DX MAGAZINE No. 8/9 ■ Vol. LVIII ■ August/September 2023

Hello again,

Welcome to the annual summer double issue of our DX MAGAZINE. Like in the past years you will find our normal monthly sections, some articles, and our annual "List of Members". *Please notice that our "List of Members" is only sent to our members - not to non-members, radio stations or other clubs.* I have also included Wolfgang Büschel's list "SWL / Media Programs in English, German & Spanish" and Walter Eibl's "Schedules of Broadcasts in German - Hörfahrplan Deutsch". I hope that you will enjoy this double edition and wish you a nice and sunny late summer.

Die **Hamburger Kurzwellenfreunde** laden ein zum DX-Camp am Elbe-Lübeck-Kanal, ins Schullandheim „Haus Lankau“, zwischen Ratzeburg und Mölln. Das ist eine bewährte Location in malerischer Außenlage, mit ausreichend Platz für Antennen.

Es wird zwei Camps geben. Sie finden statt vom 21. bis 28. November 2023 und vom 20. bis 27. Februar 2024 im Schullandheim „Haus Lankau“, Vossbergweg 38, 23881 Lankau.

Weitere Infos und Anmeldung: Hans-Jörg Winkel, Bahnhofstr. 22, 22885 Barsbüttel, Tel. 04072-730412, Email: <[de2hjw@gmx.net](mailto:de2hjw@gmx.net)>.

And with this best wishes and good DX until October from

### ANTARCTICA ARGENTINE - BBC Monitoring: Argentina has 'improved' Antarctic radio station airing.

Argentine National Radio station LRA 36 "Archangel San Gabriel", which broadcasts from the Esperanza Base in Argentina's sector of the Antarctic, was including as a key part of its programming the topic of the Argentine sovereignty claim over the "Malvinas" (Falkland Islands), and it was undergoing renovations and improvements to expand its reach, Argentine news agency Telam reported on its website on 28 July.

The article quoted the radio station coordinator, Juan Benavente, as saying that one of the station's aims was to "Malvinizar" (talk about Argentine sovereignty over the Falklands) from Antarctica", an apparent reference to this

programming promoting Argentina's long-running territorial claims over the South Atlantic islands.

Telam quoted Benavente talking about including programme content such as testimonies from veterans of the Falklands War, but also "stories that unite sports and education with the [Falklands] archipelago".

An example of this was a 15 March communication with an Argentine marathon runner who was participating in a competition in the "Malvinas" (Falklands), the news agency report said.

"This was something that filled us with emotion, it is something that had never been done before," Benavente said, as quoted by Telam. Other goals of the Esperanza Base station, according to Benavente, were to inform about the activities carried out at the different Argentine bases in Antarctica and to spread Argentina's culture to the rest of the world, Telam said.

The report said that, since the beginning of 2023, the radio station had been working on a "renovation and improvement strategy".

Telam added that a more powerful transmitter had been installed for the FM broadcasting system as well as an antenna with which it was already possible for the signal to reach the Petrel Base - 40 kilometres away. Eventually, it was also expected that the radio broadcasts would be able to reach international tourist cruises passing through the strait in front of the Esperanza Base during the austral summer, thanks to the work being conducted, the report said.

The news agency said that LRA36 had been inaugurated in 1979 and broadcast on shortwave. It worked jointly with Argentina's state-owned international broadcaster RAE and was listened to in places as far off as Alaska, Iceland or Japan, according to the report. It was also transmitted via modulated frequency with local reach and, since a few years ago, through streaming over the Internet.

The report noted that, since the previous austral summer, the radio station had begun broadcasting the programme "Uniendo Voces" (Joining Voices) in collaboration with Quilmes National University (UNQ). Telam added that, for the first time this year, the radio station began to broadcast the Antarctic radio bulletin, "Rantar", which was 7-10 minutes long, on a "weekly/bi-weekly" basis.

"It includes event anniversaries related to Antarctica and the Malvinas, news about the station itself or amateur radio stations, and some technical-type pieces," Telam said.

Telam\_news\_agency website, Buenos Aires, in Spanish 28 July.

15475.98 kHz RC USB, Sat Aug 12 at 1753 UT, LRA36 is on with music prelude, S7/S9 into Argentine SDR; tnx to reminder from Manuel Mendez who was already getting it direct to NoWe Spain at 1747 UT. I mostly miss the first bihour of KUCO's opera this week, from WFMT, Bellini's 'La Sonnambula'. 1757 UT CW ID. 1758 UT vocal s/on with multilingual IDs.

1759UT temps in July were -30, down to -41.4, winds 10? meters per second. Conversion factor to mph is X 2.237 22 mph. 1803 UT live intro of 'Uniendo Voces', staff, Juan Benavente speaking. 1811 UT will be carrying 'Zona de Fuego' program sometime. Now? -19 degrees. Thursday was first 'Estudio 9' show from Univ. de Quilmes. 1816 UT kid? or woman voice with history mentioning 1930y. 1826 UT new housing built at Petrel base. 1827 UT accuses British of destroying Uruguayan/Argentine scientific, not military base in South Sandwich during Malvinas war.

1832UT song. 1838 UT contact info. 1842 UT about space exploration, launch from New Mexico. 1845 UT there have also been rocket launches for AntArg bases. 1853 UT story of an engaged, then married couple at an Anta base. Still going past 1900+ UT when it's time to wrap up and dispatch this report.

(gh, WOR Aug 12)

**ARGENTINA** - Nach zwei Wochen Pause gab es ab 2. August 2023 wieder ein deutschsprachiges Programm von RAE Argentina al Mundo. Die Redakteurin der Sendung Rayen Braun: "Wir senden so weit wie möglich montags bis freitags 2000-2100 Uhr Weltzeit." Man findet die jüngeren Programme bei <<https://www.radionacional.com.ar/herzlich-willkommen/>> und durch Vermittlung von Michael Bethge ein Programmarchiv im Umfang etwa eines Monats bei

(Bernd Seiser-D)

**AUSTRALIA** - UNID 4970 kHz Thanks very much to Bryan Clark for the tip for this new frequency for one of the low powered stations ! I could just make out an extremely faint carrier around 1000+ UT, on July 28, but no hint of any audio; later, around my local sunrise (1310 UT), I had a much improved carrier, but still not able to pull in any audio; it seems I will need outstanding propagation to be able to catch any audio here.

This is a new signal on this frequency. The new frequency is for Peter Tate's station that has a new license -

<[https://web.acma.gov.au/rri/licence\\_image.extract\\_pdf?pLICENCE\\_NO=1989836/5](https://web.acma.gov.au/rri/licence_image.extract_pdf?pLICENCE_NO=1989836/5)>

Greatly appreciate Bryan's alert ! Certainly this frequency needs much more monitoring now!  
(via Bryan Clark-Mangawhai-NZ, Ron Howard-CA-USA, WOR and direct July 29)

4970 kHz "Radio 567" (presumed), 1305-1335 UT on Aug 2. Another day of bits and pieces of hearing music; the best day so far, but still a little bit too weak to ID any songs.  
(Ron Howard-CA-USA, via wwdxc BC-DX TopNews Aug 3)

5035 kHz Unique R., Moree, NSW. 1040 UT in LSB. Usual antique pop selections. Back in March, announced it was leaving shortwave. Now back again in July with the same tinny, lo-fi SSB quality that is totally unsuitable for a music station ! Fair to scratchy signal. Appears to be a very irregular operation at present, and nothing heard on 3210 kHz. The licence states the txer is now located at Moree, NSW. July 16.

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS, ADXN of ARDXC; direct Aug 1)

**BRAZIL** - 11815v R. Brasil Central at 0100 UT, M presenter in Portuguese, mix of Brazilian music bf, but other styles after, including rendition of Dr. Zhivago theme. Fair, Aug. 7  
(Rick Barton, Sun City-AZ-USA, Arizona Update Aug 1-7, WOR Aug 08)

11780 kHz RN Amazonia music, Jingle "Radio Nacional" at :45 and into OM in Port mentioning Brazil and at :47 back to EZL Pprt Music. ID and mention of Brasilia at :59 and singing ID "Radio Nacional". RNB, RNA etc 'laundry list' ID at 2301 UT w/mentions of AM, SW and FM and into Port chatter by OM until back to music at :02:30 ... 4+54+44 LSB sync needed to avoid Turkey before their s/off, but clear after. 2220- UT on 2309 5 Aug.  
(Ken Zichi, Williamston-MI-USA, WOR Aug 11)

**CHINA** - 6065 kHz CNR2 (China Business Radio), 1330 UT on July 28. Continuing with BoH ID in English ("This is C-N-R Business Radio"); // 6030 kHz, which was mixing with CNR1 DRM (poor frequency assignments); for many years 6155 kHz was my favorite CNR2 frequency to listen to, but that has been silent for a long time now.

