DX MAGAZINE No. 12

Vol. XLIV

December 2009

Hello again,

Welcome to the last issue of our DX MAGAZINE in this year 2009. Let me take this opportunity to thank you very much for all your support during this year.

Klingenfuss Publications have published their five new products for 2010 on December 8th:

- 2010 Super Frequency List on CD
- 2010 Shortwave Frequency Guide
- 2010 Frequency Database for the PERSEUS Software-Defined Receiver
- 1997-2010 Digital Data Decoder Screenshots on CD
- Free Supplement January 2010 to the 2009/2010 Guide to Utility Radio Stations

We've worked around the clock and hundreds of advance orders have been mailed by Thursday 10 December.

Larry Magne's Passport to World Band Radio has been discontinued: there will be no 2010 edition and beyond. By consequence, our 2010 Shortwave Frequency Guide remains the only international handbook that gives you full schedule details for each entry in the unique broadcast frequency list.

On our updated website <<http://www.klingenfuss.org>> you can download full A4 size PDF sample pages of our latest printed products as well as the new 2010 catalogue, plus detailed product descriptions, sample pages, screenshots, and a list of dealers worldwide - from Australia to the United States of America. Alternatively, you may ask for our free 24-pages 2010 printed catalogue to your postal address.

Deadline for the very latest 2010 broadcast schedules published in the brandnew Shortwave Frequency Guide was on 20 November 2009. Unlike traditional publications in this field, our clear layout and new typeface provides for excellent legibility. See the brandnew PDF sample pages!

Apart from the usual up-to-date broadcast and utility station and schedule databases, the 2010 Super Frequency List on CD now covers 353 fascinating new digital data decoder screenshots from professional HF stations around the globe.

Our product Digital Data Decoder Screenshots on CD now covers more than 7,000 (seven thousand!) digital data decoder screenshots from 1997 to today, essentially produced with WAVECOM equipment. Feed your Windows PC with this CD, and the "slide show" will keep you busy for a few days - or weeks!

The free Supplement January 2010 to the 2009/2010 Guide to Utility Radio Stations can be downloaded from our website as well. Just click "Free Supplement Jan '10". **(Klingenfuss Publications - Jörg Klingenfuss)**

Also Bob Padula has published the **Australian SW Guide 24** (B09 edition) in November and sent it to people who had ordered and paid for it. There is only a PDF edition this time divided in four sections:

1. Listing by Studio Country
2. Listing by Frequency
3. Listing by Start Time
4. Scope document

It has nearly 600 entries for each Section Listing:

- Broadcasts in English to Australia, NZ, Pacific, Asia
- Broadcasts in languages other than English for Australia, Pacific, NZ

If you want the product, please send me A\$10 (or US\$10, five IRCs). Full details concerning ordering and payment options are at the EDXP Home Page, at <<http://edxp.org>>. **(Bob Padula)**

Finally, let me wish you a Merry Christmas and a very Happy New Year

NEWS ABOUT BROADCASTING (+other) STATIONS

Walter Eibl Postfach 15 45 D-91005 Erlangen GERMANY

The last edition in 2009: It is me/us to thank all supporting this column with updated infos – and it will be good if there will be some more contributors.

Last month there was a big overflow of infos and scheds, therefore this month some elder dated ones to find here. This month I omitted some infos on mediumwave transmissions – space is rare in our printed media.

The best wishes for 2010!

AUSTRALIA / CHILE - Re. CVC Darwin. So indeed shortwave appears to be a done deal for Christian Vision. And yes, the governmental body that operated the Australian broadcasting transmitters at this time closed the Darwin/Cox site in 1997, following budget cuts for foreign broadcasting. It is also correct that in 2000 the site had been leased to Christian Vision for ten years, and probably (although not necessarily) they simply let the lease run out now instead of renewing it. Now the question is if Broadcast Australia or another operator will step in. It could happen, but I would not count on it.

Concerning the transmission equipment: At present it consists of one of the original Collins transmitters from 1968 (three such rigs are still in use at Sackville, too) which can now be manually tuned only, requiring about 15 minutes.

Otherwise it are three rather modern Thomson transmitters, two originally delivered to the Cox site in 1994, the third one moved in from Carnarvon after this site had been closed in 1996.

Reportedly Christian Vision brought in two Continental 100 kW transmitters from somewhere, replacing the two other old Collins rigs. Perhaps they are not in use at all, or is there a time when more than four frequencies are on air simultaneously?

Next question: What about CVC Spanish and the Calera de Tango transmitters? I would not count on Christian Vision keeping their shortwave activities in Chile either.

