RAE- RADIODIFUSION ARGENTINA AL EXTERIOR becomes RAE- ARGENTINA TO THE WORLD

A new stage begins in the history of RAE, that will transform from RAE-RADIODIFUSION ARGENTINA AL EXTERIOR to RAE- ARGENTINA TO THE WORLD, updating the identity of our international signal.

Among the news to share, there's the decision to maintain presence on the shortwave frequencies of 15345 and 11710 KHZ, which are broadcast from the transmission plant located in General Pacheco. Currently, we're facing some technical problems with regard to modulation, but we'll face the challenge of fixing this and increase our presence on the shortwaves.

We'll keep on transmitting in eight languages, now with a homogenous programming, that will be coherent with regard to contents, with the specific contribution of each language considering particular characteristics. RAE's new stage will feature programs Mondays through Mondays.

Each language will have a daily 55-minute broadcast on the shortwaves, with one daily re-run. In addition, the daily show will be available on the new website of RAE, where the program will be on streaming 24 hours a day.

Specific applications for RAE will be developed for mobile devices and on a second stage, podcasts and RAE content broadcast by local stations in other countries. The most recent shows will also be available to download on demand. Another innovation are the six channels of Argentine music available on RAE's website, organized by genre: Tango, Folk, Rock, Pop, Jazz and Classical, that will play music 24 hours, with playlist in constant expansion and a radio sound, that's to say, with a presentation of songs, that will provide additional data about the tunes.

This way, listeners will be able to enjoy at any time of the day the best works by artists such as Charly Garcia, Yupanqui, Piazzolla, Sandro, Malosetti, La Camerata Bariloche, announced in various languages, with a radio format. This is part of the new design of what we call DIGITAL RAE.

The daily programs of RAE cover various topics developed jointly by the new production team of RAE as well as the language teams. After the news bulletin, with the inclusion of music and bite-sized features about various topics.

In addition, we'll now have a new interval ID signal.

The schedule for our station in all languages now will be:

MONDAY: Our Football / Argentine Tango

TUESDAY: Argentines Without Borders / La Folklórica

WEDNESDAY: The Conversation / Argentine Roads

THURSDAYS: Welcome / Science and Technology

FRIDAYS: Multi-Sports Center / Histories in Common

On Saturdays, a SUMMARY OF THE WEEK will be broadcast, followed by ACTUALIDAD DX.COM.AR, the new segment dedicated to DXing, radio, media and information technology.

This program will be produced and presented in Spanish by ARNALDO SLAEN and RAE'S director, LUIS MARIA BARASSI, featuring news about radio and technologies applied to communication, plus audio files, interviews, etcetera. The program will have an average duration of 25-30 minutes.

This format will be broadcast also on various languages and will not only be available on RAE's website, but also in the spaces dedicated to DX-related content on the web.

Finally, Sundays will be the day of program THE BRIDGE, a weekly space focused on the contact with listeners, music and interviews. The show will also pay homage to classics of international broadcasting such as the STATION OF JOY and similar programs that left their mark in the history of international radio.

The support of all DXing colleagues, radio ham enthusiasts and fans of the Short Waves is paramount, in order to spread their messages, emphasize the importance of the shortwaves as well as the need to increase the presence on various bands, complementing digital content.

A new stage begins for RAE, ARGENTINA TO THE WORLD, with many ideas and challenges ahead, a phase in which the participation of all sectors linked to our field will be key for our growth and for the steps that will follow.

It's important to underline that after many years of being practically ignored by various administrations, the new stage of Radio Nacional, under director Ana Gerschenson, and Deputy Director Pablo Ciarliero, includes a project for RAE, with the participation of the excellent and historic professionals of RAE, plus the arrival of experts in digital content and with the incorporation of Adrián Korol, who, beyond his renown for his work in Radio and TV, is a passionate DXer and Radio Ham fan.

Over the next few days, we'll release the definitive schedule, with timetables, frequencies and targeted zones for all languages.

The launch of this new phase will be next October 5 at 7PM, at the Auditorium of Radio Nacional Buenos Aires. We let you know, as well, that next week a definitive timetable will be released. It's clear that all ideas, proposals and specially the dissemination to this news will be greatly appreciated.

**ASCENSION ISL** - 5925 new frequency {since July 29} of BBC English sce "ENAFE\_S" via Ascension island in 5-6 UT slot, ex 7445 kHz. Not included in Aoki Nagoya Japan list yet. (wb df5sx, wwdxc BC-DX TopNews Sept 17)

**AUSTRALIA** - The ABC NORTHERN TERRITORY SHORTWAVE SERVICE is back on air this morning (Sept 12). Nothing was heard at 2145 UT. But three outlets have been noted around 2325 UT. So they may have been switched on after 2300 UT. Noted are 4835 kHz Alice Springs, 4910 kHz Tennant Creek and 5025 kHz Katherine. All are weak signals here, which is normal given that it is 9:25 am local now. 4835 kHz is the strongest here (as always). So, I suspect we will probably hear 2325 and 2485 kHz this evening.

I noted the switchover from daytime to nighttime frequencies last night {Sept 13 / 14}. The service is scheduled to change daily at 0830 UT. At 0829 UT, the Tennant Creek switch was made from 4910 to 2325 kHz. At 0832 UT, the Katherine switch from 5025 to 2485 kHz. Good reception was noted from both the 120mb outlets.

How long this service continues remains to be seen. We can expect that the required ABC budget cuts may see this outback service come under increasing pressure to be abandoned. It is, however, still used by remote listeners within the interior of the country, and by travellers who tour through the outback.

THE BRANDON Antennas.