6125 kHz CNR1, 1219+ UT, July 28. Live coverage of the opening ceremony for the major sports event - "Chengdu FISU Summer World University Games Opening Ceremony" [FISU/Federation Internationale du Sport Universitaire]; YouTube with almost two hours of beautiful coverage -

<<https://www.youtube.com/watch?v=Lij9wR88vac>> University students from across the entire world participate.  
(Ron Howard-CA-USA, WOR and direct July 29)

 (info from 2020 to 2022, no reliable update possible - we)

**COLOMBIA** - 5909.952 kHz July 27 at 0641 UT, tropical music at S8/S9, better signal than usual from always off-frequency Alcaravan Radio. Brief burst of "running water" ute QRM. Manuel Mendez in Spain reports: "Alcaravan Radio 5910 kHz on air again after about 10 days out. Log in Oleiros, La Coruna, NoWe of Spain, Sangean ATS-909X, cable antenna, 8 meters.  
 5910 kHz Alcaravan Radio, Puerto Lleras, 0450-0526 UT on 27 July, religious and Latin American songs, Spanish, religious comments, Colombian songs "Llaneras". 25432."

However, I don't think it had been totally off. In regular bandscans I had been crossing a JBA offset carrier, but not logged. Now there is also a JBA carrier on 6010, probably Brasil rather than still inactive sibling station LV de tu Conciencia.

Ron Howard also replied: "Greetings, Manuel, from California. July 27, at 0742 & 0910 UT, heard a decent level carrier on 5910 kHz, but no audio at all; normally in the past I always had good audio here."  
 (Glenn Hauser-OK-USA, WOR Aug 3)

re COLOMBIA - and a tiny S=3-4 signal string seen and 'heard' on 5909.949 kHz at 02.33 UT on Aug 3rd.  
 [selected SDR options, span 12.5 kHz RBW 15.3 Hertz](wb df5sx, wwdx BC-DX TopNews Aug 3)

**CUBA** - 6100 kHz July 27 at 0646 UT, undermodulated Spanish with humbuzzwhine, no doubt RHC where something's always wrong.

5025 kHz, July 27 at 0650 UT, S=9+20/30db of dead air except for some humbuzz, from R. Rebelde, something's always wrong at Radio David Crawford, FL replied to my previous reports, July 27 at 0156 UT:  
 "Tonight's treat is what sounds like video buzz,rather than the recently-typical Rebelde FM audio, on 5025 KhZ. And after the one reported active "sunset" session, HM01 has been quiet again since, at least for the local midday and sunset schedules. I have not checked the madrugada scheduled times and freqs."

Ron Howard, CA replies later on July 27: Cuba (5025 KhZ) noted at 0743 & 0909 UT, with strong carrier, along with a strong hum, but no audio. Ron"  
 (gh, WOR Aug 3)

11760 kHz July 28 at 0715 UT, overtime RHC Spanish S=9+10dB but JBM. Something's always wrong at RHC. It's the only log I make this late-night due to horrible S=9+10dB noise level all over the bands: suspect from neighbor and/or thru power lines. I may have to rely even more on remote receivers, but many of them also have 'line noise' problems. Abated by 15 UT enough to tell that propagation is now degraded.

15230 kHz July 28 at 2316 UT, RHC S=9/+10dB of dead air.

11760 kHz July 29 at 0704 UT, RHC extension still on, in Spanish, S=9/+10 and somewhat undermodulated. Also unusually with dirty parasitic spurs plus / minus 3 kHz.

## 10

6000 kHz July 31 at 0642 UT, RHC English JBM with humwhine, S=9+20/30dB.

11950 kHz July 31 at 2349 UT, S9/S4 of dead air from 'Mesa Redonda' alt. Spanish frequency; supposed to be // 6000 kHz, which at 2355 UT is DA or maybe JBM.

13650 kHz July 31 at 2347 UT, all-music CRI 'Portuguese' relay, now with dirty spurs about 2.5 kHz plus/minus.

11670 kHz August 1 at 0646 UT, tonight's extra RHC, Spanish, S=9+10/20dB and undermodulated; also with squeal and dirty spurs about plus/minus 3 kHz. Same symptom I logged July 29 at 0704 UT on 11760 kHz.

11760 kHz August 2 at 0629 UT, RHC Spanish prolongation here tonight, S=9+20dB and good modulation for a change, no spurs either.

(gh, WOR Aug 3)

CUBA and as usual in past months a reserve TX unit of RadioCuba in use on LOWER frequency side FLANK - likely - on 5024.995 kHz, so likely a tx unit replacement in use after the hurricane's damage. ?! at 02.38 UT S=6-7 here in southern Germany. No hum audio heard - so far. (wb)

[selected SDR options, span 12.5 kHz RBW 15.3 Hertz]

**EGYPT** - 9884.961 kHz on July 11 at 2332UT, as scheduled, R.Cairo has moved from 9899.961 kHz by 2330 UT for Arabic to follow Portuguese toward South America and at exactly the same -19Hz offset fq, as UTWente displays both, but modulation now is even worse, only bits at peak spikes. There is also heavy lightning over Netherlands and this S=9+30/40dB bigsig is not enough to suppress it completely. Also an RTTY-like warble. Something continues egregious in Egypt.

9899.961 kHz on July 11 at 2248UT, extremely distorted talk at S=9+25/40dB into UTWente; intonation and occasional words sound Portuguese as scheduled from R. Cairo at 2215-2330 UT. Something's always egregious in Egypt. EiBi database list shows both CNR1 and RTI also on 9900 kHz at 2200-2400UT but not a trace of either vs this monstrosity. Cairo scheduled to follow with Arabic on 9885kHz at 2330-0045UT, Spanish on 9860 kHz at 0045-0200UT, all for South America. Why do they bother?

(gh, via NASWA Electronic Flashsheet #1109 July 16)

In den letzten Wochen konnte das deutschsprachige Programm von Radio Kairo tageweise um 1900 Uhr auf 9410 kHz empfangen werden. Auch wenn wegen der schlechten Modulation kaum etwas vom Programminhalt zu verstehen war, beweist das die weitere Existenz einer deutschsprachigen Redaktion von Radio Kairo.

(Bernd Seiser-D; Dr. Hansjoerg Biener-D, Bieners DX Digest column July 19)

**GUAM** - KTWR Agana (Merizo Guam) hat nach den Taifun-Schaeden vom Mai 2023 vier der fuenf Antennen wieder betriebsbereit und am 7. Juli 2023 folgenden Sendeplan eingefuehrt:

## 12

1930-2030 UT 9620 kHz BGL 500 kW, 300deg fuer Europa: Franzoesisch  
2345-0115 UT 15050 kHz BGL 500 kW, 60deg fuer China: Chinesisch,  
im Juli gelegentlich um 2330 Uhr mit englischen Nachrichten beobachtet.

Eingesetzt werden Sender in Bengaluru und Delhi Kingsway. Viele Frequenzen sind auch in Europa zu hoeren. Dabei faellt dann auf, dass der vorgeschriebene Name Akashvani noch nicht durchgehend anstatt von 'All India Radio' verwendet wird. Z.B. wurde folgende Ansage gehoert: "This is the Swahili Service of All India Radio on 15030 kHz" Englisch ist nicht mehr offiziell im Auslandssendeplan, aber teils regulaer, teils zufaellig trotzdem immer wieder zu beobachten. Chinesisch und Tibetisch gelten als mit Stoersendungen belegt. Im Juli hoerte das sich aber nicht immer so an. (via hjb, Bieners DX Digest column Aug 6)

**JAPAN** - 8006 kHz HFD Radio Station JG2XA at 1410 UT on July 15. CW IDs now given every 10 minutes (formerly given every 2 minutes). 5006 kHz remains with open carrier and no IDs yet. 200W signal strength remains fairly decent.

**JAPAN / TAIWAN / UZBEKISTAN** - Shiokaze/Sea Breeze frequency changes of July 27 -"Shiokaze" from 1300 UT, the annual frequency change is being done from today July 27. This is a change since June 7th. On Thursdays, both the first half and the second half are broadcast in Korean. 5920 kHz is a self-destruct to the frequency that super jamming is out.

Yamata's radio waves are strong and almost eliminate jamming, but it is Yamata transmission that wants to come out to this frequency more than anything else. 6090 kHz does not know the interference.

1325:25 UT "Voices from the Japanese government to families" is a message to Ms. Kyoko Matsumoto, and 1355:30 UT is a message to Mr. Kaoru Matsuki.

