DX MAGAZINE No. 12

Vol. LX

December 2025

Dear Member,

After publishing the paper edition of our DX MAGAZINE for almost 60 years, we recently discovered that the circulation of the paper edition had reached a low of only 42 paid copies.

Therefore, we have to discontinue publication of the paper edition with today's issue, as it has become too expensive and labour-intensive. In future, we will only publish a PDF edition. This can be obtained free of charge by all members.

If you have only received the paper edition from us so far and are able to obtain and read the PDF edition, please provide us with your email address. Otherwise, we will not be able to continue supplying you with our DX MAGAZINE, but only with the 'Radio-Kurier'.

If you have already transferred money in advance for the paper edition, you will receive a refund for the relevant months. If you have any questions, please contact us.

Liebes Mitglied,

Nachdem wir fast 60 Jahre lang die Papieraussgabe unseres DX MAGAZINE veröffentlicht haben, haben wir kürzlich festgestellt, daß die Auflage der Papieraussgabe einen Tiefstand von nur noch 42 bezahlten Exemplaren erreicht hat.

Daher müssen wir die Veröffentlichung der Papieraussgabe mit der heutigen Ausgabe aufgeben, da diese mittlerweile zu teuer und zu arbeitsintensiv geworden ist. In Zukunft werden wir nur noch eine PDF-Ausgabe veröffentlichen. Diese kann von jedem Mitglied kostenlos bezogen werden.

Falls Sie bisher nur die Papier-Ausgabe von uns bezogen haben und in der Lage sind, die PDF-Ausgabe zu beziehen und zu lesen, teilen Sie uns bitte Ihre E-Mail-Adresse mit. Andernfalls könnten wir Sie nicht weiter mit unserem DX MAGAZINE beliefern, sondern nur mit dem "Radio-Kurier".

Falls Sie schon im Voraus Geld für die Papier-Ausgabe überwiesen haben sollten, erhalten Sie eine Rückzahlung für die betreffenden Monate. Falls Sie noch Fragen haben sollten, melden Sie sich bitte bei uns.

Michael Bethge - WORLDWIDE DX CLUB

Hello again,

Welcome to another issue of our DX MAGAZINE. As I have already informed you, our long time NEWS EDITOR Walter Eibl has resigned in March last year.

Therefore we still need a new NEWS EDITOR as soon as possible. If you are able and interested to become our new NEWS EDITOR, please do not hesitate to contact me. I shall support our new NEWS EDITOR with all news material we get from our members, from other DX clubs and from radio stations.

Unfortunately, the contributions of our members to the DX News section have been very rare in the last months and we had only very few contributions to our News, Logbook and QSL sections. Therefore, if you have any News, Logs or QSL information, please do not hesitate to send it to me or to the other editors on page 2 of this DX MAGAZINE.

And now over to our usual information from outside the club: (Cf. DXM 10/2025) **Klingenfuss Publications** have published their five new products for 2026 by December 2nd, 2025:

- 2026 Shortwave Frequency Guide
- 2026 Super Frequency List on CD
- 2026 Frequency Database for the PERSEUS Software-Defined Receiver
- 1997-2026 Digital Data Decoder Screenshots on USB Stick
- Supplement to the 2025/2026 Guide to Utility Radio Stations

Full information about these publications and ordering information can be found in their advertisement on the last page of this DX MAGAZINE. **(Klingenfuss Publications - Joerg Klingenfuss, Germany)**

Auch in 2026 wird es unsere bewährten DX-Camps im Naturfreundehaus Holzerbachtal geben. Inzwischen haben wir neben dem Wintercamp, vom Dienstag, dem 13.1. bis Sonntag, dem 18.1.2026

(Infos: <https://dx-camps.de/files/Radiofreunde_NRW_Wintercamp_2026.pdf>)

auch einen Termin für ein Herbstcamp, vom Dienstag, 17.11. bis Sonntag, 22.11.2026 gebucht.