CANADA - 6070 The low powered CFRX is back on the air again with 1 kW on 6070 kHz. This shortwave station was off the air for two years, while new equipment was obtained and installed. After it was re-activated, electronic problems occurred and the transmitter was shipped back to New York for refurbishing. It has since been re-delivered to Toronto and re-installed at the mediumwave location. The signal nowadays is quite weak in the United States due to a beam orientation for listeners in Canada. Signal fade in can be heard best around sunrise (Adrian Peterson-USA, AWR Wavescan script Nov 29 direct and via dxld)

CYPRUS - 9760, Cyprus Broadcasting Corp, *2215-2245*, Dec 4, sign on with Greek music & Greek talk. Sign off with Greek music. Fair to good. // 7210 - mixing with China. // 6180 - mixing with All India Radio in English until their 2230 sign off (Brian Alexander, PA, DXLD) - Weekends only! (we)

CZECH REPUBLIC - Radio Prague heard with the German service on Dec. 6th at 1745 on new 7285 kHz, presumably from Sines. Good signal but suffers from about 900 Hz het from Radio Mali, here until 1800. (Robert Foerster, Germany, Dec 9, DXLD)

DIEGO GARCIA - 4319-USB, AFN, 0028-0038, Dec 1, English. End of sports talk program; "Armed Forces Network" in passing; "Face the Nation" at 0031 with members of Senate Armed Forces Committee re Bin Laden & Taliban; fair at best (Scott R. ERITREA - 7209.98, VOBME-1, Asmara, 1923, Nov 23, Tigrinya? announcement, US pop songs including personal favourites like Linda Ronstadt "All my life" and Evanescence "My Immortal" so I quite enjoyed myself. Clear frequency but sandwiched between 7215 CRI Cantonese and 7205 VOIRI Russian. Carrier off 2004 after sung NA? and 3 minutes of dead air, obviously running late. (Martien Groot, Schoorl, Netherlands, dxldyg via DXLD)

ETHIOPIA - 6890, Radio Fana; 2050-2101:14*, 5-Dec; Lite vocal music; very brief announcement by W in unknown language at s/off. SIO=343, brief ute blasts. 100% list log.

7110, Radio Ethiopia (presumed); 0544, 5-Dec; M in unknown language with peppy music. SIO=252+; // 9704.2, poor; nothing // on 7165 or 9560 (Harold Frodge, MI, DXpedition, DXLD)

7110, Radio Ethiopia, *0259-0310, Dec 3, sign on with electronic keyboard IS. Talk in listed Amharic at 0300. Horn of Africa music at 0303. Weak but readable. No //s heard at sign on but at 0423 check heard // 5990.30, 9704.18 (Brian Alexander, PA, DXLD)

7165, R. Ethiopia, Geja Jawe, 1605-1611, 05 Dec, English, news about Ethiopia, then a sudden signal carrying some program in vernacular at 1610 followed by a jamming signal at 1611 (Carlos Gonçalves, Portugal)

GABON - 9580, Africa NO. 1, 2128 29 Oct, music, two OMs with talk, SIO 252 (Steve Calver, Letchworth, Herts., England, Dec BDXC-UK Communication via DXLD)

9580, Africa Numéro Un, good signal, better than usual, with hilife music Dec 6 at 0651; 0653 ID, ``de Libreville et de Moyabi, au Gabon``. You'd think CVC Zambia on 9430 would also be well-heard, but not tonight; normally it's better than ANU. 0700, a four-pip timesignal ending two seconds late, compared to WWV! And into brief news in French, soon another ID. Why in the world run a timesignal if you are that far off? A simple announcement of the time should be enough, without a signal implying far more accuracy than in reality.

9580, Africa Numéro Un, Dec 6 at 2203 in French news of Somalia, VG signal. I also had them well at 0700 as in previous report. I am beginning to wonder if during the last several months they had been running reduced power and have just recently resumed full power, 500 kW per WRTH. We are also still waiting for them to reactivate a second transmitter (WRTH shows three), and bring back daytime frequencies 17630, 15475. BTW, there are no Gabon registrations in HFCC (gh, WOR 1490, DXLD)

GERMANY - Hamburger Lokalradio announces test transmissions on 5980 kHz, running 1 kW from the privately owned transmitter plant (a former utility site) at Krekel, in the municipality of Kall near Euskirchen, i.e. the site that since last year transmits Radio 700 on 6005 kHz with 1 kW, too. As of Dec 1st Hamburger Lokalradio will be on 5980 daily between 1000 and 1200, on Dec 24, 25 and 26 from 0600 to 1200 which appears to be the maximum airtime authorized by the German telcom regulation authority (Bundesnetzagentur) so far.