Shiokaze, July 27 2023 ~  
1300-1400 5920, 6090  
1405-1435 5980, 7325  
1600-1700 5935, 6165  
1705-1805 5955, 7435

9455 kHz is good. 1330's "Furusato no Kaze" is 15475, 9705 and 9455 kHz. At this time, the same programs are being broadcast every day. 1405's UT "Shiokaze" appeared at 5980 and 7325kHz. Both waves have no interference and the reception condition is good. But 7325 kHz is almost crushed by CRI starting at 1330 UT.

1430's UT "Furusato no Kaze" is strong at 15475 kHz transmitted from Tashkent-UZB, and 9705 and 9685 kHz transmitted from Taiwan. A nostalgic Japanese song is "Naishobanashi". The commentary on the abduction issue is about Mr. Shuichi Ichikawa. On August 12, 1978, he was abducted from Hioki County, Kagoshima Prefecture, along with Rumiko Masumoto, who was 23 at the time. In 2002, North Korea admitted to the abduction, married on July 24, 1979, and died on September 4. However, Ichikawa, who could not swim, drowned in a river in early winter, and suddenly issued a death notice in 2002. Created in a hurry in September 2009, there is no objective fact and it is not a credible content.

For North Korea, this is also an inconvenient abduction case unless they die. "Furusato no Koe" is a message recorded over the phone in June 2020 from his older brother Kenichi Ichikawa to Shuichi Ichikawa. Next is the message recorded in February 2019. And a message recorded in June 2020 from sister Ryuko Ichikawa. Today's song is the 1968 hit "Flower Necklace" by The Tigers. This program is the same as April 13, 23, May 3, 13, 25, June 4, 14, 25, July 5, 16, 2023.

1600's UT "Shiokaze" came out to 5935 and 6165 kHz. Both of these time waves are strong. S=9+50dB is the input.

Therefore, the interference of the same wave is completely unknown. It is the same Korean language broadcast as 1300 UT.

1705's UT "Shiokaze" is 5955 and 7435kHz. Both waves are strong. However, 7435 kHz has a time when the weather fax is out, and there is a lot of interference. The first half is the same as 1405 UT, and the second half has 1300 UT Korean programs that aired last week. (Hiroshi (Google translation))

<<http://hiroshi.mediacat-blog.jp/e152111.html>> via Ron Howard-CA-USA, WOR July 27)

**MADAGASCAR** - 21560 kHz BBC, Talata, via MGLOB Talata Volonondry Madagascar relay facility. 0650 UT English WS to EaAF. Good signal (around S8) via the short path off the back of the Talata array. A 30-second break in transmission at 0658 UT. Then back at 0659 UT with a somewhat stronger signal (S=9+10dB). This suggests there is perhaps a change in the 310 deg. beam heading for the 0700 UT service, although no change is indicated in the usual lists. 0700 UT also sees the s/on of the service on 21630 kHz, beaming 260 deg to SoAF. But with Mt Evelyn being decidedly off the side of that Talata beam heading, that channel is much weaker. Sunset here is 0726 UTC (5:26 pm) today, and both frequencies take a dive in signal strength by 0740 UT. July 24.

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS, ADXN of ARDXC; direct Aug 1)

12095 kHz BBCWS (Talata) via MGLOB Talata Volonondry Madagascar relay facility, 0408-0435 UT on 26 July, En. Newsday. Report about the effect of Russia breaking off the deal to allow shipments of Ukrainian grain. Sports score at 0416 UT. Business news at 0418 UT. Signal remained fairly good though fluttery until about 0435 UT. SINPO 44333 (Tony Pavick-BC-CAN, via NASWA Electronic Flashsheet #1111 July 30)

**MALAYSIA** - 11665 kHz RTM Wai FM, via Kajang site heard at 1130 UT on July 10. Brief instrumental music and followed at 1131UT by a woman speaking in listed Malay. Mostly poor.

(Bob Brossell, Pewaukee-WI-USA, via NASWA Electronic Flashsheet #1109 July 16)

**MALI** - Nach ziemlich genau drei Monaten konnte der spanische Kurzwellenexperte Manuel Mendez Radio Mali Bamako site-I am 27. Juni 2023 wieder auf 9635 kHz empfangen. Die Frequenz wird als Tageswelle 0800-1800 Uhr UT eingesetzt. Davor 0600-0800 und danach 1800-2400 Uhr wird auf 5995 kHz gesendet, das auch in der Zeit der Abwesenheit von 9635 kHz in Europa gehoert wurde. Vom Berichterstatter auch im Juni und Juli mehrfach am Abend. 9635 kHz konnte er nicht beobachten.

(Manuel Mendez-ESP WOR; Dr.Hansjoerg Biener-D, B. DX Digest column Jul 19)

*The second relais QRG of CRI via Mali could be already down (we)*

**MYANMAR** - THAZIN RADIO - MMR Thazin Radio from Puyin U Lwin northern site some 575 kilometers north of Yangon, operated by Tatmadaw [Military] found on 7345 kHz around 11.00 past 11.30 UT in native languages mixing with CRI co-channel on 18 Aug 2023. Thanks to a listening tip from Pradip Kundu. On MW Thazin Radio Puyin U Lwin operates on 639 kHz.

(Sarah Weerakoon-CLN 4S5SL, wwdx BC-DX TopNews Aug 18)

**NEW ZEALAND** - 11725 kHz Radio New Zealand International, Rangitaiki, 1947-1958\* UT on Aug 5, English, comments, ID. "This is Radio New Zealand International now closing this frequency ...", "This is New Zealand", interval signal, close. 35433. (Manuel Mendez-ESP, hcdx Aug 7)

**OMAN** - Im Vorfeld des BBC Sendeendes aus Singapur Kranji site wurden auch auf Frequenzen aus A Seela Hinweise auf BBC Abschaltungen gehoert. Wie sich am 16.Juli 2023 zeigte, waren diese eingestreute Ansagen keine Irrlaeuer.

Der BBC World Service in Englisch hat jedenfalls auf der Kurzwelle auch das Zielgebiet Naher/Mittlerer Osten (0300-0500,1700-1900 Uhr) aufgegeben.

Damit verbleiben folgende Sendungen in Englisch:

0000-0100 Uhr	5945 kHz (250kW, 63 deg)	fuer Suedasien
0100-0200 Uhr	7325 kHz (250kW, 63 deg)	fuer Suedasien
0759-0900 Uhr	21660 kHz (100kW, 63 deg)	DRM fuer Asien nicht auf Sendung
1200-1400 Uhr	15310 kHz (250kW, 63 deg)	fuer Suedasien
1200-1300 Uhr	17790 kHz (250kW, 80 deg)	fuer Suedasien
1300-1400 Uhr	11685 kHz (250kW, 68 deg)	fuer Suedasien
1500-1600 Uhr	11800 kHz (250kW, 225 deg)	fuer Ostafrika
1600-1700 Uhr	11700 kHz (250kW, 225 deg)	fuer Suedafrika

Das WRTH-Update erwies sich hier als zuverlaessiger als die Frequenzliste bei <<https://new.hfcc.org>> Obwohl einige Frequenzen mit Juli markiert waren, entsprachen die dortigen Angaben am 16. Juli 2023 fast ganz dem urspruenglichen Sendeplan.

(Dr. Hansjoerg Biener-D, Bieners DX Digest column July 19)

**PERU** - 4824.6 kHz tent. La Voz de la Selva. - For several days now I have been tuned in between 2300 UT and approx. 0100 UTC a signal that would correspond to the radio station 'La Voz de la Selva' from Iquitos in Peru.

The audio of the signal is very low and has not allowed me to confirm that it is this station vs. the signal is very low and has not allowed me to confirm that it is this station against its online signal. Although the signal the audio seems to be inside an "underground drawer" reminds me of the current situation with the signal from Radio Pio XII 5952.4 kHz which is broadcasting on Saturdays and even though the signal the signal is good but the audio does not get through.

The colleague Cesar Perez Diores from Chimbote in Peru, has informed me that if it is 'Radio La Voz de la Selva' which is broadcasting irregularly, according to another colleague in the city of Iquitos in Peru. The last records of this radio station in my DX logbook date from the month of May 2017, when it was identified as "LVS Digital 93.9".

The truth is that this signal is not even a shadow of what it was in the 90's when it was possible without difficulty with a tape recorder and its telescopic antenna. Today with SDR and a suitable antenna it is just a murmur ... Automatic translated Spanish into British English.

(Rafael Rodriguez R.; Bogota D.C. - Colombia, via gh, WOR July 22)

**PHILIPPINES** - 9410 kHz BBC - via USAGM Tinang relay site. S/on after test tone at 1000 UT English to SoEaAS and PNG. The first day from Tinang-PHL schedule on this freq for this service (ex Kranji-SNG). About 1 S-point stronger than Kranji-SNG. July 16.