(Infos: <https://dx-camps.de/files/Radiofreunde_NRW_Herbstcamp_2026.pdf>)

Das Herbstcamp schließt direkt an das Camp der Hamburger Kurzwellenfreunde in Lankau an, einige Kollegen fahren direkt von Lankau ins Holzerbachtal.

Wir würden uns freuen, Euch wieder zahlreich im Holzerbachtal begrüßen zu können. Wer Fragen oder Anregungen hat: Bitte einfach Mail schreiben an Christof Proft <christof.proft@mail.de>.

(Christof, RADIOFREUNDE NRW)

Finally, let me wish you a Merry Christmas and a very Happy and Healthy New Year 2026,

ARMENIA/TURKEY: Many SWLs may have been surprised today. Between 11500 and 11550 kHz, there is radio silence. Neither Denge Gel nor a Turkish jamming station could be heard.

The solution to this mystery is simple: Radio Dengê Gel has ended its 23-year broadcasting history. This was reported by the Kurdish news agency Ajansa Nûçeyan a Firatê (ANF) on its website
<<https://english.anf-news.com/news/the-voice-of-the-revolution-radyoya-denge-gel-has-ended-its-broadcasts-82451>>

The station began in 2001 as "Dengê Mezopotamya" (until 2012), then broadcast under the name "Dengê Kurdistanê" until 2017, and finally as "Dengê Welat". In 2023, it finally became "Dengê Gel" ("Voice of the People").

The station, which played a cat-and-mouse game with the Turkish authorities on shortwave (since 2019, Turkey has been using jammers against "Dengê Welat/Gel"), aimed its programmes on politics, literature, history and songs primarily at its Kurdish listeners. Later, a programme in Turkish, "Medya Haber" ("Media News"), was added. The programmes were produced in Denderleeuw near Brussels.

Now the station has ended its 23-year, eventful history on shortwave – closing with the Kurdish national anthem "Ey Reqîp", as reported by ANF.

FRANCE/GERMANY: Atlantic 2000, which has been booking airtime on Channel 292 since 2015, has announced another programme in its traditional slot on Saturday at 10:00 a.m. CET. Accordingly, the French-language programme will be broadcast according to the following schedule (UTC, +1=CET):

Saturday, 13 December 2025, 09:00-10:00 UTC: 6070 9670 kHz // <<http://radioatlantic2000.free.fr>>

Some time ago, the QSL policy was as follows: "Send a detailed reception report (un rapport d'écoute détaillé) of 15 minutes or more to <atlantic2000international@gmail.com>. Don't forget to include your receiver, antenna and reception location. And if you are using a WebSDR, please also state its actual location."

GERMANY: Shortwave Radio has a new presentation of its broadcast and programme schedule, which can be easily accessed via the top bar at <<https://www.shortwaveradio.de/index.php/en>>. With the revision of 8 November 2025, the station has the following broadcast schedule, which is also announced for the first week of December '49' at the time of going to press (UTC, +1=CET):

08:00-17:00: 6160 kHz

16:00-24:00: 3975 kHz

It is not worth tuning in to 6160 kHz later in the evening. The frequency is blocked from 18:00-20:00 UTC by a music programme from China Radio International on the former German-language broadcast slot.

(Dr Hansjörg Biener via Hansjoerg Biener's DX Digest #65, Nov 30)

Shortwave Service Kall switched off the shortwave frequencies 3985 and 6005 kHz in mid-November 2025, well ahead of the final broadcast end announced for 31 December 2025; Radio Mi Amigo International, on the other hand, continued to broadcast on 6085 kHz until the beginning of December. In fact, another activation was announced for a commemorative broadcast from Andorra:

Sunday, 7 December 2025, 1700 UTC (1800 CET): 6005 kHz aquiradioandorra, <<https://youtu.be/o5oj30ZAj2A>> Repeat of a broadcast by Radio Andorra (25 July 1980) (Voices of Christian Guillard, René Hervé, Anne-Marie Vincent, Jean-Jacques Debezy, Catherine Laurens, presenters Arty Parera, Michel Borry, Nadine, Stéphane Larra). <<https://www.facebook.com/events/753212107807271/>>

ISRAEL: Closure of 'Galei Zahal' radio station.