According to various reports in the A-DX mailing list and the Mysnip forum 8773 the transmitter has already been tested during the last days, with borrowed modulation of Radio 700. I understand that besides this low power relay the 100 kW transmissions via Wertachtal, every first Sunday of the month 1000- 1100 on 6045, will continue. At least no cancellation has been announced so far. Of course this tiny low power outlet can not adequately replace a professional broadcasting transmitter with 20 dB more juice (Kai Ludwig, Germany, Nov 22)

IRELAND - 3910, Atlantic R, 11/13 via Global Tuners UK from 2302 to 2333 with predictably nice signal. However 6960 was not heard, even in the UK. A QSL e-mail from Stephen Prendergast explained why: "We broadcast from the west coast of Ireland, we have a 80 ft vertical tower that supports a inverted V for our 6960 kHz transmitter (currently 10 watts) and we have a inverted L antenna for 1251 kHz MW. Our 1251 kHz transmitter will not be fully up and running till Christmas, and will operate on 300 Watts.

The 3910 kHz transmitter is located at a different site not too far away, it's a horizontal dipole, the transmitter was running at 150 W from 2000 to 2210, and then 500 W from then till close at 2333. This has been our second broadcast, and first on 3910. We hope to return during the Christmas season as we need to make improvements to our 6960 transmitter. our link was dropping due to water logging in the coax."

10 w is not likely to travel far! 6960 could be an interesting target for the Christmas broadcast (Bruce Churchill, Fallbrook CA, Nov 22, Cumbre DX via DXLD)

JAPAN - 6055, R Nikkei-1, 1209, Dec 02, Japanese talk, classical orchestral music // 9595 also audible, weak but improving. Blocked by co-channel Prague 1228. LITHUANIA - Am 30. Okt. 2009 hat Radio Vilnius seine letzte englischsprachige Sendung ausgestrahlt. Drei Tage zuvor kam der kurzfristige Beschluss, die englischsprachigen Sendungen einzustellen und die Redaktion aufzulösen. Zuletzt war die Redaktion in der allgemeinen Nachrichtenredaktion des Litauischen Rundfunks integriert. Nach der Schliessung kann man nur noch (kostenpflichtige) Informationen ueber die Nachrichtenagentur BNS bekommen. Nach Angaben von Audrius Braukyla, Chef der Nachrichtenredaktion LRT, wird diskutiert, ob man irgendwie per Internet auf Englisch wieder auf Sendung gehen kann.

Die dramatischsten Stunden erlebte Radio Vilnius bei der Besetzung des Radio- und Fernsehentrums im Januar 1991. Hier war auch die englische Redaktion direkt betroffen, der es aber gelang, schon einen Tag spaeter wieder auf Sendung zu gehen. Die Art und Weise, wie die Journalisten ihre Arbeit fortsetzten und die baltischen Sender sich gegenseitig Hilfestellung gaben, wie Sprachstudenten hastig uebersetzte Nachrichten verlasen, um die internationalen Medien zu informieren, wie die Sitzungen des litauischen Parlaments trotz Belagerung im Rundfunk uebertragen wurden, machte weltweit Eindruck. Nach dem gescheiterten August-Putsch wurde die Anerkennung der Unabhaengigkeit am 1. Sept. 1991 nach langem Straeuben auch erstmals von Michael Gorbatschow angedacht. Da lief aber schon die Anerkennungswelle.

Erst im Aug. 1993 zogen die letzten russischen Truppen ab. Litauen war die erste baltische Republik ohne russische Militaerpraesenz, doch das Gefuehl der Bedrohung blieb. Nicht umsonst war Litauen im Jan. 1994 das erste Land aus der ehemaligen UdSSR, das seinen Beitritt zur NATO beantragte, und damit den Westen zwang, Stellung zu beziehen. Radio Vilnius war in den Jahren des litauischen Strebens in den Westen bzw. nach Freiheit von sowjetischer und russischer Hegemonie die zentrale Quelle fuer Information ueber die Ereignisse in Litauen. Zuletzt war die Sendung aufgrund kurzfristiger Sparmassnahmen bei der Kurz- und Mittelwellenausstrahlung ab dem 1. Jan. 2009 nur noch in Litauen auf UKW und im Internet zu hoeren.