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS; NASWA Electronic Flashsheet #1109 July 16)

BBC 9410 kHz via USAGM Tinang PHL relay. I ve been checking 9410 kHz around 1100 UT the past few days on various Kiwi\_net SDRs in East and Southeast Asia, and reception of this frequency has been quite poor in the target area. If this is really Tinang-PHL it is with far less than the 250 kW registered with the HFCC.org, or is from a different, lower powered site.

Oddly, the transmissions on 9440 kHz at 2200 UT and 11825 kHz at 2300 UT via Tinang-PHL come in very well on those same SDRs. The BBC has still not corrected its frequencies webpage, which continues to show some nonexistent transmissions, and is missing the 2200 UT broadcast on 9440. They also haven t bothered to update the bar graph frequency charts, which still have the now defunct Singapore output.

(Stephen Luce-TX-USA, WOR July 21)

**ROMANIA** - Two Radio Romania international transmitters shut down due to budget cuts.

Many thanks to SWLing Post contributor, Paul Walker, who shares the following news from Radio Romania International:

*Two out of the five transmitters broadcasting RRI's programmes are temporarily suspended as of 1 August*

Dear friends, the Radio Romania Board of Administrators decided to temporarily suspend the use of 2 out of the 5 Radiocom shortwave transmitters that ensure the broadcast of Radio Romania International programmes, because of budget cuts. As of August 1, our programmes are aired via one transmitter in ?ig?ne?ti, one in S?ftica (both of them near Bucharest) and one in Galbeni (east). As soon as the budget of the institution is restored, we will resume broadcasts on all 5 transmitters.

The RRI programmes in Romanian, English, French, German, Spanish, Russian, Arabic, Chinese and Hebrew are affected. All of them may be received on only one frequency instead of 2, as of August 1, 2023. The frequencies as well as any other prospective changes operated by Radiocom further to reception monitoring and to your feedback on reception quality will be announced in our broadcasts, on our web page and on Facebook.

Budget restrictions also prompted a reduction of the night time power of medium wave transmitters that broadcast Radio Romania News and Current Affairs programmes and of some regional stations.

We invite you to follow RRI's programmes online at <<http://www.ri.ro>> (including on demand), on SoundCloud, on Android and iOS apps, via TuneIn and via satellite. You can find more details on our home page. You can also follow us on Facebook, Twitter, Instagram, YouTube, LinkedIn and Spotify.

(SWLing Post, F\_Book, via BrDXC-UK iogr Aug 1)

The Radio Romania International website has this schedule for English broadcasts:

#### WESTERN EUROPE

05.30-06.00 11960  
 11.00-12.00 17630  
 17.00-18.00 13750 (DRM)  
 20.30-21.00 11975 (DRM)  
 22.00-23.00 11800

#### AFRICA

11.00-12.00 17670

#### NORTH AMERICA (East Coast)

20.30-21.00 13650  
 00.00-01.00 11620

#### NORTH AMERICA (West Coast)

03.00-04.00 9850

#### JAPAN

22.00-23.00 9790

#### AUSTRALIA

05.30-06.00 21550

#### INDIA

03.00-04.00 15330 (DRM)  
 (Mike Barraclough-UK, BrDXC-UK iogr August 1)

RRI Bucharest in A23 via Tiganesti, Saftica and Galbeni

Here is the current RRI schedule:

<<http://ab27.bplaced.net/rri.pdf>>

(Alexander Busneag-D, Aug 2)

What I did not see in the RRI - English version is that the power of the Romania's medium wave stations is to be reduced to half (this is what the RRI Romanian website version says).

(Erich Bergmann-D, via wwdx BC-DX TopNews Aug 2)

(hfcc.org of August 02;

\* scheduled and partly traced on monitor Aug 1 and 2, wb.)

RRI Romanian at 0000-0200 UT 9730 kHz (GALbeni site 300 kW, 310 degr), not 11945 kHz confirmed.

(Dr. Hansjoerg Biener-D, via wwdx BC-DX TopNews Aug 3)

**SLOVAKIA** - Radio Slovakia International feiert in diesem Jahr den 30. Geburtstag des Senders. Aus diesem Anlaß wurde eine Serie produziert unter dem Titel "30 Jahre RSI und Auslandsradio weltweit". Die Projekt-Serie soll ein paar Streiflichter auf verschiedene deutschsprachige Auslandsradiosender werfen - sowohl in der Geschichte als auch in der Gegenwart. Alle Sendungen aus dieser Serie können auf der Webseite von Radio Slovakia International <<https://dersi.rtvs.sk/clanky/323864/zum-30-rsi-jubilaum-2023-deutschsprachige-auslandssender-weltweit>> gehört werden. (Bernd Seiser-D)

**SOLOMON ISLANDS** - 5020 kHz SIBC, 1206 UT to past 1410+ UT, July 29. No jamming today; heard well past the normal 1200\* UT closing; all non-stop island songs, except at 1231 UT heard a definite announcer, so suspect was

SIBC programming and not a Wantok FM relay; mostly poor reception; propagation seemed less than ideal today. Glenn, I cannot remember the last time I heard SIBC on 9545 kHz, but many years ago I had good reception there:  
<https://app.box.com/s/in102j2pim9w69zrcdn6>  
 (Ron Howard-CA-USA, WOR and direct July 29)

5020 kHz SIBC Honiara, on Aug 2 with another day with greatly extended broadcast; 1240-1300 UT and still on after 1355+ UT; C&W and pop songs; The Allman Brothers Band - "Ramblin' Man," etc.; I enjoy these extended programs as the reception after their normal closing time of 1200\* UT, is so much better for me, as today my local sunrise was at 1314 UT. (Ron Howard-CA-USA, via wwdx BC-DX TopNews Aug 3)

**SPAIN** - 11670 kHz REE Noblejas, at 2245z on July 4. HFCC lists in French at this time but with such a poor signal I couldn't be certain. 11670 kHz targets north and west Africa with 200 kW at 161 degrees using a 4 x 3 x 0.8 curtain (a higher angle of radiation than the arrays to the Americas). Since I'm way off the side, this frequency is always the weakest for me (from Spain) no matter what time of day. Noblejas to central Texas is about 5000 miles at 297 degrees.

15520 kHz REE via Nobeljas site, 1630z on July 16 in Spanish. 200 kW aimed at the Near and Middle East at an azimuth of 110 degr using a 4 x 3 x 0.8 curtain (with a higher angle of radiation than the arrays to the Americas). I usually receive 15520 kHz better than 17715 and 11670 kHz since the back of the beam seems to radiate better than the sides. Noblejas to central Texas is about 5000 miles at 297 degr azi.

(Jerry Lenamon-TX-USA, via NASWA Electronic Flashsheet #1109 July 16)

17715v kHz REE Nobeljas, 0200z, July 13, in Spanish. 200 kW azimuth 230 degr, using a 4 x 4 x 1.0 curtain as it closed down for the day. This frequency was // to 17855 kHz but much weaker for me. The 230 degrees beam centers on Brazil and the more southerly South American countries. FWIW, Argentina and Chile are their most distant target areas.

Noblejas site does have a 260 degrees beam to northern South America but apparently the combo of 230 degr to the south and 290 degr to the north serves the purpose. Noblejas-ESP to central Texas is about 5000 miles at 297 degr.  
 (Jerry Lenamon-TX-USA, via NASWA Electronic Flashsheet #1109 July 16)

17855 kHz REE Noblejas, 0200z on July 13, in Spanish to Central and North America. 200 kW 290degr azimuth using a 4 x 4 x 1.0 curtain, as it closed down for the day. The North American beam at 290 degr centers on Mexico. My QTH in central Texas is at 297degr from Noblejas and is only 7 degr off the center making this my ususal best choice for Spain. My local sunset this evening was at 0135z but 16mb was still propagating very well. I was surprised to see that, when looking at a day/night map, it showed the path at 0200 UT has various stages of twilight, more like a gray line than darkness. See this website for the map:

<https://www.timeanddate.com/worldclock/sunearth.html?iso=20230713T0200>

Noblejas to central Texas is about 5000 miles.

(Jerry Lenamon-TX-USA, via NASWA Electronic Flashsheet #1109 July 16)

**SRI LANKA** - The international service of the Sri Lanka Broadcasting Corporation (SLBC) recently doubled its Tamil Service airtime to two hours, on 873 kHz AM (medium wave) from Puttalam transmitter. The new schedule is 0130-0330 UTC. This is partly in response to individual efforts of listeners, many in the southern part of India, in Bengaluru.

Introducing this change, Colombo International Radio also announced that shortly they are going to use DRM on 1548 kHz {via former DWL bcast center - now SLBC Trincomalee TX site}. This will be done by using the old transmitter of Deutsche Welle located in the north of Sri Lanka at Trincomalee.