A few weeks ago, we reported on 'Galei Zahal', the Israeli military radio station. We described it as a media anomaly, an almost unique case: a military radio station that is open to the exchange of opinions, including critical voices against various governments, which often threatened to shut it down.

Now this threat seems to be becoming a reality.

The defense minister of Netanyahu's government has officially announced a proposal to end 'Galei Zahal's broadcasts.

Israeli Defense Minister Katz announced last Wednesday that he will soon submit a proposal to the government to close the Israeli Armed Forces radio station 'Galei Zahal', with the shutdown scheduled for March 1, 2026. Based on the recommendations of a commission that investigated the activities of 'Galei Zahal', the team will work to preserve Gal Galatz, a station that mainly broadcasts music and traffic reports.

Operating a civilian radio station under military control is an anomaly that does not exist in any other democratic country.

Katz added that since the 1950s, various defense ministers and IDF chiefs of staff have considered closing the station, removing it from the military framework, privatizing it, or closing its news department. However, none of these processes has been completed.

KIRIBATI: No news as yet as to when Radio Kiribati will reactivate 1440 AM after the antenna tower was accidentally damaged in mid-September. However I have found an intriguing reference to a reference to another AM frequency in the final paragraph of the following 'About Us' section on the BPA website. I suspect the reference to 1449 is actually a typo which should be 1440 ! Radio Kiribati is a public radio station owned and managed by the Broadcasting & Publications Authority (BPA), a Kiribati Government entity. It began operations in October 1954. While the government provides funding for infrastructure, it is run as a commercial station and most of its revenue comes from advertising. It also charges government bodies that wish to have programmes broadcast by the station.

Radio Kiribati's programmes cater to the general population of Kiribati; its programming is 75 percent in the local language (I-Gilbertese) and 25 percent in English, all of which is locally produced. The station also relays live sittings of the House of Parliament which are held 4 times a year. Radio Kiribati transmits via a 10 kW AM transmitter located on the Tarawa atoll and operates an FM station (250 Watt) on Kiritimati Island.

BPA also relays the ABC Radio through an AM 1449 kHz & FM station FM 89.9 MHz on Tarawa. Radio Kiribati reaches almost all residents of Kiribati.

PHILIPPINES: Radyo Pilipinas to return to shortwave on 1 December 2025. On 20 Nov 2025, John Zachary Alvarez posted the following message from Radyo Pilipinas to the Short-Wave Fan Facebook group (translated from Filipino to English):

"Back on Air! Radyo Pilipinas World Service on Shortwave, Will Again Delivered News to the Global Filipinos". The U.S. Agency for Global Media USAGM has formally announced the revival of PBS-BBS Radyo Pilipinas World Service's shortwave broadcast operations. It is widely considered one of the most important voices on the air. Starting December 1, 2025, broadcasting will resume using the facilities of the Philippines Transmitting Station in Tinang, Tarlac. The announcement, made through an Information Memorandum from USAGM Philippines Station Manager Charles Shepard, marks a positive change and strengthening of international broadcasting partnerships.

This decision ensures that RadyoPilipinas World Service will once again be able to reach a vast global Filipino audience, including our Overseas Filipino Workers (OFWs) and communities in remote areas through the reliable shortwave radio band. This important return comes after a period in which many partnerships and agreements, such as the one involving Voice of America (VOA), were severed or reduced, particularly during the early days of President Donald Trump's administration.

