Cover: Peter Pohle + Jürgen Kauer (KAVOP)

DX MAGAZINE No. 5

Vol. XLI

May 2006

(Cf. DXM 4/2006) Please remember that our News Editor Jürgen Kubiak will resign after 10 years of compiling our News section. His last edition will be DX MAGAZINE 8/9, i.e. our annual summer edition. Therefore we need a new **News Editor** as from October 2006. If YOU are interested to compile this section for us, please do not hesitate to contact me.

Hello again,

Welcome to another issue of our DX MAGAZINE. Since we have no news from inside the club this month, let's just start with our news from outside the club:

A few months ago the most useful independent Receiver Shopping List hosted by Radio Netherlands was unfortunately taken down. Changing editorial priorities and budget cuts meant that Radio Netherlands was unable to continue supporting this feature, and it seemed logical to hand over the material to a hobby club. Although it is about five years since the last review was written, some of the receivers featured are still available either new or secondhand. Radio Netherlands is pleased that all the hard work that went in to compiling these reports has not gone to waste. The Receiver Shopping List's has been moved to its new home on the recently relaunched website of the Medium Wave Circle <<http://www.mwcircle.org/page100.htm>>.

(Steve Whitt - General Editor Medium Wave News- <editor@mwcircle.org>)

WORLD RADIO TV HANDBOOK is pleased to announce that a Summer schedules file is now available for free download at the WRTH web site <<http://www.wrth.com>>. Please follow the simple instructions on their site to download the file. The file is a PDF document and you will require the free Adobe Acrobat Reader 5 or above to read it. The file contains Summer 06 broadcasting schedules from all International and selected clandestine/target broadcasters. Also included are 'By Frequency' LW, MW and SW listings of the stations in the file plus a new feature for the Summer web file: broadcasts in English, French, German, Portuguese and Spanish. The file contains 113 pages and the page layout is the same as WRTH and is approximately 450 kB.

(Sean D. Gilbert, G4UCJ/G4001SWL, International Editor - World Radio TV Handbook)

A.I.R., the Association of Italian Radio Listeners, invites all worldwide radio listeners to join the **United Europe Award**. All you have to do is to tune in to any European broadcast radio station with at least one listening confirmation (QSL) from a European Country in any language and date. Any kind of QSL referred to modulation signals in all radio band is accepted. Participation fee is 4 IRCs or 2 Euro, or an equivalent amount in national currency. Full information is available from the following E-Mail address: Fiorenzo Repetto <e404@libero.it>. All participants will receive a diploma in UNI A4 size and printed in colour on parchment paper. The name of listeners awarded with the diploma will be printed in the AIR magazine RADIORAMA. Once a year during the AIR DX Meeting a special prize will be granted by lot to participant who have joined in the previous 12 months.

(Cf. DXM 4/06, Seite 36) Wie wir von OM Peter Hell gerade erfahren, sind während des **32. Internationalen SWLCS-DX-Camps** folgende Hörertreffen geplant: Das Jahrestreffen des 1. Hörerklubs von Radio Slowakei International findet voraussichtlich am Samstag (22. Juli) auf dem Campgelände statt. Auch findet ein Hörertreffen von China Radio International statt. Hierzu hat sich Herr Li Yan von CRI angesagt. Erstmals will auch die Stimme der Türkei beim Camp in Merchweiler dabei sein. Es ist geplant, daß ein

Mitarbeiter der deutschen Redaktion zum "Camp 2006" kommt.

Unser Mitglied OM Walter Ivenz aus Österreich teilte uns noch folgende Österreich-Termine für Juni und Juli 2006 mit: Wie voriges Jahr wird auch heuer das traditionelle **ADXB-OE DX-Camp** *nicht* in Döbriach sondern in Weissenbach am Attersee stattfinden. Termin: 29.7.06 - 11.08.06. OM Franz Ladner hat auf seiner Internetseite Details dazu: <<http://www.dxcamp.org>>.

Am 09.06.06 findet in Obergrafendorf ein HCJB-Freundestreffen statt. Zum Open House ab 17 Uhr laden Helga und Walter Baier ein. Wir hören von Iris Rauscher aus der Arbeit von Radio HCJB und sehen Bilder aus den Anden. Anmeldung erbeten bis Mitte Mai bei Walter & Helga Baier, Rennersdorf 59, A-3200 Obergrafendorf, Telefon +43 27474156, E-Mail <wuh.baier@aon.at>.