More at:

<https://radioinfo.asia/news/sri-lanka-broadcastingcorporation-goes-drm-following-indian-listeners-request/>

(RadioInfo Asia 19 June via Ydun's MW Info; NZ DX Times items, Aug 2023)

**THAILAND** - 9385 kHz new fq R. Thailand, Ban Dung relay of USAGM Udorn Thani site. \*1200-1400\* UT Opening with English, then 1230 UT Vietnamese, 1245 UT Mandarin, 1300 UT Japanese, 1315 UT Malay and 1330 UT English.

The first day (July 21) on this NF (ex 9940 kHz). Finally moved away from 9940 kHz to avoid AIR India (until 1215 UT) and Nippon no Kaze (1300-1330 UT). Seems to be a good choice as it was heard with a solid signal here at Mount Evelyn and very strong via online SDRs throughout SoEaAS.

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS, ADXN of ARDXC; direct Aug 1)

13750 kHz R. Thailand, Ban Dung relay of USAGM Udorn Thani site. S/on 0200 UT for English service. NF (ex 15590 kHz). Fair signal with moderate QRM. Poor choice as the slot is already occupied by VoA Deewa, also from Ban Dung ! What's going on there? Went back to 15590 kHz from July 5.

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS, ADXN of ARDXC; direct Aug 1)

15590 kHz R. Thailand, Ban Dung relay of USAGM Udorn Thani site. 0000-0030 English. Back here after a failed attempt to 13750 kHz. Good signal. Also noted for the 0200 UT service. Jul 5. And again on July 10 at 0200 UT, but some issues with the audio cutting out and in every few seconds. I gave up after 15 min of this! It was unlistenable ! Was anyone at the transmitter site monitoring this ?

(Rob Wagner VK3BVW, Mount Evelyn-Vic-AUS, ADXN of ARDXC; direct Aug 1)

**UNITED KINGDOM** - Die BBC hat laut <<https://new.hfcc.org>> mit dem 7. Juli 2023 (\*)

1800-2000 UT	9410 kHz DHA 250 kW, 225deg fuer Ostafrika, unbrauchbar
1800-2000 UT	15400 kHz ASC 125 kW, 27deg fuer Westafrika
1800-1900 UT	17640 kHz WOF 125 kW, 165deg fuer Westafrika
1900-2000 UT	9890 kHz SAO 100 kW, 138deg fuer Suedafrika, unbrauchbar
1900-2200 UT	11810 kHz ASC 125 kW, 65deg fuer Zentralafrika, Sa So bis 2100 Uhr
2000-2200 UT	12095 kHz ASC 125 kW, 27deg fuer Westafrika, Sa So bis 2100 Uhr
2200-2300 UT	9440 kHz PHT 250 kW, 200deg fuer Suedostasien, in Europa von Radio Kairo blockiert
2300-2400 UT	11825 kHz PHT 250 kW fuer Suedostasien, ungehoert

Fuer Asien eingesetzt wird hier neben Sendern in Usbekistan Taschkent und auf den Philippinen USAGM Tinang primaer die Sende anlage im Oman A'Seela, die in Europa aber immer schon schwieriger zu hoeren war. Die Afrika- Sendungen aus Ascension, aus Grossbritannien Woofferton, Madagaskar in Talata Volonondry, Sao Tome Pinheira, von vatikanischem Gelaende Santa Maria di Galeria und aus den Vereinigten Arabischen Emiraten aus al-Dhabayya, wurden nicht angetastet.

(via hjb, Bieners DX Digest column Aug 6)

**U.S.A.** - Nach mehrmonatiger Pause wurde WEWN Vandiver-AL-USA Ende Juli 2023 wieder gehoert. Glenn Hauser entdeckte am 31. Juli 2023 Global Catholic Radio in Englisch auf 15610 kHz.

Der fuer die Zeit 26. Maerz - 28. Oktober 2023 eingetragene traditionelle Sendeplan ist seit Langem fiktiv, kann aber wenigstens bei der Frequenzsuche anleiten. Monitoring Anfang August hatte folgende Ergebnisse:

0000-1400 Uhr	5970 kHz	100 kW, 160deg	Spanisch, ungehoert
0000-0900 Uhr	9385 kHz	250 kW, 85deg	Englisch, ungehoert
0900-1300 Uhr	9470 kHz	250 kW, 335deg	Englisch, seit Jahren nie {mehr} auf Sendung.
1400-2400 Uhr	12050 kHz	100 kW, 155deg	Spanisch, abends bei Monitoring ungehoert.
1900-2400 Uhr	15610 kHz	250 kW, 85deg	Englisch, jetzt wieder 2000-2400Uhr, 1900Uhr bei Monitoring ungehoert.

(Dr. Hansjoerg Biener-D, Bieners DX Digest column Aug 6)

15150 kHz WMLK, 0410-0430 UT on 28 July, En. Woman singing 'Lamb of God' accompanied by piano. Station ID at 0412 UT. Elder Jacob O Meyer welcomed listeners to next portion of programming. Largely faded to mush by 0430 UT. SINPO 44444 to 22222.

(Tony Pavick-BC-CAN, via NASWA Electronic Flashsheet #1111 July 30)

5130.17 kHz approx., August 13 at 0710 UT, rock music, S=9/+15dB vs HSNL, WBCQ test direct again tonight. Earlier on Aug 13, Uncle Bill Tilford replied to my previous: "Uncle Bill comments: Not impossible that a show like John's or Marion's, playing 78s in the wee hours, might work. Right now there is some spoken word at 0258 UT and it's touch and go. Incidentally, the speakers are anything BUT pro-Trump."

 (VoA)

**VANUATU** - Radio Vanuatu signs off 1102 UTC on July 13. Radio Vanuatu was heard here on the US east coast again, July 13 on 7260 kHz, signing off at 1102 UT with their national anthem. This was a full hour after local sunrise. There was a weak signal, noise, and fading here in Damascus, Maryland, near Washington DC. Barely audible. RSPdx SDR with 80 meter horizontal loop antenna 12 to 30 feet above ground. ...  
 (Marshall Reel, WOR July 13)

### Abbreviations:

with name of station:

BC / bc = Broadcaster, Int. = International, R = Radio, tx = Transmitter, Vo = Voice of, QRG = frequency

Location of transmitters with frequency:

AI = Aligarh/India, ALB = Albania, Ban = Bangalore, Be = Beijing/China, Bib = Biblis/DL, BOT = Botswana, CHN = China, CLN-TRM = Sri Lanka Trincomalee, Du = Dushanbe/TJK, ERV (ARM) = Erivan/Armenia, F = Issoudun/France, FI = Florida/USA, HAB = Habana/Cuba, Ho = Hohhot/CHN, HRI = WHRI Cypress Creek/USA, Jin = Jinhua, Kash = Kashgar/CHN, Ka = Kingsway (Delhi), Kh = Khampur (Delhi), KII - Kall/DL, KOR = (South) Korea, Ku = Kununurra/Aus, Kun = Kunming/CHN, KWT = Kuwait, Lam = Lampertheim/DL, MDA = Moldavia, MDG = Madagascar, MNG = Mongolia, MRA = Northern Marianas, N = Nauen/DL, Nn = Nanning/CHN, OM = Oman, Pan = Panaji/India, Row = Rohrbach Waal/DL, RUS = Russia incl. Sibiria, SAI = Saipan (MRA), SNG = Singapur, STP = Sao Tomé, SWZ = Swaziland (ESWATINI), SZG = Shijiazhuang/CHN, TH = (NAK) Nakhon Sawan/Thailand, TIN = Tinian (MRA), TJK = Tajikistan, TWN = Taiwan, UAE = Al Dubbaya/ United Arab Emirates, Ur = Urumchi/CHN, Wil = Winsen/Luhe/DL, Wof = Woofferton/GB, Xi = Xian/CHN, Ya = Yamata/Japan.

Mostly within round brackets target areas as known:

Af = Africa, Am = America, As = Asien, Aus = Australien; Eu = Europe, FE = Far East, ME = Middle East, OC / Pac = Pacific Region; C = Central, E = East, N = North, S = South, W = West

Languages:

Ar Arabic - Ch Chinese - Du Dutch - E, En English - F French - G, Ge German - Gr Greek - I Italian - J Japanese - K Korean - P Portuguese - R Russian - Sp,Spa Spanish - Turk Turkish - VN Vernacular

Technical hint with frequency (QRG):

(\* /drm) = Digital Radio broadcast (DRM) v = variable irr / # = irregular / technical problems

/USB = upper sideband, /LSB = lower sideband, alt.: (QRG) = alternative frequency

\*\*\*\*\*

### Editor:

Walter Eibl (we)

EMail: <we@wwdx.de> or <we@ktrs.de>

Used equipment:

Receiver: ICOM IC-R70 communications receiver (no modification)

Antennas: Hamtronic HT504 selective active antenna, in roof window ca. 15 m above ground

Situation: Herzogenaurach / Germany; 49.567/10.917; 310 m NN

mostly monitoring via WORLD WIDE WEB.