During July and August, Jan and I went on a road trip through NSW and QLD. We travelled just under 10,000km - and had a wonderful time. We also travelled through the little township of Brandon, QLD. I checked out the former RA site while we were there.

Both SW antennas are still up in the air and appear to be maintained, even though they are no longer in use. I suppose it's in Broadcast Australia's best interests to have them at the ready! Anyway, I took a bunch of photos and have a little post now up on the Mount Evelyn DX Report. My thanks to Craig Seager for his additional help with background information. **LAOS** - 6130 Lao National Radio, at 1418-1500 UT on Sept 26. Heavy adjacent QRM; only able to make out bits and pieces; 1418-1426 UT in Chinese; 1426-1430 UT nice indigenous music/singing; 1430 UT usual theme music; English segment 1430-1458 UT; able to make out some of their usual ID - "...This is the Lao National Radio, broadcasting ... from Vientiane capital, the Lao People's Democratic Republic ... Our news in English program broadcasts at 2130 to 2200 hours local time daily, which is transmitted on AM 567 kHz. on medium wave and on AM 6130 kHz on shortwave and ..."; items about production of crops and the national agricultural department helping people rise above the poverty level, also item on World Health Organization in Geneva, etc.; additional IDs at 1445 & 1458 UT.

At 1458 UT into French language. The signal strength was decent, but tough copying them through the adjacent QRM, but still I was very pleased to be able to hear LNR even with this poor reception. The best reception I had was of the indigenous music/singing. (Ron Howard-CA-USA, via wwdxc BC-DX TopNews Sept 26)

**MONGOLIA** - 12035, Voice of Mongolia via Ulaanbaatar, Mongolia from 0859 to 0908 UT on September 25 in English. My recording starts out with the carrier but no program audio yet. The interval tune begins, a male announces the name of the radio station. A female announcer comes on, welcoming people to the radio station. Frequency and broadcast schedule information is given out along with your website information. Another female announcer comes on and welcomes people to a New Edition of The Sunday Music Program. That female announcer reads a few news stories before a Mongolian song plays. I would give this broadcast a SINPO rating of 44344. Overall this broadcast was good because the signal was strong and with no noise or interference, just moderate fading and slightly choppy propagation.

**MYANMAR** - 7200 kHz even frequency from Yegu / Yangon Burma. At 1350z S=9+15dB signal noted in remote unit at New Delhi, India. (intruderalert\_iaru-r1.org Sept 30)

5914.990 Myanmar Radio, Naypyidaw, heard at 1210 UT on Sept 30, S=9or -69dBm signal, noted in remote SDR unit at New Delhi, India.

5985 even frequency MRNS Yangon Yegu site, 1220 UT on Sept 30. But in channel background heard some like 'ditter jamming' audio sound peaked at 1025 and 2050 Hertz either sideband. S=7 fair signal noted in remote SDR unit at New Delhi, India. (wb df5sx, wwdxc BC-DX TopNews Sept 30)

Myanmar Radio is not only relaying NHK Radio Japan, but also VoA. It is in the same part of the English program (1530-1600). Wed VoA, Thu and Fr from 1540 NHK. Monitored regularly by Ron Howard, California. (via wb)

5985, Radio Myanmar, 1515 UT Sept 21 in Burmese. Nice local songs and soft talking announcer. 1530 their usual signature tune and announcement for the English broadcast beginning with the news headlines. The female announcer with the ID/Sign on announcement was very hard to understand with her soft voice and accent. The male news reader was much clearer. There was also a newscast from VoA with many Washington Post headlines. Easy copy there. Very Good signal

Weak to fair signal of Myanmar Radio, Sept 27 1530-1700 on 5985\*YAN 025 kW / 176 deg to SEAs English

(DXMIX 971)

**NIGERIA** - Re 6089.853 Radio Nigeria Kaduna back? - yes! Just now, 1835 UT on Sept 1st, a relatively weak signal in Twente with somewhat dull audio/modulation. Would perfectly fit to Radio Kaduna. Not heard for months. Co-channel Amhara National State Radio not heard for three weeks at least (last week being on holiday and therefore off-receiver though).

Kaduna IDed at 1844 UT via a Poland SDR where it is audible in remarkable strength! What a difference to Twente Holland. Surprisingly, on my balcony it's also quite good, though I'm living close to Twente...

The first-hand info on the R Rossii SW transmissions has appeared in our open\_dx mailing list. ... I visited the Roskomnadzor Primorye branch office on Sep 05 and was told that reactivated R Rossii SW transmissions go on the air from Vladivostok/Razdolnoye. Here is the schedule:

5020 Wantok FM relay via SIBC, at 1312-1330\* UT on Aug 26. Unlike my Aug 24 reception here with no IDs, today no question as to who was providing the programming; frequent IDs ("This is Wantok FM 96.3 MHz.

Good times, great music" and "The hottest sounds with the hottest DJs, 96.3"; mostly pop songs ("Saturday Night" by the Bay City Rollers, Dierks Bentley with "Drunk On A Plane," etc.). I love it when they run past their usual 1200\* UT sign off! My local sunrise was at 1334 UT.

comment by wb: nothing changed on database, compared to B-15 TRT entries.

Seemingly due of political widespread protests in Turkey as a type of political unrest, no technician frequency manager took part on B-16 conference.

9275 on Sept 16 at 1818 UT, there it is, WMLK indeed back on the air, poor signal checked only on the PL-880, but sure sounds like EJOM, deceased. (Neighbor 9265 WINB is not on air this early: 9265 kHz is still shown on WMLK webpage as its frequency!) So that explains the unID open carrier I was getting as early as 1300 UT today. They have been posting on their Facebook about repair progress, but now it is inaccessible.