Am 10.06.06 findet in Wien ein DX Treffen der ADXB-OE um 16 Uhr statt. Der Club lädt ein zu einem HCJB Treffen im Funkhaus des Österreichischen Rundfunks in Wien. Iris Rauscher berichtet über die Arbeit von Radio HCJB und zeigt eine Powerpoint Präsentation. Adresse: Argentinierstrasse 30a. Weitere Informationen von Harald Süß in der A.-Severstrasse 2-28 / Haus 12, A-2231 Strasshof-Silberwald oder per E-Mail <adxbsuess@aon.at>.

And with this best wishes and good DX until next month from

NEWS ABOUT BROADCASTING (+other) STATIONS

Dr. Juergen Kubiak · Goltzstr. 19 · D-10781 Berlin · GERMANY

ALASKA: *KNLS*, Anchor Point, Alaska mailing address: Station KNLS, Anchor Point, AK 99556, USA. Fax: +615-371-8791 and email: <KNLS@aol.com> (for reception reports subject should be "reception report" without quotes). KNLS will provide only ONE QSL for each report, regardless the number of entries and doesn't NOT provide QSL's for other transmitter operators who may air World Christian Broadcasting programs. Only 200 special cards are awarded each season. Each card is individually numbered and features a full color photo of Alaska. To qualify, a report must include: The date and time (UTC only) of the transmission, the frequency and as many program details as you can supply. At the web you will find KNLS at the URL <www.knls.org>. KNLS Broadcast Schedule, starting March 26, 2006:

(Alokesh Gupta via WDXC-HQ; May 05, 2006)

BELARUS: Station *Radio Belarus* began broadcasting as Radio Station Belarus in 1962 (Radio Minsk) only in the Belorussian language and was an integral part of the Soviet Union's unified external broadcasting system. The idea that lied behind the establishment of Radio Station Belarus in 1962 was to provide the Belorussian communities abroad (mainly in the European region) with a link to their homeland. The programs also had to convey Moscow's point of view on world affairs and events. The fact that the output was aimed at the Western listener affected the general nature and style of reporting. The senior management in Moscow realized that the programs would be more convincing and appealing if they were more or less comparable to international standards. Unlike all the other broadcasters catering for internal audiences in the country the staff of Radio Station Belarus was allowed greater liberty in its coverage and analysis of news. In 1985 when on the threshold of Perestroika an enthusiastic team of journalists working at Radio Station Belarus undertook an initiative to expand their audience and launch a new service in the German language, they had to get over innumerable bureaucratic barriers to obtain permission from the headquarters in Moscow. After the disintegration of the Soviet Union in 1991, as the whole country plunged into the maelstrom of independence, Radio Station Belarus gained an opportunity to add to its traditional focus an international perspective. In January 1998 new programs started to go out in English and Russian. The

English language service primarily deals with political and economic news from Belarus and CIS states, relations between Belarus and the world, analysis of current issues with an emphasis on the international aspect, culture and music. Radio station "Belarus" started on-line Internet broadcast in English language on January 3, 2005. On September 1, 2005 it increased the air time from 5 to 10 hours, including two 5-hour blocks. WWW: <<http://www.tvr.by>>. Postal address: Radio Station Belarus, Belarusian Radio, 4, Krasnaya St., Minsk 220807, Belarus. Fax: (+375-17) 284 85 74. E-mail: <radiostation-belarus@tvr.by> (JKB)

CANADA: Radio Canada International - RCI has been broadcasting to the world since 1945.

RCI broadcasts a full range of daily and weekly programs in English, French, Spanish, Russian, Ukrainian, Mandarin, Cantonese, Arabic and Portuguese. RCI also broadcasts a bouquet of CBC/Radio-Canada programs. These consist of national and international news, regional events from across Canada, in-depth analysis, reports and interviews on political, economic, social, scientific and cultural issues. RCI also produces weekly and monthly programs that are sent to numerous partner stations around the world and broadcast locally in English, French, Spanish, Russian and Chinese: Canada à la Carte, Canadá a la Carta and Panorama provide a series of reports and interviews broadcast on Radio Canada International concerning diverse national and international issues. RCI produces language lessons designed for radio. These English and French lessons aim to teach children from 7 to 12 years old and their parents, either one or the other official language of Canada (French and English). Using tales, legends, nursery rhymes, traditional songs and games from Canadian culture and tradition, this program combines educational and entertaining means to teach children a second language. These programs are broadcast on RCI as well as on its web site.

Radio Canada International Final Schedule for Shortwave (A06). Effective April 2nd, 2006 to October 29th, 2006.

