

<<http://kvoh.net/broadcast-schedule/>> ,

they now "worldcast" on Mondays to Fridays (US-days) in Spanish 1400-2000 UTC on 17775 kHz, and additionally in English and Spanish 0000-0500 UTC (Tu-Sa) on 9975 kHz. On weekends (US), KVOH continues to broadcast in English from 0230-0500 UTC (Su Mo) on 9975 kHz.

The new customers are already known to short waves listeners: Rick Wiles is already on WRMI Okeechobee and Dr. James Planck has since about 2002 promoted his own short wave station KIMF which did not yet materialize. Planck's International Missions Fellowship was also involved in HRMI Radio Misiones Internacionales, Comayagüela, which broadcast on short wave for some years beginning in 1996 until maybe 2011. It was irregularly heard, originally 5898 kHz, later 5010, and finally 3340 kHz. (Dr. Hansjoerg Biener)

Here in L.A., we are planning to expand our evening broadcasts on 9975 kHz to run 7 days per week from Jan 1st. Exact times and program line-up are still being finalized. Also, our newly acquired 100 kW transmitter for KVOH was moved into our transmitter building on Chatsworth Peak this past Wednesday (photos attached). We are now working to install it, and hope to have it on the air during January.

Re: Global 24 radio 9395? Just contacted WRMI. The reason for the poor propagation to the north is that there is work being done on the transmitter beaming in that direction that Global 24 has been using. For approximately the next two weeks, WRMI on 9395 kHz will be beamed south on another transmitter until work on their regular transmitter is completed. So, for those of us to the far north of Miami, we'll have to hope for some good "backscatter" propagation to hear Global 24 with any degree of comfort. (John Figliozzi-NY-USA, dxld Dec 17)

9395 - Global 24: for the rest of the year, at least, to be on WRMI-6, the 50 kW Wilkinson unit ex-Hialeah, and on a hi-takeoff-angle antenna beamed 181 degrees, all combining for useless reception in most of North America. Dec 17 at 0152 it's very poor to just barely audible. Meanwhile, 11825 BS is blasting in as usual.

VIETNAM - 9635.07 [9635.783 kHz footprint at 0455 UT on Dec 27] Voice of Vietnam 1, Hanoi Son Tay; seemingly back on frequency from 9635.8 kHz, Woman in Vietnamese 1435z UT Dec 16 with national news and announcements. Co-channel TAIWAN Sound of Hope, both about the same level. I have been spending some time on Global Tuners lately. It is amazing what one can hear!
(Steven Wiseblood, AB5GP, using RX: VR2HF's *Hong Kong DX Global Tuner*, dxld Dec 17)

12019.073 odd frequency, but otherwise clear audio signal of Voice of Vietnam's Japanese language service from big Son Tay site. Signal S=9+15dB in Tokyo Japan remote SDR unit at 14.07 UT Dec 28.

9635.781 Voice of Vietnam's domestic Vietnamese service, S=7-8 strength at 14.38 UT on Dec 28. Two mens talk.

7284.951 Voice of Vietnam's English service registered at 15.08 UT on Dec 28 via Hanoi suburb Me Tri site of USSR aid era, S=9 signal. Hit heavily by CRI Urdu service from Kashgar bcst center in China.

ZAMBIA - Voice of Hope acquires Zambia SW site. Last week, the parent organization of Voice of Hope completed a transaction to purchase the former Christian Vision shortwave transmission site near Lusaka, Zambia.

The facility includes 150 acres of land, 12 buildings, 2 x Continental 100 kW transmitters, 2 high-gain TCI antennas, and a 750 kVA standby generator. Although the equipment is transmission-ready, there are still some logistical details to be worked out, such as local staffing, license transfer, studio-to-transmitter link, selection of frequencies, etc. We will be working to return the station to the air over the next few months, hopefully by Easter next year. A press release is attached, which will be distributed through the PR Newswire this coming Friday.

5915.000 ZNBC Radio 1, Lusaka, on 3 Jan at *0240 UT - Call of the Fish Eagle IS until choral NA at 0250 UT, traditional music with call and response with mention of Zambia, local pop song with male in vernacular talking over the song. More talk and music, nice "Zambia National Broadcasting" mention at 0308 UT. Wedged between RRI and WHRI until Romania left 5910 kHz at 0257 UT leaving the LSB clear for ECSS.

Deutsche Welle partners with dpa on a new multimedia foreign language service

The Federal Foreign Office and DW have agreed upon establishing a new multimedia foreign language service to promote the media coverage of Germany abroad. dpa will be contributing to the content provided by the service.

The new multimedia foreign language service, funded by the Federal Foreign Office with an annual fixed budget, shall distribute daily news and background information from a German perspective to media partners and end consumers throughout the world. Focusing on news from Germany and on topics of interest to the German

public, the content shall be produced in German, English, Spanish and Arabic, including a variety of regionally relevant topics.

In stressing the importance of this new cooperation, German Foreign Minister Frank-Walter Steinmeier says: "The rapid development in the world of communication has shown how important the way in which and at what speed news shall be distributed. Online and social media are playing an ever-greater role, e.g. 'breaking news' often spreads faster now on Twitter than bulletins produced by traditional news agencies. For a news item to reach its recipient, it does not only have to be sent over a medium used by, but also in a language that is understood by the target group. And it shall contain up-to-date information that arouses interest as well."

"To keep pace with this development, we have consciously decided to promote the multimedia foreign language service of Deutsche Welle and dpa. The new service offers the opportunity to distribute up-to-date and high-quality news from and about Germany, and thus to further project a positive image of Germany abroad," Federal Foreign Minister Steinmeier points out.

DW Director General Peter Limburg has welcomed the support from the Federal Foreign Office: "The service helps provide a cross-media context to the political and economic weight of Germany in the world. Cultural understanding is a key to long-lasting partnerships. We want to promote this understanding through an honest, independent view of Germany."

The new service targets traditional media outlets as well as the users of multimedia online portals. It combines digital, interactive and traditional formats and is tailored to the specific needs of the respective partners. Deutsche Welle is intensifying its cooperation with dpa by jointly providing the multimedia foreign language service. It produces selected reports from the news agency in the four languages of the new service, which will be available free of charge.

"dpa reporters and correspondents report from around 60 locations in Germany as well as, from a German perspective, on all relevant news topics out of more than 100 other cities worldwide," says dpa President and CEO Michael Segbers. "We are delighted that the new foreign language service is backed by our independent journalism as well. We aim to contribute towards informing people all over the world about the German viewpoints on important regional and global developments."

The whole package will be distributed worldwide by Deutsche Welle. "Our key to success is DW's global network and independent journalism, paired with the experiences and perspectives of dpa," says Limbourg.

The German Press Agency dpa

The German Press Agency dpa is a trusted, accurate and independent provider of news with digital and multimedia content to power the media at home and abroad. dpa's customers benefit from the extensive global network of correspondents and editors maintained by Germany's leading newswire. Print media, radio stations, online and mobile communication providers in more than 100 countries rely on this journalistic excellence round the clock. dpa's clients include parliaments, governmental and non-governmental organizations as well as businesses and public relations agencies. They all derive news content from the wide range of products and services provided by the dpa group of companies.

Deutsche Welle

Deutsche Welle (DW) is Germany's international broadcaster. It offers multimedia journalistic content in 30 languages. Moreover, DW Akademie provides media training for media professionals in developing and transition countries.

Dear Friends,

Again this month we have received many contributions from you and we are very happy because we can keep alive these pages that I hope I can write continuously in future. I take the opportunity to wish my best for this year 2015. Please remember that the next deadline of contribution is February 14th, 2015.
