BRAZIL - From Lenildo da Silva, No Mundo do Dexismo, via Daniel Wylylans, HCDX on Sep 26 [my improved Google translation]:

"Apparently, Radio Bandeirantes of Sao Paulo, ended its SW transmissions, since it is no longer captured on 9645 and 6090 kHz; transmission on 11925 kHz had been suppressed for several months. Affected by a financial crisis, the Sao Paulo station began a wave of layoffs in its workforce in August, not even sparing established names from the sports department. The obstructive cuts, which have reached other parts of the Bandeirantes Group, seem to have come now to SW transmissions. We hope, however, that the traditional broadcaster of journalism and sport, can overcome this crisis and re-operate on SW soon". (gh, via dswci DXW Oct 14)

INDIA - 4760.00 AIR Port Blair, -1700* UT on Oct 8, I have been monitoring this frequency for a while both in the afternoon and at night here. Weekdays sign off at ~1700* (1700:45) and Sa/Su at ~1730* UT. The signal at 1730 UT is remarkably weaker than at 2400 UT. The ID heard on Oct 8 at sign off sounded like "Akashvani Radio Port Blair". Also heard at *2356 UT on Oct 8, the signal here has improved day by day. ID is given after the same piece of music each day at about 2356 UT. ID as "Akashvani kabli Port Blair Kendra Hey" or as a plain "Akashvani Port Blair Kendra Hey". The ID also repeated just before 2400 UT. On Oct 9 no signal noticed at this time, but the station was heard at sign off 1700* UT. (Thomas Nilsson-SWE, dswci DXW Oct 14)

SOLOMON ISLANDS - 5020.0, SIBC - Voice of the Nation, Honiara, 0758-0910 UT on Oct 3, heard from Perseus site in Edmonton AB at virtually local quality - this with 20 db attenuation set to minimize Radio Rebelde on 5025 kHz which usually overpowers SIBC. Tonight, however, SIBC was overpowering Cuba with armchair listening - the best I have ever heard SIBC. Many interesting programs in Tok Pisin and English, 4+4444 with gradual improvement over time. (Bruce W. Churchill-CA-USA, DXplorer via dswci DXW Oct 14)

Also heard in Sweden at 1930-2000 UT on Oct 3, with quite good signal and music. Heard several days at this time lately. Usually gone around 2000. (Thomas Nilsson-SWE, dswci DXW Oct 14)