(Schedule Issued on May 5th, 2006, RCI websites via JKB)

ECUADOR: Even as *HCJB World Radio* has begun dismantling shortwave radio antennas at its Ecuador broadcast site in Pifo, strategic opportunities for spreading the gospel via radio are emerging for the mission. To accommodate new international airport construction near the capital city of Quito, missionary engineers and national staff have lowered a two-antenna curtain array that Radio Station HCJB, the "Voice of the Andes," formerly used to air programs to the South Pacific and Europe. In 2003 the mission switched to local and regional AM and FM broadcasts in these regions while refocusing its Ecuador-based international shortwave outreach on Latin America. Other antennas will also be dismantled in accordance with the mission's late-December agreement with the Quito Airport Corporation (CORPAQ) which is compensating the mission for labor, but not providing funds for new site construction. "We know that 30 towers at the Pifo site have to come down by December 2007," explained Jim Estes, director of HCJB World Radio's Latin America region, referring to antenna systems that could obstruct the approach of landing planes. Pifo is a town about 15 miles east of Quito. Of 48 towers sustaining 32 antenna systems on the 110-acre site, another 18 lower-height antennas-whose signals do reach Latin America-will not impede approach. But those too will be dismantled by the time airport operations are expected to begin in 2009. Mission leadership has determined that the station will not risk potential radio interference to future air traffic communications once commercial flights begin. Barring unforeseen circumstances, all transmissions from the Pifo site (including Spanish, Portuguese, German, Low German, English and various indigenous languages, including Quichua) are expected to end sometime in 2009. Beyond that, Estes and Radio Director Doug Weber are considering various options, including the idea of building a new, smaller site in Ecuador as the mission reviews how shortwave radio in Ecuador fits into its objectives of reaching the world for Christ. Other options include buying airtime from other broadcasters or placing transmitters at other sites owned by likeminded missions. "We're going through a process right now with our engineering crew of studying all three of those options to see what the cost is," Estes said. "And cost is one of the issues for us. We're trying to be as economical as we can be." A 100-kilowatt transmitter has already been shipped from Pifo to HCJB World Radio-Australia's shortwave site at Kununurra. That facility began transmissions in mostly Asian languages (in addition to English) in January 2003. Staff at the Australian site expect the transmitter to be on the air by early April. Ten shortwave transmitters remain in Ecuador where Radio Station HCJB began broadcasting from Quito in 1931. The international transmitter site was later moved to Pifo in the early 1950s. Four of those transmitters were designed and built at the HCJB World Radio Engineering Center in Elkhart, Ind., including a powerful 500,000-watt unit. Changes at Pifo are not expected to diminish the mission's participation in the World by Radio (previously known as World by 2000) effort begun in 1985 whereby Christian international broadcasters committed to make gospel broadcasts available in all the world's major languages. Of the 28 World by Radio languages involving HCJB World Radio, those that once aired from Quito have since been shifted to other locations, including a shortwave site in the U.K. that reaches the Euro-Asia and North Africa/Middle East regions. Of more than a dozen languages that air from Australia, two-Bhojpuri and Chattisgarhi, both spoken in India-are World by Radio languages. Still other World by Radio languages are aired by local stations and networks worldwide. "We're involved in radio all around the world, but our involvement is much different than what we've done historically here from Ecuador," Estes said. "It's more of an involvement where we're helping local people develop their radio ministries to reach

their own people. "Here in Latin America we've helped [radio ministries] everywhere from Buenos Aires up to Havana with such things as studios, equipment, technical advice and training on how to do radio," he added. "It's quite exciting to see." Since the 1990s the mission has aided local Christian radio endeavors in some 300 cities in more than 100 countries while facilitating network programming via satellite in all but one of its five global regions. Assistance to local partners is facilitated by the engineering center, and the center's pioneering work in digital shortwave radio also presses on, with continued development and testing of Digital Radio Mondial (DRM) equipment -digital broadcasting for the shortwave transmitters produced there. The Pifo site is part of that project, said Weber, who also heads the DRM task force for HCJB World Radio. "We have participated in DRM tests from down here with the DRM consortium, and we will continue to do tests over the next few years," he explained. "We are very much monitoring DRM in its development in Latin America, hoping that we can eventually use that technology and be a pioneer within Latin America, not only in digital shortwave but in digital AM." An announcement 10 years ago had alerted the mission's engineers that Quito's long-awaited new airport might be built just six miles from the mission's shortwave facilities at Pifo. Impending changes looked more certain by mid-1997 when aviation authorities said that due to potential interference, HCJB needed to dismantle its Pifo installations. Subsequent plans to dismantle and move the Pifo installation to Ecuador's coast were first tabled in 2003 by mission leadership, and later scrapped due to concerns about increased energy costs. Electricity for the high-powered transmitters has been generated at a mission-built hydroelectric plant in nearby Papallacta. (Press Release from HCJB World Radio; via Harold Goerzen, via Alokesh Gupta, via WDXC-HQ; April 8, 2006)