According to PBS-BBS Director General Fernando "Dindo" Amparo Sanga, "the re-establishment of this crucial platform is seen as a commitment to maintaining a vital information link for Filipinos across the globe". USAGM Headquarters in Washington, D.C. confirmed their approval for the resumption of broadcast operations. The Memorandum, addressed to PBS BBS World Service Station Manager Remigio Sampang, also expressed their gratitude for their continued dedication and support of the mission. ROMANIA: Dear friends, due to frequent malfunctions in the Radiocom transmitters that broadcast 'Radio Romania International' programs, we would like to inform you that, when such malfunctions occur, Radiocom switches the broadcast as quickly as possible to a backup transmitter operating on alternative frequencies for RRI programs.

If you cannot find the Spanish RRI broadcasts on the usual frequency, please switch to the corresponding alternative frequency for that program:

At 20:00 UTC, on 11730 kHz in Spain;
 At 22:00 UTC, on 17640 kHz in South America;
 At 00:00 UTC, on 15200 kHz in South America, and
 on 9510 kHz in the Caribbean;
 At 03:00 UTC, on 11800 kHz in South America and
 9720 kHz in Central America

Thank you so much for listening to RRI in Spanish and for supporting our work.

SPAIN: Spain to switch off mediumwave in December - FM and DAB+ to take over

Radio Nacional España (RNE), Spain's public broadcaster, has announced that it will switch off its mediumwave transmitters at the end of 2025.

According to an RNE statement, the majority of radio listeners in Spain have been listening to mediumwave less and less since the 1980s, following the establishment of nationwide FM coverage. Since then, the audience for medium wave has declined steadily, with RNE now reaching only 1% of the Spanish population. At the same time, fewer and fewer new radios still offer mediumwave reception, and the same applies to radio receivers in many new cars.

According to current plans, RNE's mediumwave transmissions will end before 31 December this year. RNE intends to inform its listeners about this through a campaign presenting the various alternative reception options, including terrestrial digital radio and web radio. At the same time, the aim is to improve the coverage of FM and DAB+ transmitter networks in those regions where medium wave has previously offered more reliable reception.

Fans of long-distance radio reception still have a few weeks left to try to receive RNE's various regional stations on medium wave. Frequencies, transmitter locations and times of regional programmes can be found in the current WRTH or at <<http://www.mwlist.org>>.

(Harald Kuhl-D DL1AX via Funkamateure Nov 27)

News received from inside RNE indicate that regional engineers have already received the order to lower the power of all MW transmitters in their respective areas. Local station managers have been instructed to refer any listener complaints to the "Defensora de la Audiencia" (Ombudsman). High- power stations have been broadcasting at only half power for a long time. I don't know if this order means an even greater reduction, or if it doesn't affect them at all. (Mauricio Molano, Spain via MW List io Group; via NZDXT The New Zealand Radio DX League Nov 2025, Nov 2)

12030 kHz on Wed Nov 12 at 2300UT, accurate timesignal and Spanish not English, "**Radio Exterior, la Voz de España en el mundo**", 2301 UT finally open weekly English with Marilyn Quintana only, introducing topics such as current state of democracy, 2304 UT Lebanon correspondent about problems with Israel. Fading + accents + rate of speech hinder full comprehension, as hard as I try. 12030kHz direct is best despite off the back of ME beam; still NO 9690 kHz to North America which would have been much better readable; audible on 17715 kHz weaker to SoAM, and 17755 kHz trace to Africa.

UNITED ARAB EMIRATES: The **Russian Service** of **The World Radio Network** (WRN) via ENC A'Dhabbaya has changed from 5990 to 9820 kHz.

Quote from the program: "Testing a new shortwave frequency. Rebroadcasting via a transmitter in A'Dhabbaya, United Arab Emirates. Due to interference on 5990 kHz, the World Radio Network, broadcasting in Russian from 17:00 to 20:00 UT, will broadcast on a new frequency of 9820 kHz starting Tuesday, November 18, for a week. A decision on the future broadcast frequency will be made based on the results of program monitoring."