### Here are the loggings from Richard D'Angelo of Wyomissing, PA, USA:

- 5910.0 COLOMBIA Alcaravan Radio – Puerto Lleras, 0304-0410 Aug 15, OM with long religious talk in Spanish. Nice selection of religious vocals followed by a male preaching loud at his audience. Fair signal.
- 5995.0 MALI Radio Television du Mali – Bamako, 2347-0002\* Aug 9, nice program of tribal music hosted by a man announcer with French talks. Fair signal but mixing with another (unidentified) station.
- 6070.0 CANADA CFRX – Toronto, 0036 0107 Aug 16, OM announcer with YL professor of economics discussing inflation & interest rates. Traffic Report followed by "News Talk 10-10 station ID. Good signal.
- 7505.0 USA WRNO – New Orleans, 0316-0335 Aug 4, man and woman preaching in English with station ID at 0328 by OM ("This is WRNO Worldwide") followed by email and postal mail addresses. Good signal.
- 9265.0 USA WINB – Red Lion, 2332-2348 Aug 9, OM with English preaching to 2344 when another man gave station ID and postal address followed by two men speaking in the Spanish language. Poor to fair.
- 9275.0 USA WMLK – Bethal, 1736-1751 Aug 4, man announcer in English inviting listeners to stay tuned for the daily sermon by Jacob Meyer "over radio station WMLK in Bethal, Pennsylvania ." Good signal.
- 9665.4 BRAZIL Radio Voz Missionaria – Camboriu, 2340-0050 Aug 12, OM talking in Portuguese hosting a live music program with many rustic vocal selections. Another man with a long religious talk commenced at 0013 with a return to music features at 0039. Fair signal.

- 9710.0 CHINA China Radio International – Kashi, 0007-0044 Jul 13, group vocals followed by a woman with Portuguese talk and then non-stop music. Poor signal.
- 9770.0 TURKEY Voice of Turkey – Emirler, 0425 0446 Aug 15, music program into time pips at 0430 followed by station ID and News in the Turkish language. Fair to good signal.
- 9795.0 PHILIPPINES FEBC Radio (presumed), 2300-2341 Aug 15, an OM and YL with long talk in Mon with vocals accompanied by flutes heard soon thereafter. Program mainly of talks with some music segments, changed languages at 2330 into Lao. No station ID was heard. Poor signal.
- 9800.0 CHINA China Radio International – Kashi, 0036-0057\* Jul 18, man and woman in Spanish talks with nice flute instrumental music at 0047 and vocals until carrier terminated after station ID. Poor to fair signal.
- 9865.0 CHINA China Radio International – Urumqi, 2328-0000\* Aug 8, female vocal selection followed by a mix of talks by a man and woman announcers in the Chinese language histing music programming., Fair.
- 9880.0 CHINA China Radio International – Kashi, 2254-2359\* Aug 11, instrumental music heard until carrier terminated in what is listed as an Esperanto language program. Fair signal.
- 9885.0 EGYPT Radio Cairo -Abis, 2338-0022 Jul 25, Arabic program with woman announcer and some music. 4+1-time pips at 0000 followed by a man announcer with the news. Talk features followed at 0010. Fair signal but awful audio.
- 9900.0 EGYPT Radio Cairo – Abis, 2314-2327\* Aug 8, instrumental music followed by YL with talk in Portuguese language with carrier terminated at end of broadcast. Fair to good signal but awful modulation.
- 11620.0 ROMANIA Radio Romania International – Tiganesti, 0002-0023 Aug 9, man announcer with the news in English language followed by female vocal selection. Good signal.
- 11745.0 SAUDI ARABIA Al-Azm Radio - Jeddah, 0030 Aug 4, music & two men talking in Arabic . Fair signal.
- 11785.0 TURKEY Voice of Turkey – Emirler, 2204-2225 Jul 21, caught the tail end of the English news programs followed by Turkish musical features and discussions. Good signal.
- 11815.0 BRAZIL Radio Brasil Central – Goiânia, 0030-0116 Jul 25, man and woman announcers talking in the Portuguese . Nice station ID at 0100 followed by a man hosting a pop music program. Fair signal.
- 13630.0 MALI China Radio International – Bamako, 2053-2130\* Jul 21, pop vocals until 2100 when an OM gave the station ID over time pips followed by the news in the English . After a few discussion features the program ended with the French program opening shortly thereafter. Fair signal.
- 13670.0 CHINA China Radio International – Beijing, 2141-2157\* Jul 21, discussion program in listed Croatian language with broadcast carrier terminated at 2157. Poor to fair signal.
- 13790.0 ALGERIA Ifrikyia FM – Ourgla, 0035-0104 Jul 25, man announcer with Arabic language talk hosting sports coverage (?) followed by another man and a woman talking. Time pips at 0100 followed by vocal selections. Fair to good signal.
- 15520.0 GERMANY Adventist World Radio – Nauen, 0400-0430\* Aug 12, YL opening with English station ID stating the next program is in Amharic . OM with religious talk in Amharic. S/Off with instrumental music. Fair signal.
- 15580.0 BOTSWANA Voice of America – Mopeeng Hill, 2032-2055 Jul 15, woman announcer with talk in the English language followed by a brief vocal selection. Mana dn woman with discussion, Poor to fair signal.
- 15590.0 THAILAND Radio Thailand - Ban Dung, Udon Thani Prov., 0001-0029\* Aug 4, woman with English news & breaks for announcements. Carrier terminated. Weak signal but finally some audio after a month.
- 15770.0 USA WRMI – Okeechobee, 1930-2003 Jul 19, nice WRMI station ID prior to VOA News with a feature called VOA Flashpoint Ukraine. Jeff White with WRMI station ID at 1959 followed by Lighthouse Radio Bible Study program. Fair to good signal.
- 17790.0 USA Radio Africa (Pan American Broadcasting) – Okeechobee, 1936-2003 Jul 25, canned English religious programming with station ID at 2000 before changing programs. Poor signal.

Radio Taiwan International 9700 kHz. QSL received in 30 days for report sent to: <rti@rti.org.tw> (BS)

Radio Taiwan International 11995 kHz via Tamsui (Taiwan). German service. Full data colour special QSL in German (members of the German service) received in 42 days for report sent to <deutsch@rti.org.tw> (HB)

**USA:** WRMI Okeechobee (Florida) 4980 kHz. WRMI Legends. Colour QSL received in 231 days for report sent via <<https://www.wrmi.net/index.php/reception-report-qsl/>> (HB)

The reporters of this edition of QSL CORNER have been:

BS = Bernd Seiser, Ottenau, Germany

HB = Hansjoerg Biener, Nuremberg, Germany

SG = Siegbert Gerhard, Frankfurt am Main, Germany

Considering that the editor of this page has anticipated the vacations, please be advised that if you will not find your contributions in this issue, you will surely find them in the next issue of the magazine to be released in October, as the various editorial offices will enjoy a few days off in September. As a reminder, your submissions accompanied by QSLs in jpg format, to be published in the next issue of the magazine, must be received in the editorial office by October 6 at 2200 UTC.

I wish you all happy vacations and best 73,

Dáario

## Pop Shop Radio Hope, British Columbia, Canada

At Pop Shop Radio we go around the world to bring you great stuff from all over. We play a whole variety of pop music, such as records from the 1960s and 1970s that were played on Top-40 radio stations in not only in North America but also on offshore radio and stations like Radio Luxembourg. To make it fun, we also include stuff that didn't make the Top 10. We like to show that music doesn't have to be in English to be great. Stopping off in places like Sweden, Finland, the Czech and Slovak Republics, Germany, France, Brazil, South Africa, Australia, and New Zealand we find cool records for you to groove to! We mix it all in the style of Top-40 radio of the 1960s and 1970s with jingles and real records played by a real DJ. We are everything that the boring FM corporate stations that have no personality and say they play the best variety are not. Last, but not least, Pop Shop Radio is made in the town of Hope in (super, natural) British Columbia in Canada. We are Canada's international voice to the world.

The town of Hope BC is known for many things like the filming of Rambo First Blood among other films, and as the chainsaw carving capital of the world. One of its hidden secrets is that it is home to a radio voice that reaches around the world.

Rising up from humble beginnings in September 2020, Pop Shop Radio, is proud to be celebrating its third anniversary on the air as Canada's International Voice on Shortwave. The show began as a way to say hello to the world as the COVID pandemic was ramping up and to spread a little peace and love around the world. As CBC left shortwave when it closed Radio Canada International in the early 2000s, Pop Shop Radio has worked to fill that void.