U.S.A. - 4755, at 2214 7 Nov, WWCR ID of test broadcast, guitar music, SIO 333 (Kevin O'Daly, Sherwood Forest, Notts., Dec BDXC-UK Communication via DXLD) 4755 at 2314 7 Nov, test transmission, ID and music, SIO 444 (Colin Watson, Cumbernauld, Lanarkshire)

4775, at 2255 21 Nov, WWCR test, ID, request for reports, music, SIO 344 (Dave Kenny, Caversham, Berkshire, ibid.) Whence any QRM? Apparently the have not tested since on any 4 MHz channel (gh)

WTWW: Does anyone know the official start date and time in UT of this new shortwave broadcaster. We Transmit World Wide. I like the name, very catchy. I hear they will use two frequencies- (Gary Drew, UK, Dec 9, dxldyg via DXLD)

There is no "official start date". I just talked to George McClintock. Most things are ready, but they are waiting on the power company to install the transformer, etc., and that is being delayed by the weather. There has been rain and wind, it's muddy and a bulldozer has to be used. The power poles are on site but not yet set. He says the power could be on this week, or next week, hopefully not later than that. The antenna wires are almost strung. Once they can go on the air, there will probably be a period of testing before regular programming starts (Glenn Hauser, Dec 9, WOR 1490, DXLD)

Thanks a lot to our club members for your contributions:

RAD : Richard A.D'Angelo, Wyomissing, PA, USA. Ten-Tec RX-340, Drake R-8B, Eton E1, Lowe HF-150 with Alpha Delta DX Sloper, Datong FL3.

RL : Richard Lemke, St. Albert, Alberta, Canada. JRC NRD-535 HF Antenna random long wires in the trees.

Here are the loggings from Richard A. D'Angelo of Wyomissing, Pennsylvania, USA:

- 4845 MAURITANIA, Radio Mauritanie - Nouakchott, 2151-2218 Nov 10, Arabic vocals to 2158 talk in Arabic by a man and woman ending program. 2200 apparent ID by another woman followed by a man with news with frequent mentions of Nouakchott. Return to music programming at 2209. Good signal.
- 4905 CHAD, Radio Chad, *0430-0507 Oct 15, opening music followed by a man announcer with ID and sign on announcements in French. Program of highlife vocals hosted by a man. Poor.
- 4990 SURINAME, Radio Apintie (presumed), 0505-0541 Oct 23, program of continuous light pop vocals with male announcer talking briefly at 0518 but difficult to make out language. Poor.
- 5005 EQUATORIAL GUINEA, Radio Nacional - Bata, 2153-2258* Nov 1, woman announcer in Spanish hosting program about Abba music playing many selections in Spanish. ID by man at 2226 after program ended. Highlife music hosted by the man announcer until closing announcements at 2256 followed by orchestra national anthem. Poor but steadily improving to fair by closedown.
- 6010.1 COLOMBIA, La Voz de tu Conciencia, 0307-0340+ Oct 15, two women with religious discussion in Spanish followed by a man at 0324 ending the program. Program of continuous music/vocals followed. Fair.

Dear Friends,

Welcome to the last edition of Logbook for this year.

The autumn weather here has been unusual with no snow so far breaking a 162 years old record.

We have a shorter Logbook this month which is better than having none as in last month.

Wishing everybody a Merry Christmas and a Happy New Year 2010,

Ashok Kumar Bose

QSL CORNER

RADIO FREE ASIA RELEASES ANNIVERSARY QSL CARD

Radio Free Asia (RFA) announces its 13th anniversary QSL card which began use on September 1st. This QSL card celebrates RFA's 13 years of broadcast excellence. RFA's first broadcast was in Mandarin on September 29, 1996 at 2100 UTC. This QSL card will be used for all confirmed reception reports dated September 1 – December 31, 2009. The design used is one of many drawings made by the children of RFA personnel earlier this year. This card not only commemorate RFA's 13th anniversary but also helps capture the spirit of the RFA's family and friends around the world while promoting peace, freedom and democracy.

Radio Free Asia (RFA) is a private, nonprofit corporation that broadcasts news and information to listeners in Asian countries where full, accurate, and timely news reports are unavailable. Created by US-Congress in 1994 and incorporated in 1996, RFA currently broadcasts in Burmese, Cantonese, Khmer, Korean to North Korea, Lao, Mandarin, the Wu dialect, Vietnamese, Tibetan (Uke, Amdo, and Kham), and Uyghur. RFA strives for accuracy, balance and fairness in its editorial content. As a 'surrogate' broadcaster, RFA provides news and commentary specific to each of its target countries, acting as the free press these countries lack. RFA broadcasts only in local languages and dialects, and most of its broadcasts comprise news of specific local interest. More information about Radio Free Asia, including our current broadcast frequency schedule, is available at www.rfa.org. RFA encourages listeners to submit reception reports.

Reception reports are valuable to RFA as they help us evaluate the signal strength and quality of our transmissions. RFA confirms all accurate reception reports by mailing a QSL card to the listener. RFA welcomes all reception report submissions at RFA-website www.techweb.rfa.org (follow the QSL REPORTS link) not only from DX'ers, but also from its general listening audience. Reception reports are also accepted by email at qsl@rfa.org, and for anyone without Internet access, reception reports can be mailed to our postal address.