World Radio Network in Russian offers a 24 hour service, of which three hours is also broadcast on shortwave. The WRN Russian website at <<https://wrn.world/>> says "The World Radio Network is a multicultural channel offering its listeners programming from many countries. We provide our listeners with the opportunity to directly immerse themselves in the national cultures of many countries and receive first-hand information about current events, all in Russian and on a single channel, without intermediaries."

UNITED KINGDOM/ASCENSION ISLAND: (Cf. also ASCENSION ISLAND) 9765 kHz Sat Nov 22 at 2046 UT, JBA S6/S7 between noise bursts into Nailsea UK remote, **GTA 'Global Talk America'** in Hausa, improving slightly by 2058 UT, mentioned Hausa and 'Amurka'. Had tried numerous other remotes in Europe and Africa but no significant signal from listed ENC-Woofferton site for this new service, in HFCC.org list as Mon-Sat only at 2030-2100 UT. So Encompass brokery is handling it.

GTA started one week ago on Nov 15, also with morning airing at 0500-0530 UT on 6170 kHz via BBC ENC Ascension Island relay, via 'English Bay' site, where Gianni Serra, Italy first reported it to the wor iog on Nov 21. Just in case, I check 6170 kHz at 0500 UT Nov 23, but no signal since it's UT Sunday.

Has led to much discussion in wor iog. Summarizing: based in Washington DC, seems well-developed already, suspected initiated by ex-VOA Hausa service staffers; already being relayed by various FM stations in Nigeria, elsewhere. So are there going to be more successor language services replacing VOA crushed by Trump president?

11870 kHz. Sat, Nov 8, 2025. 2101-2118 UT, **Radio Vaticana**, SMdiGaleria-CVA site, in Portuguese to WeAF. Woman announcer presents Vatican News; The apostolic blessing of Pope Leo XIV; Mr Silvonei Jose talking news too; News reporter from Beira City, Portugal. Good reception: 45554.

(Jose Ronaldo Xavier, Cabedelo-PB-BRA, hcdx Nov 8)

21730 kHz **Vatican Radio**, Sta. Maria di Galeria bcast center to Caribbean, Spanish, Nov 6, 1305-1315 UT. News from the Catholic Church, information about Pope Leo XIV, followed by a music segment, a commentary about a civil war and the absence of democracy. S=6.

(Rudolf Grimm, Sao Bernardo-Ibiuna-SP-BRA, via wwdxc BC-DX TopNews Nov 11)

17800 kHz, Nov 27 at 1529* UT tune-in just in time to hear **Vatican Radio** IS and off; retune to stronger 15565 kHz at 1530 UT VR IS, "LIX" catch- phrase, opening Ethiopian language, S=9+5/15dB. One of best signals on band as we continue to marvel at how well SMG broadcasts into the opposite direxion of nominal targets. 17800 kHz was Malayalam to South Asia, 250 kW at 98 degrees; 15565 kHz Amharic to E Africa, 250 kW at 139 degrees, so directly off the back would be 319 degrees toward North America.

(Glenn Hauser-OK-USA, hcdx & wor Nov 27)

VIETNAM: 9840 kHz Voice of Vietnam via Hanoi Son Tay site center with Indonesian service, Nov 16, fair signal at 1326 UT with usual melodramatic Eastern Block-style vocal mx with orch. Brief anmt by YL in Bahasa at 1327 UT and then xmtr cut. Was // 12020 kHz which was stronger but suffering from RTTY QRM. Then xmtr back on at *1328-UT for next segment, the usual 1330 UT English slot, but with weaker signal after beam change.

Dear Friends,

Welcome to the last edition of Logbook for this year.

Due to a mistake I mentioned in my last editorial footnote that I have been editing since December 2001.

Actually it should be December 2000. So that is why I informed the completion of my 25th year.

Thanks to Bernd and Siegbert for their loggings for this month.