Pop Shop Radio is disk-jockey show such as you would have heard on AM radio back in the 1960s and 1970s.

Playing the hits, the misses and everything in between, it has all the fun jingles you remember and the lost-art of DJ patter that made Top 40 radio fun. All of this is brought together by a DJ named Tony Pavick in Hope BC.

Pop Shop Radio reaches an audience around the world via a medium called shortwave. The show is broadcast from transmitters in Germany and Florida and reaches listeners all over Europe, Northern Africa, India, Pakistan, China, Japan, Australia, New Zealand, Cuba, Central and South America, and of course the USA and Canada.

As a part of the third anniversary celebration, all during the month of September, Pop Shop Radio will be featuring shows highlighting some of the best of what we have played over the past three years. This includes music from as far back as the 1930s, and even non-English pop songs in languages as diverse as Chinese and Afrikaans. Our regular broadcasts can be heard here in BC on 5950 khz at 0100 UTC on UTC Monday from WRMI in Florida. Other broadcasts from Germany on Channel292 are on Wednesday at 1600 UT and Saturday 2100 UT on 3955 and 9660 khz and are directed to Europe.

An extra special broadcast from the UK, rated at 250,000 kilowatts (5 times more powerful than any AM station in the US or Canada), will take place at 0200 UTC on 5 September 2023, Labour Day on 9875 khz. Previous special broadcasts at this power, such as our Canada Day Special, met with great success and were heard as far and wide as Australia and Uruguay. Other specials have been saluted 14 CFUN, CKLW, and CHUM.

**Die Deutsche Welle strahlt seit 2011 keine Sendungen mehr in Deutsch auf Kurzwelle aus.**

**Zeitangaben in UTC = Mitteleuropäische Sommerzeit (MESZ) minus 2 Stunden /**

**Time is UTC = MEST minus 2 hours**

#### **Abkürzungen / abbreviations:**

bei Station:

Int. = International, R = Radio, St = Stimme, Vo = Voice of

#### **Senderstandorte bei Frequenz / transmitter sites:**

ARM = Armenien, BUL = Bulgarien, Eifel = Kall Krekel (DL), Ge = Gera, LTU = Litauen, N = Nauen (DL), OE = Moosbrunn / Österreich, PIN = Pinneberg (DL), ROW = Rohrbach Waal (DL), Wee = Weenermoor (DL), Wof = Wooferton / GB.

#### **Technischer Hinweis bei Frequenz:**

/USB = oberes Seitenband, /LSB = unteres Seitenband, /v = variabel, (multi) verschiedene Sprachen und Anbieter  
#= meist schwieriger Empfang

bzw. gelegentlicher Senderausfall,

## = derzeit inaktiv

alt = alternativ

x Frequenzänderung möglich

\* = digitale Sendungen (DRM),

LP / \*\* mit geringer Sendeleistung (max 500W)  
(DRM-Empfang nur mit geeigneten Empfängern möglich)

#### **Es sind nur regelmäßige Sendungen auf KW bzw. MW gelistet, Sondersendungen s. aktuelle News.**

Die Auflistung erhebt keinen Anspruch auf Vollständigkeit, alle Angaben erfolgen nach bestem Wissen und ohne Gewähr. Einige Sendungen sind auch außerhalb der eigentlichen Zielgebiete hörbar. Kurzfristig sind Änderungen möglich, um z.B. störenden Stationen auszuweichen.

Mittelwellensendungen sind stets für die Region gedacht.

Kleinsender in DL (max 500 W ERP) sind auf

[www.am-radio-stations.de](http://www.am-radio-stations.de) gelistet.

[www.plattenkiste.radio](http://www.plattenkiste.radio). (Österreich)

Es gibt noch eine Reihe lokaler Sender außerhalb Europas mit teils geringer Leistung (z.B. in den USA, Kanada, Brasilien, Australien) die stundenweise deutschsprachige Programme ausstrahlen.

**Die Sendeperiode A23 dauert bis 28. Oktober 2023.**

**Aktuelle Hinweise auf Änderungen und Ergänzungen sind stets willkommen an:**

**Redaktion: Walter Eibl, D-91074 Herzogenaurach**

## The Story of the Wireless Operator who Sent the First Morse Code Transmission Across the Atlantic

Monday, December 12, is the anniversary of one of the world's great wireless events, for it was on that date in the year 1901 that Guglielmo Marconi achieved the first transmission of a wireless signal across the Atlantic Ocean. On this, the 121st anniversary, we examine that historic event once again, and we present the story of the Wireless Operator who sent that original Morse Code signal from Poldhu in Cornwall, England to St. John's in Newfoundland, North America, a distance of 2,128 miles.

There are many critics who like to suggest that Marconi did not hear the three dots that form the letter S in Morse Code on that historic occasion, and that instead he heard the crash of the lightning strikes during the strong and windy thunderstorms. However, we would suggest that the critics are forgetting two important matters; propagation across a saltwater pathway, and the wintry weather pattern.

The available technical information indicates that the Morse Code signal was transmitted from the Marconi wireless station at Poldhu on approximately 366 metres, mediumwave 820 kHz. The fan shaped circular antenna was supported from masts standing 160 feet high, and the power to the antenna is estimated at somewhere between 60 kW and 100 kW.

The Marconi receiving system at Signal Tower near St. John's in Newfoundland was a 500 ft. trailing wire supported from a kite, and a wireless receiver that he described as a simple coherer detector with a telephone earpiece. According to the entries in Marconi's diary, he and his assistant George Kemp heard the S across the Atlantic some 20 different times during their two days of successful experimentation, Thursday and Friday, December 12 and 13, 1901.

Back during the year 1957, my young wife and I were traveling with my parents on a journey north from Port Augusta in South Australia towards the outback desert areas, a location where my Mother spent her childhood years. My Father had the mediumwave car radio tuned to a program of pleasant music, and we were amazed when the announcer gave the station identification as 2YA Wellington, in New Zealand. In those days 2YA was on the air with 60 kW on 570 kHz.

That radio signal had traveled 2,100 miles across the saltwater Tasman Sea from Titahi Bay in the North Island of New Zealand to the fringe desert areas of Australia, it was midday in New Zealand and mid-morning in South Australia. That remarkable long distance radio reception in the South Pacific with a clear listenable mediumwave signal in full daylight illustrates the fact that the Marconi signal over a saltwater pathway in the middle of winter from England to Newfoundland was not an exaggeration. They identified the signal on 20 separate occasions.

The Wireless Operator at the Marconi wireless station in Poldhu on that epic occasion back in December 1901 was 16 year old Sidney Benjamin Maddams. He was born in England on April 17, 1885, and as a young man he learned Morse Code at the Government Telegraphy School in London. His first work assignment was with the Central Telegraphy Office, which employed 5,000 men and women on their London and provincial circuits.

Young Maddams was assigned the responsibility of sending the letter S in Morse Code at 15 minute intervals from 3 pm to 7 pm (GMT-UTC), for three days beginning on Wednesday, December 11 (1901). On the first day (Wednesday), Marconi and Kemp listened in, but heard nothing. However, on the Thursday and Friday they heard the signal on at least a score of occasions.

Less than two years later (1903), young Sidney, now 18 years old, was in San Francisco on the west coast of the United States where he built a wireless communication station in the Palace Hotel for another noted wireless pioneer, Dr. Lee de Forest. Maddams stayed on at this station as an operator, though it was the other operator, Tim Furlong, who assigned the rather logical callsign PH (Palace Hotel) to this new station.

Five years later (1908), Maddams heard music on the wireless for the very first time. This historic music broadcast was coming from one of the ships in the Great White Fleet that was anchored in the Bay area.

Their music transmission came from the ship's brass band, and also from gramophone recordings, and the melody that Maddams remembered hearing was the tuneful Merry Widow Waltz. That was the music you heard at the beginning of our program today. Maddams reported his monitoring observations to the San Francisco Examiner newspaper and they awarded him \$10 for his news report.

Two years later (1910), Maddams was on service in Honolulu, Hawaii, where he married Laura Marian Townsend in the St. Andrews Cathedral. He was 25 and she was 23. They subsequently celebrated the birth of two children, Marion and George.

After a short stint at sea as the Wireless Officer aboard the Hilonian, Maddams secured an appointment as the operator at the new Marconi communication station at Kahuku on the northern edge of the main island of Oahu. That station was built by Arthur Isbell, though Maddams gave it the original callsign HU.

Two years later (1912), the Federal Telegraph Company constructed their own wireless communication station at Heeia Point at the bay on the east coast of the main Hawaiian island of Oahu, and they appointed Maddams as the manager and chief operator. Interestingly, his wife Laura was also an operator at the same station.