HCJB's analog English broadcasts from the Pifo, Ecuador transmitter site ended on Saturday, May 6, 2006. The English Language Service will continue in Quito, Ecuador, but will make a major shift into focusing on programming and supporting ministries for English-as-a-second-language, primarily within Spanish programming, but with the hope that it can be used elsewhere too. HCJB did not make this decision based on reduced financial budgets nor because HCJB is now moving to Internet-based radio as many other stations have done. That is not the case. The decision was made based on ministry needs and ministry focus. The DX Partyline will continue, even though it will no longer air locally from Pifo, at least in the analog mode. It is currently on three other stations: HCJB Australia, WRMI – Radio Miami International (USA), and WWCN (USA). However, as of the 3 June broadcast, the DX Partyline will become a 14.5-minute program. HCJB has have confirmation from WWCN, WRMI and HCJB Australia that they will continue to carry the DX Partyline in its new format. The first broadcast of the DX Partyline was on May 29, 1961. The program was conceived by and first produced by Hardy Hayes. (Allen Graham - Producer of DX Partyline, via EDXP-FORUM, via WDXC-HQ; May 07, 2006)

EUROPE: Radio Free Europe - RFE / Radio Liberty - RL is a U.S. government-funded, non-profit corporation broadcasting to the former Soviet Union and Eastern Europe. With the recent addition of Radio Free Afghanistan, RFE/RL broadcasts in 32 languages for more than 1,000 hours per week. Most programs are available on FM and medium wave (MW or AM) frequencies on local radio stations in countries throughout the broadcast area. Shortwave schedule as of 14 May 2006:

Radio Sawa, a project of the Voice of America, is a 24-hour, seven-day-a-week, Arabic-language service aimed at listeners under 30. Launched in March 2002. It broadcasts news, analysis, interviews, opinion pieces, sports, weather, music, and features on a variety of political and social issues. Radio Sawa is available to millions of listeners across the Middle East and as well as on the Internet and through the digital radio satellite channels of Nilesat, Arabsat and Eutelsat Hotbird. The service will operate from Washington and Dubai, United Arab Emirates.

Radio Farda, which means "Radio Tomorrow" in Persian, is a joint effort of two BBG entities: Radio Free Europe/Radio Liberty (RFE/RL) and Voice of America (VOA). Operated from Washington, D.C. and Prague, Czech Republic, Radio Farda produces fresh news and information at least twice an hour, with longer news programming in the morning and the evening. Radio Farda also broadcasts a combination of popular Persian and Western music. The station operates 24 hours a day on medium wave, digital audio satellite, and on the Internet as well as 21 hours a day on shortwave. Radio Farda complements the VOA's Persian-language radio and television broadcasts into Iran.
(VOA at the web via JKB; 14 May 2006)

The **Office of Cuba Broadcasting - OCB** directs the operations of **Radio Martí** and TV Martí, the broadcast services that provide Spanish-language news, features, and entertainment programs to Cuba. Both stations follow Voice of America's journalistic standards and guidelines for presenting news and information in an accurate and objective manner. Radio Martí broadcasts seven days a week, 24 hours a day, on medium wave (MW or AM) and short wave. TV Martí broadcasts four-and-a-half hours daily, including newscasts as well as programs about public affairs, culture, music, sports, and entertainment. The commentary and information broadcast by the stations promote the free flow of information and ideas in Cuba.

(RFA website via JKB, 13 May 2006)

UZBEKISTAN: Unfortunately, due to the cut-off of short-wave broadcasting of RTI - *Radio Tashkent International* have lost many of their listeners. There are only few who are able to listen to the programs in Internet. Therefore they received only a few e-mail messages. They are from Spain, Morocco, India, Bangladesh, Pakistan. (RTI website as of February 24, 2006; via JKB)

VATICAN: A06 schedule of *Vatican Radio*.

Thanks a lot to our club members for your contributions:

JPT : Jose Pedro Turner, Gondomar, Portugal. SONY SW - 77 & SONY - 7600 GR with 25 metres long wire, ATU, preselector etc.
 MF : Michael Frese, Osnabrueck, Germany. SONY ICF SW 7600G with Telescopic antenna.
 RAD : Rich D'Angelo, Wyomissing, Pennsylvania, USA. Ten-Tec RX-340 & Drake R-8B with 500/200 feet long wire, Datong FL3.
 RL : Richard Lemke, St. Albert, Alberta, Canada. JRC NRD-535 HF & Grundig YB 550 PE with random long wire antennas.

Dear Friends,

Welcome to the May edition of the Logbook. Thanks to our club members for their loggings.

If the warm weather in Northern hemisphere with nice propagation conditions helps you to listen to the radio then please keep sending the loggings.

Till next issue it's 73's from your Editor,

Ashok Kumar Bose