It was sad to note that the printed WRTH book would be gone from next year.
 With everything going digital and the high cost of printing it was a natural outcome.
 Looking forward to your loggings for the next edition,

Wishing you All a Merry Christmas and a Very Happy New Year 2025,

Ashok Kumar Bose

---	---	---

Although this page was not published in the last issue of the magazine as there were no contributions, this month too very few contributions have arrived and this is very sad, as we can think that radio stations are starting to dislike our ratings by not confirming them. Or many members of this magazine do not consider it useful to send their contributions, and this is very sorry, with the hope that this observation of mine is not a foreboding. The editorial staff wishes you a Merry Christmas with your loved ones, and we ask anyone who would like to receive a reminder a few weeks in advance, to remember the expiration date and some small rules for exact cooperation please send their email address to the email address on this page.

My best 73, *Dario*

WWDXC-QSL-and-INFO-Series – Pop Shop Radio, Hope, BC, Canada

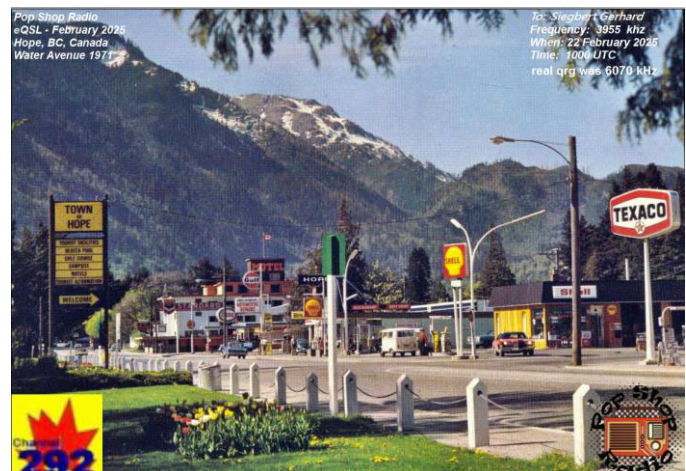

by Siegbert Gerhard, Frankfurt am Main, using info and detailed eQSL received by station operator DJ Tony

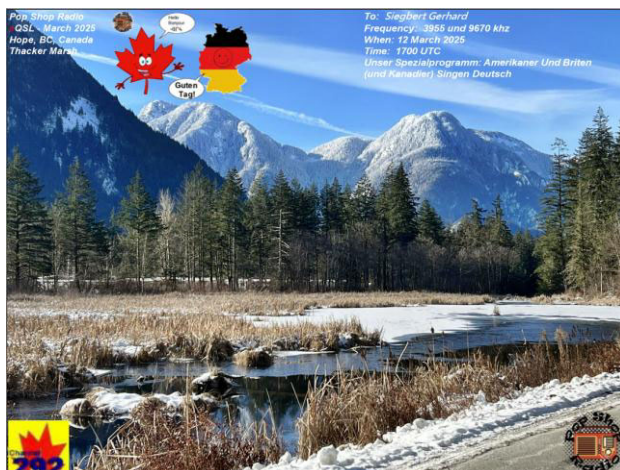

DJ Tony: At Pop Shop Radio we go around the world to bring you great stuff from all over. We play a whole variety of pop music, such as records from the 1960s and 1970s that were played on Top-40 radio stations not only in North America but also on offshore radio and stations like Radio Luxembourg. To make it fun, we also include stuff that didn't make the Top 10. We like to show that music doesn't have to be in English to be great. Stopping off in places like Sweden, Finland, the Czech and Slovak Republics, Germany, France, Brazil, South Africa, Australia, and New Zealand we find cool records for you to groove to! We mix it all in the style of Top-40 radio of the 1960s and 1970s with jingles and real records played by a real DJ. We are everything that the boring FM corporate stations that have no personality and say they play the best variety are not. Last, but not least, Pop Shop Radio is made in the town of Hope in (super, natural) British Columbia in Canada. We are Canada's international voice to the world. Thank you very much, dear DJ Tony!