Two more moves took them to Sonoma and then to Palo Alto, both in California, and then back again to Honolulu where he served with Mackay Radio, from which he retired in 1943. At the end of an illustrious wireless and radio career, Sidney Benjamin Maddams died in Honolulu at the age of 84.

# WORLDWIDE DX CLUB

WORLDWIDE DX CLUB, founded in 1966, does not claim to be the biggest or best DX club in the world. Nevertheless, it offers its members and subscribers a rather good monthly bulletin (mainly in English) entitled "DX MAGAZINE" with up-to-date information on most aspects of DX'ing at the reasonable price of €18.00, £16.30 or US\$20.10 per year (air mail: €21.60, £19.60 or US\$24.15).

Since WORLDWIDE DX CLUB is the "International Department" of ARBEITSGEMEINSCHAFT DX (AGDX), the head organization of the German language DX clubs, it is able to offer its members and subscribers another DX publication in German entitled "Radio-Kurier - weltweit hören". This is jointly issued by the German DX organizations ADDX and AGDX and is available for €59.00 per year inside Germany; other countries: €70.00, £63.35 or US\$78.29. "Radio-Kurier - weltweit hören" ordered together with "DX MAGAZINE": €74.00 inside Germany; other countries: €85.00, £76.90 or US\$94.95.

Both publications, "DX MAGAZINE" as well as "Radio Kurier - weltweit hören", are also available as PDF files. If you decide to receive this version, a worldwide subscription rate of €9.00, £8.15 or US\$10.05 applicable for "DX MAGAZINE". "Radio Kurier - weltweit hören" is available for €35.00, £29.65 or US\$47.65, both publications together for €41.00, £37.15 or US\$45.80.

WORLDWIDE DX CLUB has currently the following special publications available:

1. "REPORTING GUIDE", published by the EUROPEAN DX COUNCIL (€2.00 or 2 IRC's).
2. "EDXC RADIO COUNTRIES LIST 2022", published by the EUROPEAN DX COUNCIL (€2.00 or 2 IRC's).

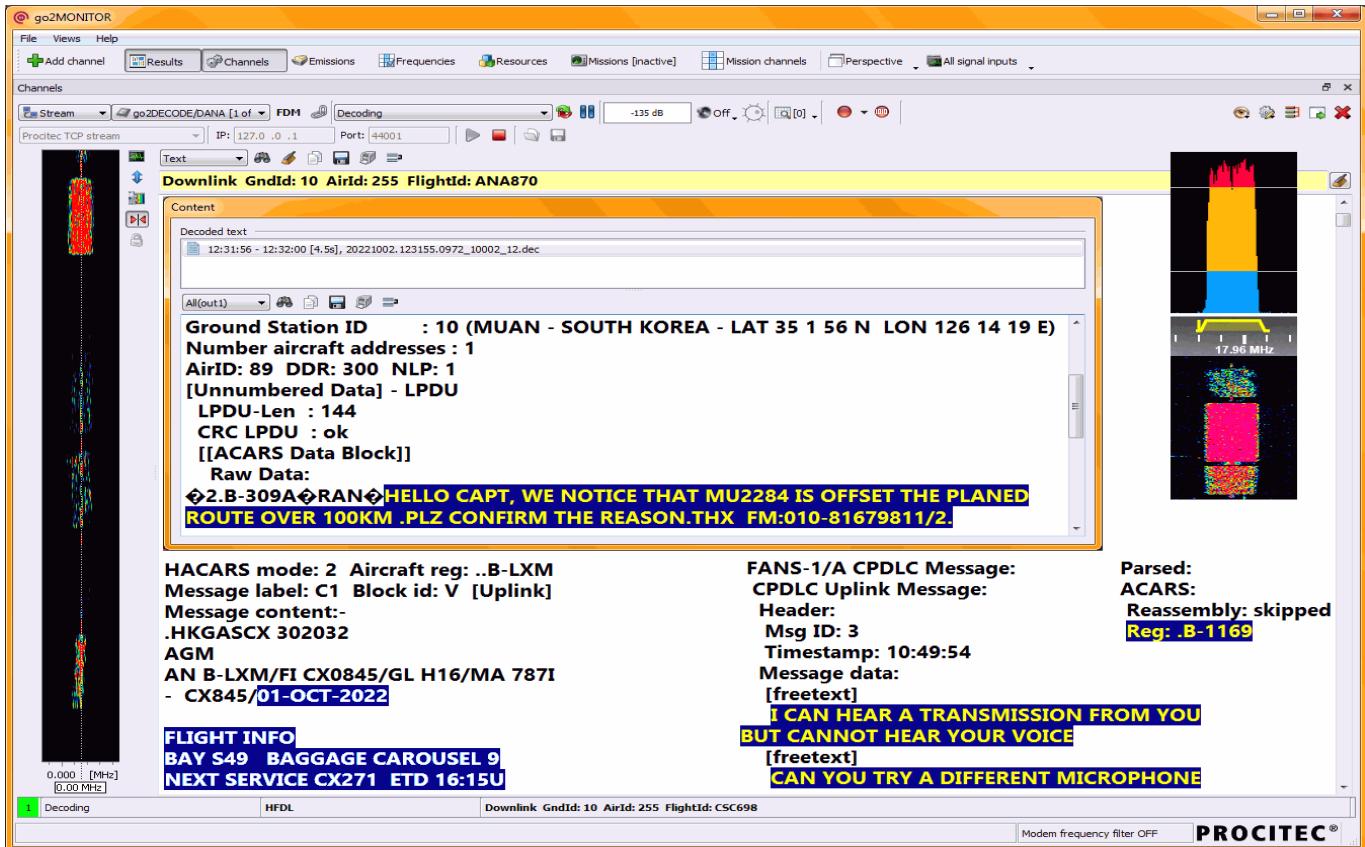

These prices include postage and packing. Delivery against advance payment by transfer to our bank accounts at Raiffeisenbank Graevenwiesbach (IBAN: DE75 5006 9345 0100 0199 84 - BIC/SWIFT-Code: GENODE51GWB) or ING/Netherlands (IBAN: NL08 INGB 0003 8228 40 - BIC/SWIFT-Code: INGBNL2A), PayPal, cheque in € drawn on a German bank (otherwise please add €5.00 for bank charges) or cash in any convertible currency.

Die obige Preise enthalten Porto und Verpackung. Lieferung gegen Vorauszahlung durch Überweisung, Scheck in € (gezogen auf eine deutsche Bank, sonst € 5,00 zusätzlich für Bankgebühren) oder PayPal. Konten: Raiffeisenbank Grävenwiesbach (IBAN: DE75 5006 9345 0100 0199 84 - BIC/SWIFT-Code: GENODE51GWB) und ING/Niederlande (IBAN: NL08 INGB 0003 8228 40 - BIC/SWIFT-Code: INGBNL2A).

For further information on WORLDWIDE DX CLUB please write to:  
WORLDWIDE DX CLUB, Postfach 1214, D-61282 Bad Homburg, GERMANY (e-mail: <[info@wwdxc.de](mailto:info@wwdxc.de)>), or visit us in the Internet at <<http://www.wwdxc.de>>.

# “Secret” Frequencies for SDR Fun Worldwide Broadcast and Utility Radio Stations

Up-to-date frequencies, schedules and digital data codes for 2023!

## 2023 Shortwave Frequency Guide - EUR 45

350 pages. 13,300 entries with all broadcast and professional utility stations worldwide. Latest schedules for 2023. Clearly arranged and really user-friendly. 27th edition!

## 2023 Super Frequency List CD - EUR 30

4,000 shortwave broadcast frequencies. 9,300 frequencies of utility radio stations, plus 24,000 formerly active frequencies. 1,000 fascinating new digital data decoder screenshots. 29th edition!

## 2023/2024 Guide to Utility Radio Stations - EUR 55 *plus Supplement Jan 2024*

550+16 pages. 9,300 frequencies and 240 digital data / SDR screenshots. Frequencies, stations, call signs, codes, abbreviations, meteo/NAVTEX/press schedules, and much more. 32nd edition!

**Special package prices available:**

**Safe 15 EUR: SWFG + UTG = 85 EUR. SWFG + CD = 60 EUR. UTG + CD = 70 EUR.**

**Safe 20 EUR: SW Frequency Guide + Utility Stations Guide + CD = 110 EUR.**

Payment by Mastercard, Visa, bank, cash (EUR only). No cheques! Worldwide postage is 9 EUR/kg. See our website and free 2023 catalogue for more products, detailed descriptions, recommendations from all over the world, and hundreds of the very latest radio monitoring screenshots. We've been leading in this field for 55 years!
